

BREAKS COLD IN A DAY.

This prescription is one of the very best known to science. The ingredients can be gotten from any good drug store, or he will get them from his wholesale house.

Mix half pint of good whiskey with two ounces of glycerine and add one-half ounce Concentrated pine compound. The bottle is to be shaken each time and used in doses of a teaspoonful to a tablespoonful every four hours. The Concentrated pine is a special pine product and comes only in half ounce bottles, each enclosed in an airtight case, but be sure it is labeled "Concentrated."

Avoiding Popularity.
"How shall we avoid popularity?" John Wesley once asked his preachers, and straightway gave them the answer in a set of rules. Here is rule 1: "Warn the people among whom you are most of esteeming or loving you too much." And here is rule 5: "Converse sparingly with those who are particularly fond of you."

A Domestic Arrangement.

"Huster and his wife seem to get along very well together."
"That's because they have set aside one day in the week to do all their fighting. On the other days they keep the peace."

A BEAUTIFUL CHURCH BUILT FROM JUNK

An architectural anomaly, a beautiful building built from scrap material, is the product of the genius, energy and inspiration of an Omaha clergyman. When completed the First German Presbyterian church will present an edifice of stable and dignified beauty, yet all the material that goes into its construction is discarded junk gathered from every available source. It represents what can be accomplished by a few earnest, hard-working men under the leadership of a preacher full of enthusiasm and inspiring optimism.

When he first went to Omaha, three years ago, Rev. Julius F. Schwarz determined that his congregation should have a new church. The fact that the members numbered only 60 and the whole property of the corporation was about \$5,000 troubled him not at all, and he began to build with as much faith as if he had the riches of Solomon. His plan was to gather everywhere, whenever he could, all the old but strong timbers, all the iron junk available for structural use, all the loose and irregular stone and all the generally discarded building materials that could be found in Omaha and from them to build a church. It was not to be a mean and ugly house of worship, but a well-equipped, well arranged, ample meeting place for his people.

He has now extended it to include an 11-room house for his own family and the whole property would have cost \$30,000 if it had been built by contract. As built by Rev. Mr. Schwarz and his fellow laborers it will cost less than \$25,000. The other \$15,000 has been saved to his people by the perseverance, energy and ingenuity of the pastor.

The first charge that Mr. Schwarz took when he left the theological seminary was at Connersville, Ind. For six years he remained there and was called to Omaha three years ago on a recommendation from one of his instructors in the theological school. At that time the First German Presbyterian was a small frame church. As soon as the new pastor came he announced that the church was too small. To build a church with a membership of 60 seemed out of the question to all but the pastor. He thought he knew a way and he set about it with almost no support, at first, from the others.

For a year he sought for a suitable location and finally purchased the lot the new church is on for \$1,800. When he bought this tract the fund which he drew from amounted to \$57. His first move was to sell the old church for \$1,850. As soon as the lot was paid for he shouldered a spade, and replacing his ministerial dignity with a grim and effective energy he began to dig. The first thing that a church needed was a foundation. He had no money, but he could make the foundation himself, and that would be one step toward it.

He asked for contributions from friends outside of Omaha and waited for his own people to contribute voluntarily. The dollars came slowly, but they came with sufficient steadiness to assure him that he could make a few purchases for a start. While walking on the street one day he saw that in repairing the street the old curbs were being taken up. "These are good blocks," said the pastor-builder, and he bargained with the contractor to take them off his hands. That stone went into the foundation.

His next lot of material came when the wall that supported the yard of the old Rosewater residence was to be torn down. Men hired by Mr. Schwarz did the work and the brick and stone was taken out and put into the walls that were gradually rising on the church site. Some of his congregation began to contribute two or three days' work with teams in gathering material.

The south steps from the old high school building followed and these made the "water-table" on both sides of the church part of the building. The parsonage end was being added to from the stone that could be picked up around stone yards for small expense and converted into suitable blocks.

An opportunity came to the builders when the driveway was constructed leading down to the Union station on the north side. Here was bought 15,000 feet of lumber that had been used in scaffolding and a carload of fine red sandstone was purchased for \$20. When, a few weeks later, a contractor offered Mr. Schwarz \$70 for that same carload of red stone because he needed it to fill a contract in a hurry, the minister gave up his material and added \$50 clear to the fund. This was the only enterprise for profit that was entered into for the benefit of the cause, except a little deal in lead pipe which the minister had with a prominent fraternal order. He bought some old lead from the lodge for \$1.50 and sold it for \$15 to a junk dealer.

All winter long he has been haunting the repair gangs about the streets, visiting stone yards and junk heaps and adding to the pile of materials that is being made into a building by his men. One of his biggest and most profitable finds was a pair of iron pillars in excellent condition which he bought from the street railway company for their price as old iron. The street railway company also furnished him with the most novel use of old material in the whole building, which is the making of rafters out of old steel rails. The rails are more than strong enough and were bought for the price of junk.

The church, which consists of a basement with a beautiful fireplace and an auditorium which will seat 300, measures 44x73 feet. The roof extends back over the parsonage, making it a full three stories high, with one room in the attic. The house part is 24x50 feet in ground

Beautiful Edifice Being Erected by Rev. Schwartz

Rev. Julius F. Schwarz.

Schwarz could not afford to put on a large force of men. His foreman, Fred Slater, is a German stone mason. The wages of the men are the debt which Mr. Schwarz does not intend to neglect and his men are paid every Saturday as if they were working for a wealthy contractor who had thousands to back his operations. To do this the builder has had to rely upon the kindness of his other creditors, who have helped the cause by not pressing their claims.

That \$6,000 that has already been put into the work was gathered mostly from the contributions of friends all over the country. Other pastors have taken up benefit collections, a friend in Indiana sent \$200, and the congregation has contributed far beyond what might be expected from their means. Mr. Schwarz made a house-to-house campaign of four days down in Riley, Kan., and raised \$200 in that way. One of the church trustees, who declared when the project was begun that he would not do anything to aid it, has already given \$100, and others have given \$100 and \$200 contributions. Churches have promised contributions that will probably average \$25 each and several hundred dollars more is expected from that source.

"If I just had \$6,000 more I could finish it," says the minister, and he seems not to lack faith that the \$6,000 will come as it is needed. Mr. Schwarz's unique undertaking has attracted considerable attention and promises of financial assistance have come in from various parts of the country. These donations to a most worthy cause are for the most part in small amounts, but are none the less appreciated by the energetic pastor and the encouragement thus received has had no little part in helping along the good work. Rev. Schwarz has announced that all outside contributions will be gratefully received and promptly acknowledged.

The biggest addition to the fund that has come so far was the \$2,500 got from selling the old parsonage, which the pastor advised as soon as he saw the possibility of making a home for himself as a part of the new building. It is believed that enough more can easily be raised to put on a roof so that services can be held in the

basement, and after that the money will come in faster. In the meantime the minister is watching everywhere for anything that will make his church more commodious or his home more attractive.

"The reason for my doing all this," said Rev. Mr. Schwarz, as he laid aside the tools with which he was helping the workmen, "is that I believe that right here is the best field for work among the Germans that there is in all the northwest. My life occupation is missionary work among my German people and all the other reason why I want to stay here and put up this big church for my small congregation is because from here I can reach so many Germans. I was born an American, but came from German parents and am thoroughly German in thought and feeling. When I decided to become a minister I saw that the greatest need was among my own people, so I studied at a German seminary. My

position makes it possible for me to reach many who are in need of help and many who are strangers and I want to stay here and make my work effective in helping the German citizens in this country."

It is because of this sincere desire to be of help to his church that Mr. Schwarz has labored with his hands and brain to build the new church. He is also stated clerk of the presbytery of Omaha, and the compensation received from this additional work he considers providential in that it helps to secure him sufficient salary to bring his work to a self-supporting basis.

Rev. Schwarz's father was a practicing physician in Franklin county, Mo. He hailed from Heidelberg, Baden, Germany.

Rev. Schwarz was left an orphan at the age of 11 months. He was taken into the home of a kind-hearted couple who had already raised eight children of their own.

As a tribute to the memory of his foster parents and as a token of appreciation of the kindness received at their hands, the church parsonage has been turned into a sort of a home for the friendless and a refuge for the destitute. Many have partaken of the parson's hospitality until work or other assistance had been offered. Should this sort of hospitality require more space, it is possible that an old people's home may be established after the financial obligations of the new church edifice have been met.

SCIENCE AND FAITH

Is it true that the greater the knowledge the less the religious interest? Are these two persons, the man whose zeal for religion is equalled by his bigotry and ignorance and the other in whom scientific study has dwarfed spiritual sensibility, fair types by which to judge the relations of religion and knowledge?

Is intelligence incompatible with real piety? Will the growth of knowledge bring about the dissolution of religion? Is the life of religious aspirations and feelings out of date in a scientific age such as we are constantly reminded this one is today? Science has overcome superstition; is faith cast bound up with superstition that it, too, must go?

We can be sure of one thing, at least; that, no matter what our feelings, theories or ideas may be, we cannot turn our backs on the great world of fact as it is laid before us. The faith that fights facts is committing suicide. Appeals to our fears cannot to-day make the facts less real to us and we know that by them we will have to stand or fall.

If you stop to think about it, there is a striking significance in the fact that this question has arisen. Is there a religion for the intelligent, educated, scientific mind? It suggests another question: Can any other mind fully comprehend the riches and meaning of religion? The unthinking clinging to customs, traditions and forms that are the vestiges of truth. The trained mind distinguishes between the garments of truth and truth itself.

"Where are the enormous dishes of yesterday?" queried a woman shopper. "The kind that you could pile all the dishes used by a family of 12 into at one time?"

"They don't make them any more," said the clerk, "because there are no families of 12. Smaller families mean fewer dishes to wash, and the size of the dishes has shrunk accordingly."

Five Million Under Arms.
The German army numbers over 5,000,000 men.

FINEST CATHEDRAL

Scottish Rite Temple in Fort Wayne Is Dedicated.

Masons of High Degree at Exercises Attending Opening of \$200,000 Temple—Has a Fine Banquet Hall.

Fort Wayne, Ind.—The new Scottish Rite cathedral in Fort Wayne, costing about \$200,000, and said to be the finest in America, was dedicated on the evening of November 17 in the presence of visiting members of the order from most of the larger cities of the far east and the middle west. The dedication was preceded by a banquet, at which 1,000 plates were laid. The banquet-room of the cathedral fills the entire ground floor and is one of the largest and most ornate banquet halls in the west.

Owing to the illness of Sovereign Grand Commander Samuel C. Lawrence, 33, of Boston, the master of ceremonies was Barton Smith of Toledo, 33, pulsant lieutenant grand commander, assisted by John Corson Smith, 33, grand minister of state, William Geake, 33, of this city, commander-in-chief of the Fort Wayne Sovereign Consistory, assisted in the dedication.

The dedication was held at the regular time of the fall meeting of the consistory for the Valley of Fort Wayne, and 300 took the Scottish Rite degrees. Degrees were given from the fourth to the Thirty-second. Heretofore this valley had no jurisdiction beyond the eighteenth degree, and the degrees from 19 to 32 were conferred here for the first time. As the consistory has already nearly 1,100 members, the Fort Wayne consistory has become one of the largest in the country.

The cathedral, which was designed by Mahurin & Mahurin of Fort Wayne, is at Clinton and Washington streets, in the residence section, with the handsome First Presbyterian church across the street. It is built of Bedford stone on all sides and is thoroughly fireproof, being finished within with concrete floors, marble stairways and wainscoting, and iron

Front View of Cathedral.

balustrades. Some rooms are finished in Cuban mahogany, but there is very little inflammable material anywhere. The heating is by steam and the lighting by electricity.

The cathedral is three stories high, with a spacious basement. The ground floor will be the banquet and ball rooms, with galleries. The social rooms are on the second floor, which is also provided with quarters for ladies. There is also a room for the Mystic Shrine. The third floor is occupied by the consistory auditorium, which is arranged on the stadium plan with tiers of opera chairs rising steeply, so that those in the rear seats can all see the work on the large floor below. There are seats for nearly 600 in this auditorium. The organ loft is to the north and at the south end there is a spacious stage provided with scenery, the work of a St. Louis firm.

The proscenium arch is elaborate with the designs and emblems of the several degrees. The decorative design and color scheme were the work of a Chicago firm. The organ was made in Rock Island at a cost of \$6,000.

Left Parson with Victory.
A west of England parson once refused to read the Athanasian creed. The parishioners complained to the bishop, who told the parson he must read it. Now it so happened that the creed may be "said or sung," so on the following Sunday the parson addressed his congregation thus: "Next follows Athanasius' creed, either to be said or sung, and, with heaven's leave, I will sing it. Now, clerk, mind what you are about." After this they both struck up and sang it with great gusto to a fox-hunting tune, which, having previously been practiced, was well performed. The indignant parishioners sent word hot haste to the bishop about what had happened, but he said he could do nothing, as the creed had been sung, so the parishioners decided to dispense with it altogether in future.—London Opinion.

Fearlessness of Seagulls.
A Glasgow doctor who was recently touring the Highlands had a somewhat unique experience with seagulls while passing through the Caledonian canal, says the Glasgow News. The birds, were as usual, following the steamer and were being fed by the passengers.

To prove how tame or bold they were, the doctor fed them by placing pieces of biscuit on his cap. The birds soon displayed much skill in snapping up the food. Then the doctor placed a piece of biscuit in his mouth. The gulls were shy at first, but ultimately one bird bolder than his fellows partook of the morsel, and before long there was brisk competition for the tidbits. The snappershot on board were kept busily engaged, so that there is now pictorial proof of the incident.

Brotherly Love.
"Yes, they bring in a lot of eggs," related Storekeeper Jason, as he dusted out the prunes. "Why, we even receive eggs in exchange for the latest songs."
"Shake!" said the big man in the checked suit, as he lit a stogie; so do I."
"H'm! Storekeeping, too?"
"No, I'm a minstrel man."

The Exceptional Equipment

of the California Fig Syrup Co. and the scientific attainments of its chemists have rendered possible the production of Syrup of Figs and Elixir of Senna, in all of its excellence, by obtaining the pure medicinal principles of plants known to act most beneficially and combining them most skillfully, in the right proportions, with its wholesome and refreshing Syrup of California Figs.

As there is only one genuine Syrup of Figs and Elixir of Senna and as the genuine is manufactured by an original method known to the California Fig Syrup Co. only, it is always necessary to buy the genuine to get its beneficial effects.

A knowledge of the above facts enables one to decline imitations or to return them if, upon viewing the package, the full name of the California Fig Syrup Co. is not found printed on the front thereof.

WANTED CORRECTNESS.

Customer—My yes, that's better, but you'll have to alter it a little over the hips, for I'm taking up a new appointment on Monday, and the principal informed me that his firm was very particular as to correctness in figures.

Purchasing Power.

A young gentleman of our acquaintance, who had just reached the age of six, was recently waiting with his mother for a train at a railway station, when he noticed a penny-in-the-slot weighing machine. He asked his mother a great many questions about it, and at last received permission to drop in his penny and be weighed. Having obtained that important information, he said: "How much would I have weighed, mamma, if I had dropped in a dollar?"
