So many things are happening of real interest to every citizen that a daily newspaper is now a necessity. The biggest bargain that has come to our notice is the Daily State Journal without Sunday from now until January 1, 1907, for only 50 cents. This is such a small price that it can only be made to introduce the paper into new homes. The publishers claim that this is not a scheme to get you on their books and then keep on sending, but that the paper will be stopped on January 1, 1907. It would be hard to find a better way of investing 50 cents.

The pastors of all the churches will unite with the Presbyterian society in this important service, programs of which will be distributed among our people this week and at the service above mentioned. In the evening regular services will be held in the various churches as usual. In the Presbyterian church, there is promised an unusually interesting service in the evening, especially in the musical line. Crowded space this week precludes more extended comment.  
 Miss Mamie Sheridan Wolford and big company will be the attraction at Pilger's opera house, three nights commencing Thursday night, Oct. 25. This company comes to us with the best of recommendations from the largest towns throughout the section of the country where they have been playing. Miss Wolford is an actress of ability and experience, having played successful stock engagements in the larger cities in the east. She is ably supported by a capable company and can readily be classed as being one of the best that will play Loup City this season. High class specialties will be introduced between all acts, thus eliminating all long waits. The specialties are of a first-class order and are alone a feature. Popular prices will prevail during this engagement. Opening play on Thursday night will be the great New York success, "Was She To Blame?" Seats are now on sale at Conhiser's.

coke or wood; whatever fuel you use costs money. You have to pay so much for it, whether you get all the heat out of it or not. If a stove wastes the fuel and only a part of the heat is extracted, your fuel bills are higher than they should be. It is therefore profitable for you to get a stove that will get all the heat out of the fuel and not waste it. The Genuine

is the stove that will do it, even the smoke which it sends out of the chimney is clear, showing that the gasses and soot have been burned and all the heat extracted. The comfort of a stove that is everything it ought to be, that gives heat, holds the fire, that lasts, always good and efficient is worth almost any cost. The Round Oak is a source of comfort in thousands of homes, it will prove the same in yours. Give us the opportunity to explain to you the reasons why it exceeds all other stoves. There are imitations—be sure and see the name
