CANADA'S CENSUS

A THIRTY-TWO PER CENT IN CREASE IN THE PAST TEN YEARS.

That Canada has come rapidly to the front in the past ten years is amply shown in the results of the census recently made public. The population of the Dominion is/now placed at 7,081,869, which with outlying points to be heard from, may bring it up to 7% millions as compared with 5,371,-215 in 1991. Though these figures are large, they do not present a total as large as was expected but they do show a greater increase of percentage in population for the decade than any similar increase in the United States, The highest percentage ever reached by the Republic was 24%; the percentage of increase in Canada for the decade is 22%. Thus it will be seen that the provinces west of the lakes, with the great broad fertile acres rendy for the sowing and immediate reaping of grain and the Valleys of British Columbia capable of producing fruit with which to supply its neighboring provinces east of the mountains, have attracted numbers, which has exceeded the most optimistic of the expectations of ten years ago.

Upon the prairies of the ten years ago there was but a toure scattering of people; but today, no matter in which way you go, take any direction, and you find homes and farms and good ones too, occupied by the very best class of people in good sized settlements with plenty of room for five or six times as many more. The pop-919, as compared with 73,022 in 1901; 691 compares well with its 255,211 in lumbia-362,768 as agains: 178,657 in 1981; but in a territory as large as of 928,000. this a population of 1.543,999 is little more than discernible in point of numbers. The work through it has been with 125,000; Vancouver with upwards of 100,000; Calgary with 43,000; Edmouton, Regina, Saskatoon; Leth-Medicine Hat, Moosejaw, eplendid cities-none better anywhere; well maintained and equipped. These have come with existence and been built as they have been built by reason of the splendid agricultural country by which they are surrounded. The population is scarcely discernible. A population ten or twelve times that shown by the recent census could be easily maintained in even greater wealth than that which maintains the present numbers. Thereis certainly a wonderful future for Western Canada and that which goes to the development of the west will enrich the last. This is the growing time in Canada and what has been done in the past ten years is but a beginning. The next decade will show a for greater advancement. In the meantime Canada is bidding welcome the progressive and industrious citizen. The invitation is a standing one. At the forthcoming land exposition in Chicago, Canada will have one that has ever been made and it will be well worth while inspecting it and setting information from those who may be in charge.

Sitry Game.

A city cousin had been staying at the farm for two weeks, resting up for the winter's round of picasure. One examing after supper she suggested to her country cousin that they get up a bridge party some evening.

"My sakes, Arabelle," was the horrided reply "They night no bridge pearer than four mile, and that one's awful rickety. This time of the year. you'd all have penumonia. Par crazy Suffer!

of suffrage for women, although some were eligible to vote. Then again, they public libraries in cities and towns;

ment for woman's suffrage gained form as the right to vote on school matters, local tax questions, municipal suffrage, etc. In 1869 Wyoming gave first state in the country to do so.

City, 95 per cent voted in Grouse cent voted in Nephi.

In Kansas the reports from these same sources show that 80 per cent voted at Miltonvale.

Seem to Prize Vote.

In Wyoming the reports state that the women voted as strongly in proportion to registration as did the males, if not to a larger extent. In Denver, Colo., in the election of 1909. no less than 30,000 women voted and only about 500 of that number were classified as vicious women. In other words, in that Denver election 43 per cent of the vote was cast by women and only 40 per cent of the vote was cast by males.

Both houses of the National Parliament of Federated Australia for the session of 1909-10 passed a resolution saying that after 66 years of woman's suffrage in varying parts of the coun- mission; providing for a department constitute the best possible estimate try and nine years as a common of domestic science in the State uniwealth, the reform has justified the versity; providing for a course of dohopes of its supporters.

must have had that also. I suffered very severely.

"Nothing ever relieved me like Perma. It keeps me from taking cold.

"With the exception of some deafness I am feeling perfectly cured. I am forty-six years old.

"I feel that words are inadequate to express my praise for Peruna."

DIET FOR THE TUBERCULOUS

General Idea That Too Much Food Cannot Be Given Is Shown to Be Erroneous.

Many traditions with regard to the feeding of tuberculosis patients and with regard to food in general, are given severe blows in a series of articles published in the October number of the Journal of Outdoor Life, the official organ of the National Association for the Study and Prevention of Tuberculosis. Dr. John R. Murlin of New York, assistant professor of physiology at the Cornell university medical college, holds in an article entitled "The Dynamic Principles of Nutrition," that a consumptive will gain weight and do well on three pints of whole milk, eight ounces of cream, five ounces of milk sugar, six eggs and two slices of buttered toast as a ration for 24 hours. The entire diet, with the exception of the bread and butter, could be prepared in advance and served for a cost of about fifty cents for the day. Miss Cecilia diets which the ordinary family can

Dr. David R. Lyman of Wallingford. Conn., and Dr. Paul B. Johnson of Washington, D. C., both agree that the ordinary person eats too much, and that the old notions about stuffing a tuberculosis patient at all times and seasons have been proven false. Dr. Lyman holds that eggs are not a necessary article of the consumptive's diet, but that a tuberculosis patient should eat anything that agrees with him that is nourishing. He thinks that a tuberculosis patient should eat only a little more than a person in ordinary good health.
