The democrats of Nebraska seem to have gotten at all cross-purposes as a result of the work of the last and never-to-be-forgotten bourbon legislature. First, the newspaper mouthpiece of that party in the state, the long-haired, loud-mouthed, windjamming Edgar Howard, has furnished column after column of stuff against his party, furnishing sweet morsels to the opposition. Later comes Taylor, representative from Custer county, and reads himself out of the party in the following caustic arraignment of the dishonest, disreputable gang that controlled the last legislature. Who will hit the door old donkey next? Here is Taylor's bitter pill: "The lambasting I received from C. W. Beal, Ross Moore and W. B. 'Success" Bowl

Construction.

A Perfect Disc Separator. Made in Three Sizes. Used throughout the entire world. Extra heavy and extra strong in every part.

It is so simple that it cannot get out of order or wear out. It will last from 15 to 20 years with ordinary care. It is unequalled for clean skimming, easy turning and steady service. It has the INVOLUTE TURBINE DISC BOWL, the only scientifically correct principle for cream separation. BALL BEAR-ING—8,000 revolutions a minute. It is backed by THE BABCOCK TEST.

A perfect separator must combine all of the following features:

Simplicity of Construction The "Success" is parts that will by test perform its work well. It has a distinct advantage over all other machines of delicate and intricate parts.

Ease of Operation By test the easiest machine on the market to operate. The ball bearings eliminate all friction.

Weight The "Success" is much heavier than any other machines. This prevents vibration and insures great durability.

### The Famous :. Turbine Disc Bowl

The most important feature of a cream separator is the bowl. The value of the machine depends, to a great extent, upon its bowl. The "Success" separator is equipped with the world famous TURBINE DISC BOWL. Simple and yet so strong. No small holes, no sharp corners, no corrugated surfaces, no obstructions from the center to the outside. A disc well made, easily cleaned and one that will keep pure and sweet. The Turbine principle is fast becoming the most universal motive power of the mechanical ple is fast becoming the most universal motive power of the mechanical world, both for land and water, because the Turbine requires less power to operate, while it develops greater force. It requires less space, and gives greater speed than any other known method of developing energy. There is no guess work about the operation of separation with the "Success" separator. The cream passes one way, the milk in the opposite direction. No interference, no guess work.

The Jurbine Disc is the Greatest Feature in any Separator on the Market

Don't buy a separator and pay more money for it just simply because it

When you buy the "Success" you are buying a world famous separator under a different name. The only difference is we have eliminated all selling and advertising expenses in offering you this separator.

Because of the quantity contracted for and because we have eliminated all these expenses we can make you lower prices than any individual concern on earth. You cannot make as much money in a season with a \$100.00 separator as you can with the "Success."

POINTS THAT USERS OF THE SUCCESS FIND SUPERIOR TO ANY OTHERS: Simple mechanism. Ball bearings. Ease of turning. Ease of cleaning. Low down supply can. No vibration. Capacity greater than rated. Any density of cream required. Smooth, rich cream. Better quality of butter. Larger quantity of butter. Clean skimming all the time. Easier turning, for with the Turbins principle the machine turns easier while separating than it does when bowl is empty. Durable, because of large dimensions in every shaft and bearing. Cannot get out of balance as easy as other separators on account of the construction of the bowl. Equipped with the famous Turbine Disc, which means clean skimming and easy turning. Remember, every machine is guaranteed.
