

For Family Needs
You will find Hostetter's Stomach Bitters especially well adapted. It is compounded from the purest drugs and is good for every member of the family. When the appetite is poor, system run down, or you suffer from Sick Headache, Vomiting, Heartburn, Sour Stomach, Indigestion, Costiveness, Biliousness, Colds and Malaria, take nothing but

ON THE ENDURANCE RUN.

Mechanic—Say, a diving suit's just the ticket when it comes to repairing autos on these country roads. One can be on his back under the machine in perfect comfort.

KEEP BABY'S SKIN CLEAR

Few parents realize how many estimable lives have been embittered and social and business success prevented by serious skin affections which so often result from the neglect of minor eruptions in infancy and childhood. With but a little care and the use of the proper emollients, baby's skin and hair may be preserved, purified and beautified, minor eruptions prevented from becoming chronic and torturing, disfiguring rashes, itchings, irritations and chafings dispelled.

To this end, nothing is so pure, so sweet, so speedily effective as the constant use of Cuticura Soap, assisted when necessary, by Cuticura Ointment. Send to Potter Drug & Chem. Corp., sole proprietors, Boston, for their free 32-page Cuticura Book telling all about the care and treatment of the skin.

Comparison Shunned.
"You don't cry at all at the match."
"No," answered the reposed girl; "I couldn't think of such a thing."
"But the young woman with you wept copiously."
"Of course. Her lace handkerchiefs are ever so much more elegant than mine."—Washington Star.

Cataract Cannot Be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Cataract is a kind of cloudy substance which accumulates in front of the eye and gradually obscures the vision. It is not removed by any means, and the only relief is afforded by the surgical operation of cataract extraction.

"Hankley's got a wonderful head. All his woman readers are simply wild over that serial love story he is running in the Daily Stunt."
"How did he do it?"
"Why, he printed the last chapter first."

Important to Mothers.
Became carefully every bottle of **CASORIA**, a safe and sure remedy for infants and children, and see that it bears the signature of **Dr. H. H. H.** In Use For Over 30 Years. The Mind You Have Always Bought. She Had Noticed It.

Mrs. Kasker—They say the purchasing power of a dollar has diminished.
Mrs. Decker—Yes, it used to buy a bargain worth \$1.98, and now it only gets something worth \$1.49.
Make \$500 in Gold.

Read the magnificent offer by the John A. Salzer Seed Co. in another part of this paper. Get your wits to work and capture the \$500.00, and at the same time secure a supply of the most reliable seeds on earth. The company is one of the largest in the country, and thoroughly responsible.

Labor to keep alive in your breast that little spark of celestial fire called conscience.—Washington.
PLEASURES IN 6 TO 14 DAYS. PAID GUARANTEE. In 6 to 14 days you will see the result of using **Dr. H. H. H.** in the treatment of your kidneys.

Scallops bore through rock by means of an acid they exude.
Cauliflower shows and aggregates many serious diseases which are not recognized until the vegetable is past its prime.

The popular drink of Welsh miners is called ewe.

Smoking Sam Lewis' Single Binder 50 cigar better quality than most 100 cigars. A dog's bark isn't as bad as his bite, but it lasts longer.

Two Useful Coats

THE COAT is an Inverness, and could be made in cloth, serge or tweed, lined or not, as preferred. It is very plainly made, having only stitching as a finish at the edges. The fronts are double-breasted; buttons covered in the material form the fastenings.

Touge of black pan, trimmed with a rosette of gold tissue, and two pheasant feathers.
Materials required: Four and one-half yards 48 inches wide, six buttons, four yards of silk for lining the waist.

TO MATCH CLOTH DRESS

This simple bodice is made with two tucks on each shoulder, and lightly braided at the edges. The prettily shaped yoke is of coarse flannel net to match color of material; it is braided at the edges. Cuffs are made of the net set to material bands at the elbow, to which the sleeve is gathered. Buttons and braid loops form further trimming.

Materials required: 1 1/2 yard cloth 46 inches wide, one dozen buttons, one dozen yards braid.

DESIGNED FOR TOILET TABLE
Pincushion of the Latest Design Formed of Mattress-Shaped Cushions Prettily Decorated.

A pincushion that is dainty yet serviceable is one of the mattress-shaped cushions four an half inches wide by six inches long. It is stuffed with wool or bran and covered with satin, or satin, if cost is an item. The outer cover is made from two pieces of heavy linen with a narrow hemstitched hem running entirely around it. The pieces finished fit easily on the top and bottom of the cushion.

The inner parts of the linen are then decorated with tiny squares of flannel or Cluny lace, with a design of leaves and scrolls in satin stitch and eyelet embroidery spreading around each bit of lace. The section intended for the top has a more elaborate design than the bottom piece.

The upper and lower sections are joined by lace insertion just the width of the sides of the pincushion. This is overlaid to the edges all around. One end is left open to slip in the cushion.

A New Bracelet.
A new bracelet which is attracting considerable attention among women is a band of gold from a half-inch to an inch in width. It is either heavily engraved or bears a pattern in black or colored enamel. As a matter of fact, the bracelet is not new, being similar to a style worn many years ago by our grandmothers.

In keeping ribbons, do not place odds and ends in an indiscriminate mass in a box. Have either different boxes or envelopes for the different colors, and they will be compact and easily managed.

Plaited Ruffles.
The lingerie ruffle on the last French petticoats and on the pantalon combinations are no longer invariably gathered to the heading which joins them to the garment.

Plaits frequently are substituted for the old gathers. They are laid regularly or in bunch plaits and, again, in pairs; and since the plaits are very shallow the flounce requires only the usual amount of material or a very little more. The material is never measured three times round the space.

On the right we show a very useful motor coat, made in heavy blanket serge, with a panel down both back and front, set on with a wide wrapped seam; the fastening is at the left side of front. The collar is made so that it can turn up or down, and the sleeves are set to wide turn-back cuffs, so popular just now.

Motor bonnet of gauged silk to match color of coat.
Materials required: Six yards 46 inches wide, one dozen buttons, three yards Vivella for lining to waist.

cushion and is lightly overcast when it is in place, or can be joined by tiny buttonholed loops on one edge and lace button on the lower side of the cover across one end.
Such a cushion is more distinctive than the covers that lace on, yet washes almost as easily. The insertion at the sides should match the lace inset at top and bottom.

MAKES DAINTY HAT BRUSH

One with Plain Back, Without Ornamentation, Best to be Fitted with French Louis Cover.

For one of the daintiest hat brushes you can imagine, select a plain back of irreproachable shape and no ornamentation whatever, and with good white bristles.

Before covering the wooden back it may be very lightly rubbed with a fine sandpaper, to roughen the surface so that the glue will hold.
Now for the French Louis cover. This is made of corded silk of a deep cream, embroidered slightly with ribbon work in an oblong medallion design. The silk is so cut as to entirely cover the wooden back except on the bristle side, and when the paste is applied to the silk care should be taken that it does not touch that part beneath the ribbon medallion, nor the top of the brush, but only along the edge of the silk. Do not turn in the edge, but after the glue is dry, paste over it a narrow gold lace galloon.

To be as French as possible in effect, the creamy tone of the silk should be soft and old, the rococo embroidery of flowers should be soft in tone, and the galloon of a more bronze coloring.

Fringe on Frock.
Tlay cotton fringes in cream or white are to be used upon some of the novelty cottons and linens for summer frocks. They are those identical ones that come for bedroom upholstery.

The finest qualities among them are quite delicate enough to use on linen skirts and hopsackings.

Some of the fringe measuring of white and blue cotton in a pattern which runs along the gimp which holds it in place. In others, the fringe remains uncut, each thread being a loop. The French have used these fringes for several seasons; just as they have used the tiny silk quality on chiffon and white radium silk.

Veil Novelty.
Have you seen some of the new veils that are being worn with the smart cavalier hats? They may easily be called freakish, as the meshes of flannel net have huge flowers and butterflies in self colors. Those of black are best style, though there is a new tan veil with big conventional figures that is liked by the unconservative.

A Simple Table Center.
Russian crash is used in its roughest state for the library table center. Just a square or circle is drawn upon the big piece of material, and then another nearly a quarter of an inch inside of the first. This line is padded, and then buttonholed with coarse linen floss in some rich color.

Nothing more, except to cut it out; no other form of decoration; just this line of fringe buttonholing; but when done in flame color or a rich old blue it will be well worth the little time it occupied in making.

Fur Hatpins Now.
It seemed that French ingenuity had devised every sort of hatpin that could possibly be thought of; but now a new kind makes its appearance. This is the hatpin tipped with a pert little animal head of fur. Tiny fox faces make these hatpins very attractive and they are used not only on the fur turbans, but on all hats trimmed with fur. Now also are monogram hatpins carved from wood and highly varnished and polished, when the carving has been completed.

PORTABLE MACHINE FOR BORING POST HOLES

Two Men and an Outfit Will Accomplish Work of a Gang of a Dozen Men, Without Usual Back-Breaking Labor.

Machine Bore Post Holes.

The interesting post-hole boring outfit shown in this illustration will make a hole uniform in size at top and bottom and of any depth to six feet. It consists of a boring machine mounted on a truck in such a way that it can be worked at either side or back of the truck. The holes are made by a large auger, or chisel bit, operated by a gear working in a toothed shaft, which furnishes the means for raising or lowering it. The power is applied by two friction clutches, which permits this raising or lowering of the auger without reversing its motion.

The engine and gasoline tank are placed on the front part of the machine. In this way providing sufficient weight to balance the other end, and the power is transmitted from the engine to the drive pulley by means of a belt. The machine will dig holes in any kind of soil onto which the truck can be driven, cutting readily through hardpan, shale and soft sandstone. Two men are required to operate it.

The machine illustrated is provided with a ten-horse-power engine and weighs about 2,500 pounds. A smaller size, driven by a 7 1/2-horse-power engine, is also on the market. Two men and one machine will accomplish the work of a gang of a dozen men, without the usual amount of back-breaking labor. The holes can be bored at any angle desired. The illustrations show the machine in two positions. One shows its position when not in operation, and the other shows it in position for boring.

HOLLOW WALLS OF CONCRETE

CROSS SECTION INNER STUDDING

- A. CONCRETE 3" THICK
- B. 2" x 8" PLANK
- C. 2" x 6" STUDDING
- D. 2" x 6" STUDDING
- E. PAVING BRICK TIE
- F. 2" x 8" PLANK OF INNER FORM
- G. CONCRETE FOUNDATION

It is not a difficult problem to construct hollow walls of concrete so that the inner air space is large enough to permit of comfortable working. The accompanying design shows how a wall may be readily built of two walls each three inches thick and an air space between them of ten inches. The only trick is to get out the plank of the inner form, and this is readily done when the inner studding of two by six inches is beveled so that it may readily be twisted to loosen the planking. It should not be struck but gently and evenly twisted, when it will release the planking. The ties across the wall are best made of vitrified paving brick, if they can be got a 12 or 14 inches long; if they cannot be had of that length the inner form may be narrower.

Wires which should be galvanized hold the outer studding together; these wires are cut and remain imbedded in the wall. If no paving brick are to be had good hand-burned straw ties may make the connection between the two walls, or short pieces of iron rods, or even very heavy galvanized wires, say about No. 1 size, cut and the ends bent over. Such a wall is built up a few feet at a time and allowed to set and harden somewhat before the inner forms are taken out and raised up. It will prove very cold-resistant and damp-resistant. The inner surface will be plastered; the outer surface may be simply roughened a little with a tool made for that purpose or washed with the proper acid to make it rough and of uniform surface, or it may also be plastered, though this does not usually give so pleasing a surface as the rough one.

Of course, at top and bottom the walls will be hollow. The two walls are bridged over for the top, ties or slabs being used, taking care that they do not cover more than about one inch of the wall at the inner side.

Midwinter Gardening.
Midwinter gardening of vegetables is difficult and generally unsatisfactory from a financial standpoint. Most of the money made in growing vegetables under glass is before January 1 and after March 1. During January and February the fuel bill is heavy. There is little sunshine, the weather is dark and cloudy much of the time, the days are short and plant growth is necessarily slow.

Potato Bugs.
There appeared in some parts of Indiana last season a small bug with variegated wings which destroyed thousands of potato crops. A half dozen bugs will quickly kill 100 or more of the potato bugs on a single plant. Specimens have been sent to the government for examination.

SKUNK FARMING IS PROFITABLE
Fairly Low Fence, with Plank Under Bottom, Will Keep Them in Enclosure—Eat Almost Anything.

My brother kept several skunks over one summer in order to learn their habits and possibly to grow some for their fur.
Everything went well until he carelessly left a board leaning against the fence from the inside and the skunks no sooner discovered this than they climbed up and dropped down from the top of the fence to the outside.
A fairly low fence will inclose them if nothing is left leaning against it and a plank is put flat just under the ground clear around the fence.
When the skunks undertake to dig out of the pen they go close to the

Fatal Course.
A matron who was visiting her former home city, and was under full headway with the seemingly endless string of questions usual in such a case.
"And your sister's daughter Violet?" she asked.
"Violet is married," the friend replied.
"Indeed! My! How time does fly. Happily married, I trust?"
"Oh, dear, no! My sister always humored her, you know," was the response, "and the poor child was permitted to marry the man she was in love with!"—Sunday Magazine of the Cleveland Leader.

Meaning of Cemetery.
It is not correct to say that "cemetery" means the "city of the dead." The word is from the Greek "Koimeterion," meaning sleeping place, not the place of the dead. There is nothing in the thinking that it was originally intended to convey the idea that the departed were really dead any more than there is in the old Hebrew term for cemetery—"Bethaim"—the house of the living.

An Idle Threat.
Son—No, sir, father, I absolutely refuse to go to work.
Father—Careful, boy; don't you make such idle threats to me.

Beautiful Post Cards Free.
Send 4c stamps for five samples of our very best Gold and Silk Finish Birthday, Flower and Motto Post Cards; beautiful colors and loveliest designs. Art Post Card Club, 72c Jackson st., Topeka, Kan.

IMPOSSIBLE TO FIND ANYTHING better for sore throats, backaches or stitches than **Ferry's Iodine Linctus**. Get the large size, it is the cheapest. At all druggists, 25c, 50c and \$1.00 bottles.
ALLEN'S LUNG BALSAM is the old reliable cough remedy. Found in every drug store in practically every home. For sale by all druggists, 25c, 50c and \$1.00 bottles.
Landlords and tenants can never see through the same spectacles.

Despair and Despondency
No one but a woman can tell the story of the suffering, the despair, and the despondency endured by woman who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued.
Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.
IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.
It allays inflammation, heals ulceration and soothes pain. It tones and builds up the nerves. It fits for wifehood and motherhood. Honest medicine dealers sell it, and have nothing to urge upon you as "just as good."
It is non-secret, non-alcoholic and has a record of forty years of cures. Ask your neighbors. They probably know of some of its many cures.
If you want a book that tells all about woman's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers. In handsome cloth-binding, 31 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

The Upper Neck Bearing and Spring
is a mighty important point of the Separator. Always see how it works. In the National it has only two parts—the bearings proper, and a spring collar, both easily removable. No other separators have as high as seven parts—screws, threads, adjustments, etc., that nobody but a machinist understands. The
National Cream Separator
Lightest Running
Easiest Cleaned
Closest Skimmer
upper bearing gives the bowl all the flexibility needed for its speed of 800 to 1000 revolutions a minute. It never sticks or binds. It is the only upper bearing that can be got tight or loose in a perfect cleaning—and is everlasting in service. In also on your dealer demonstrate the National without charge to you. Illustrated catalog of full particulars free on request.
