### Bad Rockville Fire

Sunday night last, or rather about 3 o'clock Monday morning of this week, fire destroyed the State Bank building at Rockville, in which was situated the bank and the drug store of Vic Rasmussen, the fire totally destroying the building and all its contents. At first the report was that the origin of the fire might prove to be incendiary and the result of robbery, but when the fire cooled sufficiently to investigate, the safe was found inviolate and all contents safe, exploding the theory of bank robbery. The origin, then, was supposed to be caused by the carelessness of parties in the drug store smoking the evening paper and probably caused by a cigar thrown to one side. Whatever the cause, the destruction was made complete, there being no fire protection in the village, and the fierce wind blowing making all efforts of the bucket brigade futile. The loss to the drug store is said to be about \$1200, partially covered by insurance. The bank loss or insurance is not known to us. The bank is owned by the Jensens of Boelus, we understand Mr. Dwehus of the firm of Nielson & Dwehus, general merchants of Rockville, being the cashier.

### New Cement Block Co.

The Northwestern is glad to note any and all improvements in Loup City and Sherman county, and to this end Tuesday afternoon we took a look through the Loup City Cement Block Co.'s big building and watched them turning out the finished cement blocks. The factory is a cement block building, 40x60 feet, one story, and is one of the most noticeable monuments to Loup City's business enterprise. The company is composed of A. O. Zimmerman and Guy Stout, and they are well equipped with machinery and material to turn out from 250 to 500 blocks every ten hours, having a six horse power gasoline engine which runs their mixer, a machine to mix and proportion the sand and cement to make each block a counter part of the other, and all of the very best composition. They have three machines for making cement blocks, one for chimney work alone, and two others which turn out blocks of various thickness and size for foundations, walls and all parts of buildings in which cement work forms a part. They purchase cement by the car load, making cement blocks in the shortest possible time and of the very best quality and evenness in composition. They are also preparing to erect another block house at the rear of their factory for the grinding alfalfa and corn in the front of the building. A. L. Zimmerman has his real estate office and will attend more or less to the office work, thereby relieving Mr. Stout, who is the superintendent of the mechanical end of the business. The intention of practicing Veterinary Medicine, Surgery and Dentistry, in this new enterprise in our city, and we believe a look through the factory when the boys are turning out work, would be very interesting as well as instructive, and prove a surprise to many, as it was to the reporter, to get an insight into the way it is done and the manner, method and mode of turning out cement blocks as done by this company.

### Fees Paid in Advance

Owing to the tardiness of those having sheriff's costs in civil suits in paying same when they should, causing me to advance various amounts aggregating between one and two hundred dollars, I will hereafter insist on such costs in all civil suits being paid in advance, as the law prescribes. Those interested will please bear this in mind.
