The report having gone out that in event of Loup City going "dry" Jenner's Park would be turned into a beer garden, a representative of the Northwestern has it directly from Mr. Harry Jenner that so long as he owns the park such will not be the case. However, he has a proposition from a Stanton, Neb., man to trade him a tract of land in that county for the park and should the transfer be made he has no means of knowing what the new owner might do. The Northwestern has also heard a rumor to the effect that in event of a "dry" period in Loup City, local men will put in a new park near town, for a beer garden but we have not as yet interviewed those mentioned as the proposed projectors, hence only give to report as given to us.

**PAINT THAT LASTS**

To preserve your house—your property—your dollars, you might say—you must use paint. To do so economically the paint you use MUST have lasting qualities. Remember, poor paint costs more than good paint, for the work has to be done oftener. Start right by getting

**Horse Shoe Paint**

and you can make up your mind it's on to stay. The reason for this is plain. Horse Shoe Paint is wholly composed of the strongest and best materials known in the science of paint making—it contains no cheapening or adulterating materials whatever. It's made of strictly Pure Zinc and White Lead for pigments. Add to this Pure Linseed Oil—crushed by the manufacturers themselves to insure its purity—then the necessary drier and coloring matter and you've got the best paint that money, brains and material can produce.

Horse Shoe Paint has stood the test for 20 long years—it's a proven paint—and is sold in almost every town and city in the United States. Should not that fact alone convince you that Horse Shoe Paint gives satisfaction beyond question?

Horse Shoe Paint does all we claim—we guarantee it to be pure and to wear. Horse Shoe Paint is absolutely pure; you buy it subject to chemical analysis and it's paint that lasts.

Paint your horse with Horse Shoe Paint this season by all means.
