Republican Ticket.

For United States Senator—Norris Brown

For Governor—George L. Sheldon.

For Lieutenant Governor—M. R. Hopewell

For Railroad Commissioners—H. J. Winnett
Robert Cowell
A. J. Williams

For Secretary of State—George Junkin

For Auditor—Ed. M. Searle, Jr.

For Superintendent of Public Instruction—Jasper L. McBrien

For Treasurer—Lawson G. Brian

For Attorney General—Wm. T. Thompson

For Land Commissioner—Henry M. Eaton

For Congress, Sixth District—Moses P. Kinkaid

For State Senator—R. M. Thomson

For Representative—Carle T. McKinnie

For County Attorney—Robert P. Starr

REPUBLICAN PLATFORM

Synopsis of the Good Things It Advocates.

Congratulates the country on the good work of Congress in the passage of the following bills:

1. The railroad rate bill.
2. The Panama canal bill.
3. The lock level canal system.
4. The pure food bill.
5. The irrigation bill.
6. The employers' liability bill.
7. The meat inspection bill.
8. The denaturalized alcohol bill.
9. The Oklahoma statehood bill.
10. The nationalization bill.

Calls attention to the unexampled prosperity under republican policies. Declares for the protective tariff, with revision of schedules by the republican party where changed conditions necessitate such action.

Approves work of national and state and state officers in their efforts to curb the trusts. Commends the present state administration for the economical handling of the state's business and the care of the state institutions.

Declares that the railroads should have paid the taxes assessed against them, and approves the efforts of the state officials to collect the money. Demands the enactment of a direct primary law by the next legislature, providing for the nomination of all candidates by direct vote.

Declares for the election of United States senators by direct vote of the people. Pledges legislative nominees to support state convention nominee for United States senator.

Opposes the interference of corporations in political affairs, and demands the passage of an anti-pass law, applying to all persons except bona fide employees, members of their immediate families, and caretakers of livestock.

Declares for the railway commission and for the adoption of the constitutional amendment providing for the same. Demands equitable freight and passenger rates and forbids all discriminations.

Demands the enactment of an employers' liability law. Demands the impartial enforcement of the revenue law, and strict economy in the disbursement of public money.

Declares for a revision of the revenue law so that terminal railroad properties may be assessed for city and village purposes. Recommends passage of a law for inspection of dairy products.

Appeals for a continued approval of republican policies as bringing the greatest benefits to the people. Each Republican should vote Nov. 6th.

Republican candidates are pledged to reduce freight rates. A vote for Sheldon, Nov. 6th, will be a vote to reduce freight rates.

Vote for R. P. Starr for county attorney. He is thoroughly competent. A vote for Carle T. McKinnie for the Legislature, Nov. 6th, will be a vote to reduce freight rates.

Reduction of freight rates will increase the value of crops and of the land on which the crops are raised. A vote for Carle T. McKinnie for the Legislature, Nov. 6th, will be a vote for Norris Brown for United States Senator.

It is more profitable to reduce freight rates by voting the Republican ticket than to spend election day in the corn field. A reduction of six cents per bushel in the freight rate on corn would increase the value of the corn crop more than \$2.00 per acre.

R. M. Thomson, republican candidate for state senator was here yesterday. A vote for him means a vote for Norris Brown for U. S. senator.

Through the neglect of the proper officers, the republican nominees of Loup City township were not certified to the county clerk, hence could not be placed on the ballots. This is sincerely to be regretted and unless republican voters remember to write the names in will result in the election of the populist township ticket. Don't forget this, you republicans of Loup City township.

The democratic candidate for United States senator complains that the voters are not turning out this year as they used to do to hear the issues discussed. This is undoubtedly true so far as "Little Giant" Thompson is concerned, and for several reasons. First of these that he has become an old and tired story to Nebraska voters, and in the next place they are not greatly interested in what the democratic candidates have to say this year.

The republican, democratic and populist state conventions having endorsed the proposed railway commission amendment, every straight ticket of those parties will be counted for the amendment. The prohibition and socialist conventions did not endorse, hence it will be necessary for those who vote those tickets, as well as every voter who "scratches" his party ticket, to mark a cross in the square after the vote, following the amendment proposition.

It is needless to warn the average voter to look out for campaign roobacks just previous to election day. There was a time years gone by, when it was thought to be the proper thing for newspapers to wait till the last issue before election and then spring a whole lot of stuff against the opposition candidates too late to be answered by the other political fellows. Thank goodness, however, that way of doing has been superseded by more decent methods. Now if you see campaign stories circulated at the last moment they are universally conceded to be false and malicious and given circulation at a time when they know there is no time for refutation. This the average voter knows, and the prices which dwell on this method of campaigning receive little credence from the thinking voter. Pay no attention to stories circulated at the last moment, be they from whatever source.

A vote for the fusion candidates for state representative or senator is a direct vote for party policies that caused such widespread ruin and disaster in 1896. Remember those times, don't you? Rains fell and the sun shone and crops flourished in those days, didn't they? There virtually and really was "corn to burn" that fall, now wasn't there? Corn was worth 8c a bushel and thousands of bushels of it was actually burned by the people of the prairie states. There were 3,000,000 idle men in the country. How many is there today? It would take a long time to assemble 3000 who wanted work and are idle. Ruin stalked abroad in the land. Business of all kinds was at a standstill, when McKinley was elected and republican policies were again inaugurated and what is the result? The country never enjoyed more prosperity than it does now. Farmers, laborers, all are prospering, all save the professional democrat politician looking for a job. Let's let well enough alone and let him continue to look. Eh?

The Northwestern has refrained from shying mud castors at opposition candidates in the campaign now about over. We recognize that belonging to this party or to that party does not make such nominees bad men or unworthy support. We recognize only that a vote for nominees of various parties hence the Northwestern has advocated principles rather than men and asked you to vote for republican nominees on these grounds, claiming for our nominees good character, uprightness and competency in addition, nor disclaiming that the opposition nominees have the same good character and other attributes, yet basing our plea for the election of our men as representing our party principles more than for any other reason. Hence the Northwestern rises again to ask your suffrage for the straight republican ticket as not only made up of worthy and competent men, but as representing the principles of the greatest and best party the sun shines upon. Vote the republican ticket straight.

Report of Rockville Schools

for the month ending Oct. 26, 1905.
PRIMARY ROOM.
I, II, III and IV grades.
Number of pupils enrolled, 45.
Average membership, 43.
Average daily attendance, 39.4.

Cases of tardiness, 10.
Pupils neither absent nor tardy—Arthur Jensen, Ir. Plant, Clarence and Roy Sorensen, Beata Hanisch Irma and Evelyn Neilson and Alton Woten. Ida H. Buss, Teacher.

GRAMMAR GRADES.
Total enrollment, 21.
Average membership, 20.
Average daily attendance, 17.9.
Number of tardies, 9.
Neither absent nor tardy during month—Elida Lund, Elvena Sundstrom, Eda Hanisch, Carl Jensen, Harry Fletcher and Ed. McDonald. Marie Coulter, Teacher.

Clear Creek Chat.
Frank Kuhl has sold his farm, the consideration being \$3,000. A nine-pound boy at J. Anderson's. Grandpa Gray is stepping high. Albert Mead is home from York state, where he has been visiting his mother.

The wedding of Pearl Gray, daughter of James Gray, to Mr. Goodwin occurred at Grand Island about the 10th of the month. John Mead has returned from his trip to Grand Junction, and is much pleased with the country. He may sell and move in the spring.

Loup City School Notes.
Olga Cord is visiting in Grand Island. Eva Hile has re-entered school in the first primary. Football is the popular game among our schoolboys at present.

Mrs. Freida Ohlsen visited the High School Thursday afternoon. Johanna de Lyster and Julian Foulouse are new pupils in the first primary. Mrs. W. H. Rettenmayer and little son visited in the first primary room, Tuesday afternoon.

Several times last week the 8th grade was dismissed on account of the radiators not working in that room.

STUDEBAKER

Wagons, Carriages, Harness.

You know that for fifty years most farmers have considered the Studebaker the best farm wagon on earth. You know that the Studebaker factory at South Bend is the largest wagon factory in the world. You know that more Studebaker wagons are sold every year than most manufacturers make in ten years. But did you ever stop to consider why? We couldn't sell the Studebaker in increasing numbers every year for fifty years if it did not "fill the bill"—fill and running over. The truth is the Studebaker is a little the best farm wagon ever built. Because we are the largest manufacturers we get the cream of timber products and the first pick of materials; because we have the largest factory we can afford the best facilities and are able to build a better, stronger, lighter draft farm wagon than any other manufacturer can build. You don't buy a farm wagon very often; why not get the best while you are at it? A Studebaker will last you, perhaps as long as you live. It's nothing unusual for a Studebaker to run from 10 to 20 years without even resetting the tires. Studebaker Bros. Mfg. Co.

E. S. HAYHURST,
Loup City, Neb.

Hard or Soft Coal

coke or wood; whatever fuel you use costs money. You have to pay so much for it, whether you get all the heat out of it or not. If a stove wastes the fuel and only a part of the heat is extracted, your fuel bills are higher than they should be. It is therefore profitable for you to get a stove that will get all the heat out of the fuel and not waste it. The Genuine

Round Oak

is the stove that will do it, ever the smoke which it sends out of the chimney is clear, showing that the gases and soot have been burned and all the heat extracted. The comfort of a stove that is everything it ought to be, that gives heat, holds the fire, that lasts, always good and efficient is worth almost any cost. The Round Oak is a source of comfort in thousands of homes, it will prove the same in yours. Give us the opportunity to explain to you the reasons why it excels all other stoves. There are imitations—be sure and see the name

"Round Oak"
Yours, Respectfully,
P. O. REED

OUR MOTTO: Good Goods At Right Prices

We run our business on the principle that

The Best Wins

We adhere to the policy of always giving the best possible value
For Least Money

There's considerable satisfaction in a store where you know it's impossible for you to make a mistake. You always have the
Privilege of Your Money Back

Our desire is to make Loup City
The Best Possible Market
IN SHERMAN COUNTY
For Poultry, Butter and Eggs
And all kinds of Produce,
C. C. Cooper.

KEYSTONE LUMBER CO.,

The fence posts that we now have on hand would extend over ten miles, if placed end to end. We have the White Cedar in quarters, halves and rounds; the Red Cedar in rounds, and the Black Locust split. We have just what you need to repair that fence.
--YARDS AT--
Loup City, Ashton Rockville and Schaupps

THE REASON

WHY SPREADERS BUNCH ON THE FINISH!

Last week we explained why a tail-gate was necessary to prevent a Manure Spreader from bunching when it first begins to unload. This week we propose to explain why a following tail-gate is not necessary and why it should not be used if you wish to avoid bunching as the unloading is completed.

With an endless conveyor like the Litchfield uses, the load is carried evenly and regularly against the better wheel and instead of throwing over the final finish in a bunch where straw and tough material is being unloaded, it finishes out regularly without this bunching.

If you use a following endgate on a Spreader, this feeds the load up in a solid chunk and the last few inches is very apt to go out in one bunch because there is no more material behind it to hold it down, like there has been during the previous part of the unloading.

With our Spreader, the finishing of the unloading is being accomplished without dragging it over a long distance, by simply throwing the lever back to a high speed just as the unloading is being completed. This puts everything out on the ground uniformly. By not having a following tail-gate, the bunching is avoided.

We believe we are repeating something that many of our customers are fully familiar with, but at the same time there are those who do not know this objectionable feature to the "follower" tail-gate and who do not realize the advantage of an endless conveyor, to prevent this bunching and to accomplish many other desirable results with a return conveyor cannot.

Of course, on those machines that use only a part conveyor which must be run back to its original starting point for each new load, it becomes necessary to use a following tail-gate and this is what causes the additional bunch as the unloading is completed, but with our endless conveyor this objection is avoided.

We sincerely trust that our prospective customers will investigate this question of bunching when it quits, for there is nothing more aggravating than to keep an extra man with a fork following the Spreader to do away with these bunches and get nice, even distribution. Let the Litchfield talk for itself, which it will do if you give it the opportunity.

To be continued next week.
T. M. REED.
