AN IMPORTANT CASE

Patient Cured of Ataxia Gives the Entire Credit to Dr. Williams' Pink Pills.

Mrs. S. C. Wellock, of 114 Cleveland Avenue, Everett, Mass., the wife of an employe in the government works at Chelsea, says:

"I had been troubled with nervousness for ten years and the disease kept growing on me. Then I learned that I was suffering from locomotor ataxia. I had terrible tremblings in my right leg which would get rigid and when this happened in the street I had to stand still until it passed away to keep from falling. My right arm felt as if a thousand needles were pricking it. The sheet touching my knee in bed would nearly cause me to scream out with pain and both knees were so weak I could hardly stand

"I had to use a cane and be helped about by my son. Then the pain began to settle in the calves of my legs and the muscles became numb and quivered constantly. The cords under my knees seemed to be drawn up tight and the terrible shooting pains in my legs would nearly drive me insane. My toes became numb and at times would prickle as if needles were being thrust into them. My eyes became dull and black spots floated before them. My heart was very weak.

"My attention was called to Dr. Williams' Pink Pills and I bought several boxes right away and soon felt relief. I was so pleased that I kept on taking them until they cured me entirely, and I have had no symptoms of the trouble for over a year."
Dr. Williams' Pink Pills are sold by

all druggists or sent, postpaid, on receipt of price, 50 cents per box, six boxes \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y. A booklet, entitled "Nervous Disorders," sent free on request.

HE WANTED LIVE NEWS.

Correspondent Had No Time to Waste with Vice President.

Vice President Fairbanks stopped a newspaper man the other day, and good-naturedly asked explanation of an incident which happened years ago. On that occasion Mr. Fairbanks and the correspondent were chatting pleasantly, when suddenly the latter moved away to meet Senator Chandler of Maine. The vice president said: "I have always had great curiosity to know why you deserted me that day." The newspaper man hesitated for a moment, and then replied: 'To tell you the truth, Mr. Vice President, you are a mighty dry source of news. You may have a nose for news, but I doubt it; at any rate, you never give up any. Now, when a newspaper man is gunning for big, live news he hasn't got time to stop and exchange small talk with a man, even if he be a senator, who would not know the price of news if he saw it." Mr. Fairbanks smiled. "I thank you for your frankmess," he said. "I see I shall have to cultivate a nose for news."

ALMOST A SOLID SORE.

Skin Disease from Birth-Fortune Spent on Her Without Benefit-Cured Her with Cuticura.

"I have a cousin in Rockingham Co. who once had a skin disease from her birth until she was six years of age. Her father had spent a fortune on her to get her cured and none of the treatments did her any good. Old Dr. G- suggested that he try the Cuticura Remedies which he did. When he commenced to use it the child was almost a solid scab. He had used it about two months and the child was well. I was there when they commenced to use your Cuticura Remedies. I stayed that week and then returned home and stayed two weeks and then went back and stayed with them two weeks longer. and when I went home I could hardly believe she was the same child. Her skin was as soft as a baby's without a scar on it. I have not seen her in seventeen years, but I have heard from her and the last time I heard from her she was well. Mrs. W. P. Ingle, Burlington, N. C., June 16, 1905."

Made Much on Small Capital. Twenty-five years ago W. S. Wetham left the town of La Grange, Ga., with the munificent sum of one dollar in his pocket and landed in New York with nothing to his credit but his slothes and his character. The quality of the former does not matter and the quality of the latter has shown itself. He is to-day president of 75 banks, all but four of which are situated in his native state. In return for Georgia's small advance of 100 cents he has pretty well cornered her banking interests and has in keeping a goodly amount of her funds. The four banks of which he is president outside of the state of Georgia are situated in Flor-

Millionaire is Generous. Congressman John E. Andrus, who represents the Yonkers, N. Y., district, for several years has taken delight in playing the role of Santa Claus to the pages, and telephone and telegraph boys of the house. This year, as usual, his gifts to the youngsters consisted of two and five-dollar bills. Col. Andrus is worth \$20,000,000, made out of the manufacture of pepsiu.

Artificial Flowers. There are 430 manufactories of artificial flowers, leaves, plants and fruits in the district of Dresden. The largest manufactories employ from 250 to 1,000 persons, and the total number of persons engaged in the trade is estimated at 10,000, the larger proportion being women and girls, who earn from \$s. to 12s. a week by their work.

BOXES ARE WORTH SAVING.

Many Uses to Which Oid Pasteboards Can Be Put.

The provident woman keeps her pasteboard boxes, if she can find a shelf where they can be stored for fuure use.

So many merchants deliver goods in poxes now, in place of the easily torn wrapping paper, that almost any size s always on hand. If broken, keep the best pieces; their use will be worth while noting. When baking lookies, clean sheets of pasteboard from such boxes are better to cool :he thin hot cakes: when frving potaloes, try putting a round piece of pasteboard in the bottom of a pie plate n the mouth of the oven to absorb any remaining grease as the potatoes are skimmed out and placed on the

Cover some of the small boxes with dainty tinted or flowered paper, forming a hinge on one side, and keep to fill with some of your home-made candies or cakes for an invalid friend.

Cover others in sets of four for your dressing table; they have the merit of costing almost nothing and of being easy to make. Send pictures of any sort placed between two sheets of pasteboard to prevent bending. Save the boxes.

CONCEALING ONION IN SALAD. Indispensable Flavoring Should Never Be Too Pronounced.

Onion is indispensable to a good salad, but its presence should never be suspected. The best way to conceal it is to rub the sides of the dish with a section of an onion, and not to put any onion in the salad at all.

Another way is to use half a teaspoonful of onion juice in the salad dressing. This is for the French dressing, of oil and vinegar, salt and pepper. The juice is obtained by grating the onion. It is well to set aside a small grater for this purpose, as the onion will cling to it. Grate the juice into a saucer and use no more than a half teaspoonful to a small salad.

Chives, chopped very fine and sprinkled in the salad, are an excellent substitute for onions.

USES FOR COLD FISH.

Appetizing Dish That May Be Prepared from Left-Over Materials.

The Sauce.-Boil a pint of milk in a double kettle. Drop in a sprig of parsley. Let boil ten or fifteen minutes, so that the milk will be well flavored. Blend a tablespoonful of flour with a tablespoonful of butter. Add these to the milk. Remove the milk from the stove and stir into it the well-beaten yolks of two eggs. Salt and pepper to taste. The sauce should be of the thickness of cream.

The Fish.-Take two forks and break the fish apart. Spread a layer of fish in a baking or pudding dish and strain the sauce over it. On top sprinkle bread crumbs that have been rolled in melted butter. Put in hot

These directions must be very carefully followed.

How to Make Madras Curry. Made from any scraps of veal or any

cold meat. One large onion, one large apple, one dessertspoonful of prepared cocoanut, one dessertspoonful of chutney. one dessertspoonful of brown sugar, one dessertspoonful of curry powder, one dessertspoonful of curry paste, one tablespoonful of vinegar, one pinch of salt, the juice of half a lemon, threequarters of a pint of new milk.

Fry the onion and apple in a little dripping until brown, then put it into a saucepan, add cocoanut, chutney, curry paste, curry powder, sugar, salt | ports. The Turk's island or rock salt, and stir together, then add lemon juice and vinegar, lastly the milk.

Let it simmer for one and a half hours, stirring often; about half an hour before serving add the cold meat. cut into little blocks, and serve with boiled rice.

How to Remove Paint Spots. Paint may be removed from clothing by the application of equal parts of ammonia and turpentine well shaken together. Apply carefully to the actual paint spot and let it penetrate for five or ten minutes; repeat two or three times and the paint will come off in flakes. In wash fabrics this treatment is very successful, even | a large proportion of this important if the paint has been dried on for a supply. long period.

Old Sheets.

Worn sheets which can no longer be turned and darned will be found useful as a means of covering ironing-boards. old blankets also doing duty in this connection as padding. Long strips of old linen sheets may be set aside as bandages, tightly rolled up. fastened with a safety pin, and enclosed in blue dust-excluding paper until they may be required.

Brushes and Combs. Soap and soda soften the bristles of brush and turn an ivory back yellow; a tablespoonful of ammonia in a quart of warm water is sufficiently cleansing. Combs should not be washed if it can be avoided, as water is apt to split the teeth. They can be kept clean with a small brush which is sold for the purpose, and rubbed with a cloth or towel.

Useful and Economical.

A clothes hanger may be economically made by using a barrel hoop. Cut from a hoop a piece of the desired length, and, after inserting a screweye in the middle of the hanger, tie a string in it for a loop to hang it up by. Such a hanger is easy to make, and answers the purpose very well.

Pretty and Inexpensive Curtains. Pretty and inexpensive curtains may be made from Indian linen. Use a tumbler for a pattern in scalleping the edges, marking around its edges with a pencil. Buttonhole the scallops and work a few rows of polka dots inside the buttonholing.

Shank Bones of Mutton. The shank bones of button, so little valued in general, if well soaked, add to the richness of gravies and soups for sick room broths.

No muss or failures made with PUT-NAM FADELESS DYES; bright, beautiful colors a certainty.

Much Traveled Sailor. Henry Stevens, chief wine steward of a Cunard liner is now on his thousandth trip across the Atlantic. This record, so far as is known has never been surpassed by any other employe of the steamship lines. Stevens is 63 years old and has been in continuous service of the Cunard company for 42 years and six months. Taking 3,000 miles for the trip from Liverpool to New York as a basis for computation, Stevens has traveled 3,000,000 miles. or a distance of 12,000 times around the earth. Had he been traveling through space he would have made

Safe, Sure and Speedy.

six round trips to the moon.

No external remedy ever yet devised has so fully and unquestionably met these three prime conditions as successfully as Allcock's Plasters. They are safe because they contain no deleterious drugs and are manufactured upon scientific principles of medicine. They are sure because nothing goes into them except ingredients which are exactly adapted to the purposes for which a plaster is required. They are speedy in their action because their medicinal qualities go right to their work of relieving pain and restoring the natural and healthy performance of the functions of muscles, nerves and skin.

Allcock's Plasters are the original and genuine porous plasters and like most meritorious articles have been extensively imitated, the efore always make sure and get the genuine.

MANY SOURCES OF SALT.

That from Natural Springs Is Gent ally Most Nearly Pure.

The purity of salt depends upon the source from which it is obtained and the sanitary conditions under which it is prepared for the market. The supply of common salt, the most indispensable of all the seasoning substances both as a relishing condiment and a well-nigh universal food preservative is exhaustless, yet even so there is sait and salt, says the Pictorial Review.

Formerly salt was obtained by evaporating ocean water, a process that left many impurities in the residuum, to say nothing of its exposure to all kinds of dirt in its shipment from seawhich is still largely used in pork packing and in the manufacture of ice creams, comes to the United States in holds of vessels continually subjected to dirt and foul odors. Upon its arrival it is again handled, then packed in coarse burlap bags, permitting dust to sift into the salt. In this condition it reaches the consumer.

Latterly, however, the product of salt springs has largely taken the lead in this country not only for table salt but for meat packing. . The annual production from this source in the United States reaches more than 40,-000,000 bushels, the state of New York in the vicinity of Syracuse furnishing

NEVER TIRES

Of the Food That Restored Her to Health.

"My food was killing me and I didn't know the cause," writes a Colo. young lady. "For two years I was thin and sickly, suffering from indigestion and inflammatory rheumatism.

"I had tried different kinds of diet, plain living, and many of the remedies

recommended, but got no better. "Finally, about five weeks ago, mother suggested that I try Grape-Nuts, and I began at once, eating it with a little cream or milk. A change

for the better began at once. "To-day I am well and am gaining weight and strength all the time. I've gained 10 lbs. in the last five weeks and do not suffer any more from indigestion and the rheumatism is all

"I know it is to Grape-Nuts alone that I owe my restored health. I still eat the food twice a day and never tire of it." Name given by Postum Co., Battle Creek, Mich.

The flavor of Grape-Nuts is peculiar to itself. It is neutral, not too sweet and has an agreeable, healthful qual- Newman. ity that never grows tiresome. One of the sources of rheumatism

is from overloading the system with

acid material, the result of imperfect digestion and assimilation. As soon as improper food is abandoned and Grape-Nuts is taken regularly, digestion is made strong, the organs do their work of building up good red blood cells and of carrying away the excess of disease-making material

from the system. The result is a certain and steady return to normal health and mental activity. "There's a reason." Read the little book "The Road to Wellville" in pkgs.

NOT NARCOTIC.

Is it a Catarrh Remedy, or a Tonic, or is it Both?

What is Pe-ru-na?

Some people call Peruna a great tonic. Others refer to Peruna as a great catarrh

Which of these people are right? Is it more proper to call Peruna a catarrh remedy than to call it a tonic? Our reply is, that Pernna is both a tonic and a catarrh remedy. Indeed, there can

be no effectual catarrh remedy that is not also a tonic. In order to thoroughly relieve any case of catarrh, a remedy must not only have a specific action on the mucous membranes affected by the catarrh, but it must have a general tonic action on the nervous system.

Catarrh, even in persons who are otherwise strong, is a weakened condition of some mucous membrane. There must be something to strengthen the circulation, to give tone to the arteries, and to raise the vital forces.

Perhaps no vegetable remedy in the world has attracted so much attention from medical writers as HYDRASTIS CANADENSIS. The wonderful efficacy of this herb has been recognized many years, and is growing in its hold upon the medical profession. When joined with CUBEBS and COPAIBA a trio of medical agents is formed in Peruna which constitutes a specific remedy for catarrh that in the present state of medical progress cannot be improved upon. This action, reinforced by such renowned tonics as COLLINSONIA CANADENSIS, CORYDALIS FORMOSA and CEDRON SEED, ought to make this compound an ideal remedy for catarrh in all its stages and locations

in the body. From a theoretical standpoint, therefore, Peruna is beyond criticism. The use of Peruna, confirms this opinion. Numberless testimonials from every quarter of the earth furnish ample evidence that this judgment is not over enthusiastic. When practical experience confirms a well-grounded theory the result is a truth that cannot be shaken.

Knows Whom He Can Trust. Police Commissioner Bingham has learned one important fact that will be

of aid to him in his official career. When he desires to get the exact facts about some large question that is to the front in New York city he calls in the newspaper reporters located at police headquarters and has a heartto-heart talk. As one of them says: "He gets it straight, and so straight that not all the men of the force can fool him on that one point."
