#### SAVED OLD LADY'S HAIR

"My mother used to have a very bad humor on her head which the doctors called an eczetsa, and for it I had two different doctors. Her head was very sore and her hair nearly all fell out in spite of what they both did. One day her place came in and they were speaking of how her hair was falling out and the doctors did it no good. She says, 'Acut, why don't you try Cuticura Scop and Cuticura Ointment?' Mother did and they helped ber. In six months' time the itching, burning and scaling of her head was over and her hair began growing. Today she feels much in debt to Cuticuta Stop and Ointment for the fine beaf of heir she has for an old lady of seventy-four.

My own case was an eczema in my feet. As soon as the cold weather came my feet would itch and burn and then they would crack open and bleed. Then I thought I would fiee to my mother's friends, Cuticura Scap and five winters, and now my feet are as smooth as any one's. Ellsworth Dunbam, Hiram, Me., Sept. 30, 1909."

# THE CHAFING DISH

SOME APPETIZING RECIPES THE GIRL CAN MASTER.

Make Excellent Lessons in Cooking for the Beginner-A Pretty Way of Entertaining One's Friends.

There comes a time in every girl's iffe when she wants to know how to cook, and there is no pleasanter way to begin than by learning to master the chafing dish.

Unless a dish can be prepared in a iew minutes, preparations for the cooking should be done in the kitchen, for, of course, like playing the plano. chafing-dish accomplishments are for company. The utensil is put on the luncheon or supper table, and the cook say some of them used to board here little condiments and other fixings needed. When the young amateur has mastered a recipe or two to its final perfection a little chafing dish spree is a very pretty way of entertaining one's friends. Here are some simple recipes for very sophisticated dishes:

Mushrooms Sauted.-As getting mushrooms ready for cooking is a messy business, they should positively be prepared away from the table. Break the umbrellas from the stems and cut off the darkened lower ends of these. Then peel the umbrellas, beginning at the outside edges and pulling off the skin lightly and delicately. If the mushrooms are wet first the skin will stick, so the peeling must be done when they are dry. Drop them in cold salted water for ten mintues. then drain, rinse thoroughly, drain again and place in a saucepan with butter-a large tablespoonful to half a pound of mushrooms. Then cover the dish tightly, start the blaze of the lamp beneath, and cook without uncovering--if possible--for half an hour or more. Not one drop of fluid Cuticura Ointment. I did for four or other than the melting butter is needed, for mushrooms draw considerable water with cooking. While this de licious dish, which goes superbly with chops or buttered toast, is being cooked, some other course, not pre-"If we didn't have the children," pared at the table, may be dispatched. she lifterly declared, "I'd get a di- Look for fresh mushrooms. If stale, they are tough and tasteless. Salt

Caives Brains and Tomato Sauce. -This dainty is as near to an approach in taste to sweetbreads as could be had, and the brains cost about a fourth of the sum of the more fashionable sweetbreads.

Get a pair of fresh brains and soak them in cold salt water for two hours. Parboll, and then denude them of all skin and veining, and divide them in portions about the size of large oysters. Have this plate of cold stuff brought to the table, where the tomato sauce would be made.

Take for this three large fresh tomatoes, scalded and skinned, chopped and seasoned with cayenne, salt, a shaving of garlic and a spoonful of butter, or two of olive oil. Cook the tomatoes for fifteen or twenty minutes. chopping them all the time with the cooking spoon, and when the sauce is done, drop in the cold brains, sprinkled with flour, and cook some minutes longer. The mess goes well with a serving of green peppers, stuffed with making. In this respect, however, stale white bread and fried in olive the significant week in June at the

Asparagus Omelet.-Have a plate on the table filled with hot boiled asparagus tips-about two inches of the pour in the asparagus tips, cover them with the egg. flap over for a minute's butter the top with melted butter. year. Only use salt and black pepper with this.

To Clean Willow.

Do not use warm water or a strong Dust the chair and scrub it lightly with tepld water containing a few drops of kerosene to remove hand marks and grease. Naphtha soap will not destroy the varnish. Wipe the suds from the willow or wicker chair and dry in the sun. A solution of oxalic acid and water can be used on unvarnished reed or willow furniture and bleaching properties of the acid will make the articles like new

Some years ago a high-grade soap maker showed me a vial of corn oil, which he was considering as a mate-CAFE PRICES REASONABLE rial for use in making soap, so at that time, at least, there must have been a very reasonably low price for corn oils, and they ought to be especially good, in theory, for shortening, frying or other uses in cookery. Who has used corn oil or can give any real practical recipes for its use in cooking?

Strawberry Cheese. Line little patty pans with puff paste and fill with uncooked rice; bake in a bot oven; cook in a double boiler until the mixture thickens the yolks of three eggs, the grated rind and juice of half a lemon, one cupful of butter; WELDING (AUTO GENOUS) By remove from the fire, and when partially cooled stir in one cupful of crushed strawberries; when cool, fill into the pastry shells and cover with a soft boiled icing. These are deliclous, but must be eaten fresh.

Herring Cream.

Lightly cook a kippered-herring, remove all skin and bone, and pound the flesh in a mortar with an ounce of butter, a dessertspoonful of cream, a few drops of anchovy sauce, and a little pepper; mix all thoroughly, and pound till smooth and creamy, then put into a pot and run butter over the

Carrot Fritters. Boil one good carrot until very tender; press through a sieve and season to taste with butter, salt and pepper. Shape the carrots in small, flat cakes, and saute in butter.

Baked Milk.

Put the milk in a jar, covering the opening with white paper and bake in modern oven until thick as cream. May be taken by the most delicate

Yet for all this sameness, in some respects there is enough of novelty in the climax at West Point to draw visitors by the thousand from all sections of the country. Nor are the spectators by any means limited to the relatives and close alkali soap for cleaning willow chairs. friends of the young men who are to receive, along with their diplomas, commissions as second lieutenants in the regular army. That would be understandable enough-such a gathering of interested kith and kin. But aside from the onlookers whose interest is stimulated by blood ties, there is a vast assemblage, the members of which feel no interest in either graduates or undergraduates at the Point, but who have been drawn thether by the prospect of a "show" literally worthy of many miles of travel to witness. The picturesque events, ranging in variety all the

was ready for them.

Magazine, part of which is quoted as follows:

Ray Stannard Baker writes a most interesting

"Many there are who have attempted to ac-

way from "guard mount" to rough riding, are the magnets which draw to West Point the vast throng of sightseers and pleasure seekers. Incidentally, it may be noted that it is an excellent opportunity to see celebrities. The president of the United States, the secretary of war, or some other prominent official, presents the diplomas to the graduates, and high officials of the army are always present in their bravest show of gold braid.

The Military academy is probably unique among all educational institutions in that the term "commencement week" has a certain appropriate significance for the whole student body, rather than merely for the graduating class. At West Point, commencement week means the commencement of a new life for the lads, who after four years of book learning and practical training, are to go forth to assume the responsibilities of lieutenants of infantry, cavalry or artillery. But for the quota of cadets left behind to finish their uncompleted courses of instruction this momentous week in June likewise means the commencement of a new era, a change in the existing order of things that is about as radical as could be imag-

This universal significance of the commence ment season is due to the fact that the majority of the West Point cadets are not granted a summer vacation after the fashion which obtains in the case of the pupils at most public and private

army, although only a surgeon, he was assigned

to lead a detachment of soldiers in pursuit of

Geronimo's Apache warriors, far down among the

mountains and cactus deserts of Old Mexico. He

performed this difficult task with such courage

and efficiency that he was especially commended

by his commanding general and rewarded by con-

gress with one of its rare medals. Theodore

During the golden days of June, which wind up the year at the military academy, discipline is relaxed, and all the cadets from upper-classmen to "plebes" are at liberty to enjoy the round of pleasure which is provided. To be sure there is plenty of work mixed in with the play, for this is the time of year that the official board of visitors makes its annual inspection, and the West Point battalion is expected to display its best points. Between times, however, there are opportunities for strolls on the far-famed "Flirtation Walk," and incidentally it may be remarked, that it is the one season of the year when there is a fair visitor for every cadet. Ordinarily the proportion is one belle to three, or even to six or seven prospective officers. The evenings are given over to hops, culminating in the appropriately named "Farewell Ball,"

#### Washington." INDIAN CREMATION MUST STOP.

Some time ago the agent and other officers in with the visitor on his conduct, but charge of the Yuma reservation asked the braves the only reply he got was, "If you to refrain from burning the houses of the dead. would cut the grass, one might be They showed how easy it would be for a fire to able to see you." sweep over a part of the reservation and put government property in jeopardy.

For a time the Indians observed the request, the Los Angeles Times says, but a few days ago celebrated the departure of one of their number in the most approved redskin style. The personal effects of the deceased were burned and his house was set on fire. He was supposed to have arrived in the happy hunting ground, ready for an enthusiastic reception.

But, inasmuch as the personal property of a deceased person belongs to the heirs by the California law, there is no doubt that zealous friends overstepped the law when they cremated everything the dead Indian had ever owned.

The practice of the Yuma Indians in burning their dead, together with the possessions left by Virgil. the departed braves, has aroused the federal authorities to action. While there wouldn't be in- time to argue with the iceman, as he's terference with cremation-a religious rite-the bound to have his own weigh. officers deciare that government property must not be endangered.
