Captain Mackney, One of the Veterans on the University of Missouri Team.

**BADGER'S "COME BACK" STAR SEEK WELL BALANCED TEAM**

"Keeckie" Moll, After Rest of Year, Resumes Position at Quarterback—Better Than Ever.

One of the sensations at Madison this season was the return to the game of "Keeckie" Moll at quarterback. The little fellow's rest of a year seems to have been a great benefit to him. He has come back with a determination and willingness to work that has indicated a conception of that

"Keeckie" Moll.

about which so much is heard—"the true Wisconsin spirit." He has lost some of his old-time accuracy in passing and booting while his endurance is better than it has been since the days of his freshman year.

**DEED FOR ANDERSON TROPHY**

Bowl is Formally Presented to American Automobile Association for Use in Glidden Tour.

A deed of gift formally presenting the Anderson trophy bowl to the American Automobile association to be used as a prize in the Glidden tour, was executed at Anderson, S. C., the other day, and the bowl was forwarded to Robert H. Cooper, president of the association.

It is provided in the deed of gift that the winner of the trophy, which is to be awarded for individual excellence, shall furnish a bond of \$2,000 to guarantee the care of the trophy during the time it may be in his possession, and until it may be awarded after the tour of the following year. The trophy bowl was designed by a Philadelphia jeweler, and cost \$1,000.

Fleider Jones is Rich. Fleider Jones, former manager of the Chicago White Sox, today is a rich man, and it all came about through his ability to seize an opportunity and invest his money at the right time. Having a chance to purchase 240 acres of land in Oregon last year, Jones made the deal at a little better than \$15 per acre, the same being bought as a straight timber deal for investment. Today Jones wouldn't sell his property for many times this amount, as it has been discovered that on it are some of the best-known coal deposits in this section of the

**USE OF TRICK PLAYS**

Fakes Gain Most After the First Kickoff.

Teams Are Not Alert Then, Says Eckersall—Football Coaches and Players Differ on Time to Spring Deceivers.

Football players and coaches have different ideas as to the best time in contests to spring trick plays or any other fakes which might catch opposing teams off guard. Many believe the substitution of fast and elusive players in the latter stages of the games is the best time to spring a deceptive play, while others hold a directly contrary opinion, writes Walter H. Eckersall in Chicago Tribune. In football it is a well known fact that at the beginning of contests the players are not thoroughly alert to the situation, and those who have played the game know the men do not enter the game with the proper spirit until they have been tackled a few times or hit opponents hard in the interference. The minds of the players are not sharpened to the situation and they do not gain that alertness or aggressiveness which they acquire as the games progress.

In 1906, the first year of the forward pass, the old "shootstring" trick invariably was attempted on the play following a kickoff. The defensive team had not yet become accustomed to the play, and as a result it often was good for substantial gains. As the 1906 season progressed, one of the fundamental principles of the ends was to scan the extremities of the field to see that no offensive player had been placed there to receive a forward pass. Although coached on this point, many of the ends, carried away with the excitement of the contest, failed to carry out the coaches' instructions. A number of teams, especially high and preparatory elevens, attempt the play this year, but as there is no deception to the formation it generally fails against a well coached team.

Coaches of the big elevens reprimand a player severely if he is tricked on a play of this kind, although the play generally is attempted some time during an important contest. There is such a great chance of its ultimate success that the majority of the mentors are willing to take chances with the play, but so many formations can be evolved from sending a man to one side of the field or the other that it is foolish to take a chance with a forward pass unless the offensive player near the side line is not covered by a member of the defensive eleven.

The moment a player on the offensive team is sent wide on either extremity of the line the defense is weakened to the extent that it must send a man to watch the shifted player. Under these conditions formations can be evolved of deceptive character which can be sent on the opposite side from the shifted player, although the defensive eleven nine times out of ten will expect the play on the strong side.

Invariably on the down following the initial kickoff in a game the players stand erect and attempt to discern the weaknesses of their opponents. It is several seconds before the teams clash in the first scrimmage. The players are not warmed up to the contest and as a result they overlook many things which they spot in an instant as the contest progresses.

As a result the best and most opportune time to spring a trick or deceptive play is on the play following the first kickoff. If formations are evolved in which the players assume the necessary positions to make the play a success and if the ball is snapped before the defensive team has a chance to size up the situation and before minds are sharpened to the point where they will be on the lookout for such plays, such trick plays are almost certain to be successful.

**HAROLD KING,**

Right Half Back on Indiana Varsity Team.

Penn Golf Title to Duncan. The open golf championship of western Pennsylvania goes across the Atlantic this year. It was captured by George Duncan of the Hanger Hill Golf club, London, who, playing in the tournament held under the auspices of the Western Pennsylvania Golf association at the Allegheny Country club, turned in a score of 146 for the thirty-six holes. Jack Hutchinson of the Allegheny Country club and Dave Robertson of the Oakmont Country club tied for second honors with 153. "Chick" Evans of Chicago, holder of the French amateur championship, negotiated the thirty-six holes in 159.

**CAREFUL MANAGEMENT NEEDED IN BREEDING COWS FOR DAIRY**

Animals That Produce Pound of Butter and Cheese the Cheapest Are the Ones to Keep—One Reason Why So Many Herds Do Not Return Profit From Their Food and Cost of Attendance.

A Prize Winning Jersey Heifer.

(By W. M. KELLY.) There is no phase of the dairy business that needs more study or more careful management than does the breeding of the cow.

Upon the cow depends success or failure and we must, after selecting her, look to her care and her feed, and to the handling of her products.

The fact that dairymen have devoted more attention to other phases of their dairying than to the breeding and development of the cow is one of the reasons why so many of our dairy herds are not capable of returning a profit from their food and cost of attendance.

We are often asked which is the best breed of dairy cattle to select for the dairy? To such men I would say that there is no best breed. Some think because they have Jerseys they are on the royal road to success. Others think that the Holsteins will bring prosperity to the farm.

This is a sad mistake, for scrubs are very common among the pure-breeds, and a pure-bred scrub is without doubt the worst scrub of all. Select cows having individual excellence as determined by the Babcock test and scales in starting a herd. Better and more uniform results of breeding may be secured if the animals are of one type of breed and great care should be exercised in getting individuals which possess to a certainty the characteristics we desire to perpetuate in the herd.

What we dairymen want is a herd of cows that will give a profit at the pail, whether pure-breeds or grades. The ones that will produce a pound of butter or cheese the cheapest are the ones that we want to keep in our herds.

We have a number of improved breeds of dairy cows that represent the skill of years in their perfection, but in adopting any of these breeds we should consider the conditions and environments under which they have been developed in their original homes and then plan to make our care and feed and general management conform to the conditions under which the breed had been developed.

If a man has Jerseys, give them Isle of Jersey care and feed for they cannot succeed on scrub fare and fodder. They were not intended for that purpose.

The Jersey cow is a delicate, nervous machine and requires warmth, kindness and liberal feeding to make her profitable.

If Holsteins are selected do not expect them to thrive on closely cropped, scanty pastures where they are compelled to rustle all day to gather sufficient food. Give them the care they were developed under, large amounts of succulent forage and well cured hay, warm stables and kind treatment.

You may get pure-breeds if you can afford them, but all farmers are not able to buy pure-breeds. However, always use a pure-bred sire.

The breeding bull always represents half the value of the breeding power of the herd if it is desired to grow calves for the dairy.

Select them from some of the well-known families of the breed and be sure that he possesses prepotency which gives promise of being a good calf-getter. A bull of this kind will give you excellent results in improving the herd. Some of the best herds in the country are high grades that have resulted from the continued use of good sires.

In order to be successful as breeders we must learn some of the lessons associated with our stock; have an ideal type in our minds and always in

**MULCHING THE STRAWBERRY BED**  
Where Straw Is Not Readily Obtainable It Is Difficult to Get a Covering of Right Thickness. (By H. F. GRINSTEAD, Missouri.) Where straw is readily obtainable it is difficult to spread properly over the strawberry plants so that it will be thick enough yet not smother the plants or require raking off in the spring. A mulch of oats or sorghum is the best thing I know of that may be sown between the rows. Oats alone has been tried, but from the fact that we often have a very dry fall it has not always made a satisfactory growth before frost. Sorghum or kafir corn are dry weather plants, and if there is sufficient moisture in the soil to germinate the seed they will grow till frost. A good plan is to sow oats and sorghum or oats and kafir corn is mix-

**CHURCH BUILT OF FOSSILS**

Building Constructed of Blocks Hewed From the Petrified Depths of a Nearby Swamp.

Mumford, N. Y.—In Mumford is a church building constructed of fossils. At first glance the walls appear to be constructed of rough sandstone smeared with an uneven coating of gritty, coarse, plaster; but a closer view shows delicate traceries of leaves, lace-work of interwoven twigs, bits of broken branches, fragments of mossy bark, splinters of wood, all preserved against the wasting of time

Mumford Church.

and decay by being turned into the hardest of flinty limestone. Every block of stone in the four walls is a closely cemented mass of dainty fossils, literally packed and interwoven. There is no basic rock at all, but only fossil fibers, which give the rock cohesion and strength. Nevertheless, the stones are light in weight compared with granite and sandstone.

The blocks were hewed from the petrified depths of a nearby cedar swamp. Mumford is situated in the heart of the great area of rock, once the bed of an ocean, known to geologists as the Niagara limestone. It crops out either in the form of the soft, calcareous stone, or the hard and more serviceable blue limestone. The clear, cold water which gushes from innumerable springs or flows in frequent brooks throughout the Mumford country is alkaline from the lime held in solution.

**GERMANY'S GREAT MONUMENT**  
Colossal Memorial Nearing Completion Is Built to Commemorate the Battle of Leipzig.

Leipzig, Germany.—Perhaps the most colossal monument in all Germany is nearing completion here. Leipzig was the scene of three noteworthy battles—two in the Thirty Years' War and one in the Napoleonic wars. The monument is to commemorate the battles between the French under Napoleon and an allied army of Austrians, Russians, Prussians and Swedes. The monument will be dedicated in October, 1913, on the battle's centenary.

In the accompanying illustration the monument is shown as it will appear when completed. Some of the gigantic carvings—one of them forty feet high—are already in place. Even in-

Leipzig Monument.

complete, the monument thrills you with its colossal dimensions. It is three hundred feet in height, but it is built on such a mountainous scale that its tremendous height is minimized. It faces the city fronting a concrete lake several acres in extent. A broad boulevard will lead from it straight into Leipzig.

**THE DIMENSIONS OF HEAVEN**

Preacher Figures It to Be the Equal of a 792,000 Story Building.

Louisville, Ky.—Heaven's exact dimensions were figured out in the sermon of the Rev. M. E. Dodd, pastor of a Louisville church, preached to his congregation recently. In the course of his sermon the twenty-first chapter, sixteenth verse, nervous Christians have read where the dimensions of heaven are only 1,600 cubic miles. Immediately they jump at the conclusion that even this space will not accommodate the vast multitude of which the Bible speaks. "However, calculation will show that this space will accommodate a building 792,000 stories high, and it is easy to demonstrate that such a building would accommodate an innumerable multitude."

The Test of a Man. Giving evidence at an inquest at Yarmouth, a market stall carrier declared he could take ten pints of beer before breakfast and get home all right. The coroner told him he ought to be ashamed to say so and the witness replied that a man who could not take four or five pints was no man at all.—London Evening Standard.

Iron Pills. Have two or three galvanized iron pails in which to carry fertilizers for distribution. Then if left in the field or otherwise exposed, they won't fall to pieces, as wooden ones will.

Marketing Lambs. When marketing lambs leave the culls on the farm.

Eating Acid Fruits. Acid fruits should not be eaten with food rich in starch, such as bread and milk, cereals and meat. They combine well, however, with vegetables and other fruits.

**STRAINED.**

Teacher of Dramatic Art—The very first thing is to give the scholar a graceful bearing—to teach him how to walk. Student—Well, er—er—I don't expect to join that kind of a company.

**BABY'S TERRIBLE SUFFERING**

"When my baby was six months old, his body was completely covered with large sores that seemed to itch and burn, and cause terrible suffering. The eruption began in pimples which would open and run, making large sores. His hair came out and finger nails fell off, and the sores were over the entire body, causing little or no sleep for baby or myself. Great scars would come off when I removed his shirt.

"We tried a great many remedies, but nothing would help him, till a friend induced me to try the Cuticura Soap and Ointment. I used the Cuticura Soap and Ointment but a short time before I could see that he was improving, and in six weeks' time he was entirely cured. He had suffered about six weeks before we tried the Cuticura Soap and Ointment, although we had tried several other things, and doctors, too. I think the Cuticura Remedies will do all that is claimed for them, and a great deal more." (Signed) Mrs. Noble Tubman, Dodson, Mont., Jan. 28, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 18, K. Boston.

Obeyed Orders. Percy—What are you doing about your doctor's advice to take physical exercise, dear boy? Cholly—I'm carrying a heavier walking stick, and I wear a larger button-hole bouquet.

Important to Mothers Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Fletchur* in Use For Over 30 Years. Children Cry for Fletchur's Castoria.

Located. Clerk—Where shall I file the letters in this suit? Lawyer—Under the head of promissory notes.

Some people never go ahead because they wait too long to make sure they are right.

Lewis' Single Binder gives a man what he wants, a rich, mellow-tasting cigar.

We are more apt to regret the things we haven't done than those we have.

**THE KEYSTONE TO HEALTH IS HOSTETTER'S STOMACH BITTERS**  
Stomach Out of Order? Bowels Weak? TAKE A COURSE OF THE BITTERS. At Once It Will Do You Good.

**Splendid Crops in Saskatchewan (Western Canada)**  
800 Bushels from 20 acres  
FARMERS IN WESTERN CANADA FREE  
LARGE PROFITS  
This excellent showing causes prices to advance. Good yields should double in two years' time. Grain growing in mixed farming, cattle raising and dairying are all profitable. Free Homesteads of 160 acres are to be had in the very best districts. 160 acre pre-emption at \$5.00 per acre with in certain areas. Schools and churches in every settlement. Climate superb. Irrigation, soil the richest; wood, water and buildings material plentiful. For particulars as to location, low settlers' railway rates and descriptive illustrated pamphlet, "Last Best West," and other information, apply to the Imperial Canadian Government Agent, W. V. BENNETT, Dept. 4, Box 816, Regina, Neb. Please write to the agent nearest you.
