THE TARIFF DEBATE

RULE FIXING DATE OF VOTE ON THE MEASURE.

THE TIME SET IS APRIL 10TH

Condition: Are That the Rule Protects the Bill, It Is Said, from All Amendments.

WASHINGTON. - Following numerous conferences held throughout the day, Representative Dwight of New York, the republican "whip" in the house, announced that the rules committee would bring in a rule fixing the time for taking the final vote on the tariff bill and restricting amendments thereto, and that the rule would be adopted. Mr. Dwight made an unequivocal prediction of victory.

The rule which will be brought in Monday sets the day for a vote on the tariff bill on April 10 and proall amendments except those recommended by the ways and means com-Warden Beemer of the Nebraska mittee, and those offered on the floor of the house that will give an op-

portunity for a vote on the question of free lumber, protected barley and It is reported that the majority of the twenty-six or more republicans who met Saturday and drafted a pe-

tition to the tariff framers asking for protection on lumber, coal, iron ore and hides, have been prevailed upon not to oppose the Payne bill as they threatened to do unless heed was given to their demands. This development today, it is said, makes the adoption of the rule a practical

certainty and accounts for the confidence of Mr. Dwight in the success of the rule. It is also said that the when the bill reaches the senate. Chairman Payne of the ways and means committee. Representatives

PLAN BIG WAGE CUT FINISH WATERWAY REPORT ST. LOUIS TO NEW ORLEANS POR TION IS PLANNED. STEEL TRUST'S COMPANIES TO SLASH PAY 15 PER Engineers' Board Said .to .Consider CENT. Twenty or Twenty-Four Foot GOES INTO EFFECT MAY 1

Reduction Means a Saving of \$25,000,-000 and Gives the Combine Advantage Over Independents Whose Cuts Are Ten Per cent.

New York .- The various subsidiary companies of the United States Steel corporation, it is announced on the best authority, will slash 15 per cent. off the wages of their employes on May 1. The trust itself will not announce the cut, but it will be left to the subsidiary concerns to make the announcements on April 15.

The subsidiary companies of the steel corporation have been holding back their announcement of wage cuts with the purpose of letting all the independent companies do their cutting first. This has not only the advantage of letting the independents accumulate the brunt of the odium for wage reduction and insures that there will not be an exodus of skilled trust workmen into the independent mills. but also serves a steel market coup of far greater importance than either of these considerations. Inasmuch as the independents have

rate of ten per cent., the steel trust will be in position, if it announces a cut of 15 per cent, on May 1, to rearrange its price schedules so sweepingly that it will capture the entire insure an enormously swollen business for the coming year. The United States Steel corporation

basis a cut of 15 per cent, means that the company will save \$25,000,000 on labor alone. day of a carload of non-union engineers, oilers and firemen is looked

Channel Economical. Washington. -- Another big step in the plan for a deep waterway from the lakes to the gulf was taken Friday when the engineers' board in charge of the survey completed its report on the portion between St.

Louis and New Orleans. This is the biggest stretch of the proposed channel, and the report, according to telegraphic advices received at the war department, should be here to-day. The survey from Chicago to St. Louis was completed three years ago. The stretch from New Orleans to the mouth of the Mississippi will soon be complete.

Although Col. Bixby's dispatch as head of the engineers' commission in charge of the work merely announced the completion of the task, it is understood that the report will be highly favorable. It is reported that not only are the conclusions of the board favor able to the general project of a 14foot channel from Chicago to the gulf. but that the board considers it practicable from a commercial standpoint Information has been received here that the board went even further in its conclusions and was of the opinion that a deep waterway of 20 or even

24 feet could be built with economy in cut their wage scales uniformly at the preference to the 14-foot limit which is now proposed.

The report on the delta stretches of the proposed deep waterway is now all that is left before congress can map out its work. The national river steel market for months to come and and harbor commission of congress undoubtedly will urge speedy work when it brings in its report in December, especially if the Illinois legisla ture orders work begun meantime paid out \$160,000,000 in 1907.
