DO INCHES MAKE THE MAN! Until the time of the war between Russia and Japan the short man was itged to defend the prowess of his kind by citing Napoleon as an example of what short persons could do. Balasc, the great French novelist, whose height was a trifle more than fre feet, often balf whimsically, often seriously, endeavored to show a consection between short stature and excellence. It was also a source of consolution to him and to other men who were not in the tall class, to read in history that the Roman conquerers were short. But after the Russo-Japanese war it became evident to all that statute had nothing to do with the case, unless, perhaps, the victory of the little Jap proved that the short man was the superior of the tall. But now come the municipal authorities in our cities, who say that a tall policemon is better than a short and that a tall fireman is the superior of a short fireman, says Boston Globe. Fire feet 7% inches is the limit of shortness to be tolerated say some, while others lower the standard a quarter of an inch. Others would lower it half an inch more. Superstitions die hard. We are still children, and, although far from the age of giants, we cling to the notion that inches make the man.

Great Britain has just launched one of the higgest of the dreadnought battleships which the government is steadily adding to the navy. And that American ideas are good for something in this connection is shown by the information which has leaked out, notwithstanding the careful way in which naval secrets are guarded, that the guns on the new vessel will be arranged much like those on United States battleships of the latest design, so that they can be fired one above another and concentrate tremendous striking power at a given point. Builders of our warships are giving valuable points to all the world.

It will be a good day in this city when every boy who goes to the high school can multiply and divide with unfailing accuracy, when he knows the rule of three and is up on fractions, says Philadelphia Inquirer. If to addition to that he can write legibly, read distinctly and spell correctly be will have a better equipment than has been common of late. In trying to teach children too much we have not trained them to definite ways of thinking. Yet to think clearly about anything is the great prerequisite of education.

ing bobble skirts begin to come in. Of course such accidents are inevitable. A woman who deliberately binds her limbs before submitting herself to the dangers of the highway is doubly handicapped, for even unhampered obysically, she likely would lack the intelligence to dodge a street car.

A man in New York was sent to prison for four years for stealing a right. A man who makes so little of his opportunities in the face of such shining examples ought to be shut off from the rest of society.

A bank in Spokane is issuing antiseptic money. Still, while sanitary banknotes may fit in better than the others with the progressive ideas of the age, as far as the others are concerned, with all their germs, we love them still.

"Did Washington swear?" asked a periodical. We don't know, but some enlightenment could be furnished if we knew whether Martha's dresses were buttoned down the back.

Some genius has invented a machine for testing operatic voices. It will not help much unless it makes it consible for the operator to go away and leave it after he sets it going.

A New York street car jumped the track and ran into a saloon. An amaging instance of the power of suggestion; the car driver was doubtless very thirsty.

Considered as an aerial racer the carrier pigeon may not be quite up to date, but its motor seldom if ever gets out of erder.

A man has been found starving himself because he feared the end of the world was at hand. There must be such a thing as the rash bravery of cowardice.

A writer sagely remarks that there is no excuse for drowning. Unfortunately, spologies are never offered.

if's a wise man who can guess two times out of three which way the cat

is going to jump. The man in New York who killed

himself because he thought himself teo small to live was probably a child to brain as well as in stature.

President Kinsella of the Springfield ing rules, which all favor the batsteam, who sold Meloan to Chicago, is man, been in use, Pete would have becoming a successful scout. He has Outfielder Shaller to Detroit, Pitcher Altizer is to take the most daring Willis to the St. Louis Browns, Catch. ber, is the thing to do the work.

#### the slightest idea of earning my livelihood playing ball or of taking it up as a profession. The truth is that I was inclined to go into the priesthood when I was a small boy, and my other ambition was to be a locomotive en-

From the time I first can remember I loved baseball and played it, always as a pitcher, if the other fellows would let me, and when they wouldn't let me pitch I played somewhere else. It was at the Brothers' school at Dayton, O., that I first belonged to an organized team. I was backstop for the catcher, and very proud to chase balls that went past him. I began to study pitching then, for we had a good pitcher on the school team, and I watched to see what he did to puzzle batters. One of the priests had been a pitcher at school, and he taught me some more. I remember when he told me that keeping cool and never losing the tem-

HIS CAREER WAS ACCIDENTAL

Harry McIntire, One of the Winning Pitchers on the Chicago Team,

Tells of Start.

BY HARRY MCINTIRE.

(Copyright, 1916, by Joseph B. Bowles.) My baseball career was rather an

accident from the outset. I never had

pitch, and after a time we tackled the school team and beat them so I was put on the school team. I began to think I knew it all, and it took several beatings to show me how little I knew. When I left school I was looking for a job and a friend of mine, who was playing on the Kankakee (Ill.) Y. M. C. A. club asked me to come over there and pitch for that team. I looked on it just as a summer vacation, but made good there and found myself getting along so well I commenced to study pitching seriously as my profession. It was hard work with many discouragements, but I stuck to it. Every time a batter made a hit off me I studied to find why he had hit

Harry McIntire.

t and what I ought to have done to keep him from hitting hard. The next; season I arrived at Danville, Ill., and played all summer. There was wise old catcher there who taught me a lot, and from there I took a couple of big jumps into the big league and have stuck. I think the great reason why I have managed to stick is that I never have stopped studying the game and its players. If a man gets to know it all he will be in the bush leagues soon.

## **BROTHERHOOD HAD FAST BALL**

In 1890 Baseball Players Used Sphere That Burned Infielders When Hit-Some Batting.

Speaking of the rubber-cored ball and the cork-cored ball and likewise the cry for more batting, how many of the fans remember the time when a ball was used that did result in extra slugging?

In 1890, when the Brotherhood was hatched and tried, there was the same yell for extra batting that you hear today. The Brotherhood decided to gratify the wish, and, first of all, moved the pitcher a foot back.

Then they had a special ball built, with twice as much rubber as was contained in the Reach-Spalding globule. The result was batting till you couldn't rest, but, unfortunately. was also bad fielding.

While the new ball went so fast and so burningly that the infielders had to duck or die, it also took weird to be given to the player having the and inexplicable leaps, and when sailhighest batting average at the end of ing for the outfield, would actually turn and wheel away as if blown by

It is the plain truth, and no exaggeration, absurd as it may seem. many a time a ball would start for draw. St. Louis Nationals did not se a few days ago. Any bush pitcher that center, and, with the center fielder cure a player. A little less than \$125,- can make the coming champions go all set, would swing over and take 000 was deposited with Secretary 11 innings to win a 2 to 1 contest the right or left fielder off his guard.

led with .391. Had the present scorbeen tabbed .450, maybe more. Any time they want more batting, a rubber-centered ball, with additional rub-Browning would have hit about .600 that season with the pitcher as far lively ball.
