

## It Means Health For the Child

The careful mother, who watches closely the physical peculiarities of her children, will soon discover that the most important thing in connection with a child's constant good health is to keep the bowels regularly open. Sluggish bowels will be followed by loss of appetite, restlessness during sleep, irritability and a dozen and one similar evidences of physical disorder.

At the first sign of such disorder give the child a teaspoonful of Dr. Caldwell's Syrup Pepsin at night on retiring and repeat the dose the following night if necessary—more than that will scarcely be needed. You will find that the child will recover its accustomed good spirits at once and will eat and sleep normally.

This remedy is a vast improvement over salts, cathartics, laxative waters and similar things, which are altogether too powerful for a child. The homes of Mrs. J. L. Stroup, 24 No. Logan St., Chariton, Iowa, and Mrs. Rose Fry, 105 W. 2nd St., Ottumwa, Iowa, are always supplied with Dr. Caldwell's Syrup Pepsin, and with them, as with thousands of others, there is no substitute for this grand laxative. It is really more than a laxative, for it contains superior tonic properties which help to tone and strengthen the stomach, liver and bowels so that after a brief use of it all laxatives can be dispensed with and nature will do its own work.

Anyone wishing to make a trial of this remedy before buying it in the regular way of a druggist at fifty cents or one dollar a large bottle (family size) can have a sample bottle sent to the home free of charge by simply addressing Dr. W. B. Caldwell, 221 Washington St., Mendocino, Ill. Your name and address on a postal card will do.

### SURE NOT.

The President—Fame is a bubble. The Optimist—But it isn't the hardest blow that attains it.

### IT IS CRIMINAL TO NEGLECT THE SKIN AND HAIR

Think of the suffering entailed by neglected skin troubles—mental because of disfiguration, physical because of pain. Think of the pleasure of a clear skin, soft, white hands, and good hair. These blessings, so essential to happiness and even success in life, are often only a matter of a little thoughtful care in the selection of effective remedial agents. Cuticura Soap and Ointment do so much for poor complexions, red, rough hands, and dry, thin and falling hair, and cost so little, that it is almost criminal not to use them. Although Cuticura Soap and Ointment are sold everywhere, a postal to "Cuticura," Dept. 21 L, Boston, will secure a liberal sample of each, with 22-page booklet on skin and scalp treatment.

### Two Women.

"I'm going to Vassar and try for a degree this year. Better come along."

"Thanks, dear, but I'm going to Reno and try for a decree."

Dr. Pierce's Pepples, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels and cure constipation.

You have a corking good memory if you don't tell the same story to the same crowd twice.—Atlantic Globe.

Mrs. Winslow's Soothing Syrup for Children's teething, soothes the gums, reduces inflammation, always brings relief, cures whooping cough.

The fellow who goes around looking for trouble generally meets somebody who takes him at his word.

Lewis' Single Binder cigar equals in quality most 10 cigars.

There isn't much hope for the man who has no self-respect.

### PREVENTION OF CRIME.

Prevention is the order of the day. Prudent insurance companies are sending their representatives over the country to inspect property already insured because they find prevention cheaper than cure.

From of old it has been true that the children of this world are wiser in their generation than the children of light. It is high time that we learn from them.

It is impossible for us to estimate the cost of crime to our country in all of its ramifications. If there were no criminals we would need no locks for our doors. The expense of this one small item is immense. \$6,000,000,000 is probably a low estimate of the total cost of crime to our country per annum.

The economic view is of course the lowest possible estimate. What about the human wreckage? The loss of body and soul of vast numbers for time and eternity! Eternity alone can measure the heartaches, the sorrows, the havoc wrought by evil.

To prevent crime we must make a study of its causes. It is vastly wiser as well as easier to destroy the seed of the hydra-headed monster than to throttle him after he has attained full size, full strength and all his subtlety.

There are five institutions around which all that is good and bad in our civilization clusters. These are the family, the state, the church, the school and commerce.

The causes of crime are as thick on all of these as the barnacles on the hull of an old sea-worn vessel.

The golden rule has slight recognition in the business world. Competition by means fair or foul is the rule instead of co-operation. The fitting symbol of business is the tigers' tooth and the tigers' claw. In this land of plenty hundreds of thousands of innocent children are going to school without a breakfast. Millions, probably a quarter of our city populations, are not making the two ends meet and consequently crowding many of their own number constantly below the crime line. This condition of things produces a feverishness that alarms the world.

Our schools for the most part exclude all the teachings of Christianity. In large part they are based on unproved and unprovable hypotheses, on scientific theories that may turn a somersault with the changes of the moon and on vain philosophies that are the laughter of the gods. And crime is growing 250 per cent faster among the young than among adults. We used to think education a cure, now we know that crime is making havoc of our high school pupils and college and university students.

Our churches have lost the original unity. They have not presented a solid front to the foe since the first centuries of the Christian Era. They have accepted the precepts of men for the doctrine of God. The marrying factions have prayed on one another and thus defeated themselves in the presence of the enemy. Of late there has been a wide-spread and desperate effort to get together, to magnify what we have in common and minimize our differences. Nevertheless, there are probably more sects and more divergent views today than yesterday. All of this weakens Christianity and lessens its power to diminish crime. As God's husbandmen fall to cultivate his vineyard the weeds grow apace.

The state, as great as it is, as beneficent as it is, is a prolific source of crime. The odor of corruption is strong around all our capitals. We were formerly as slow to suspect the supreme courts as our wives. But that has all changed in the last few years. And if the judiciary is under suspicion, what about our rank and file? If the heart is corrupt, what can we expect of the extremities?

No one in our day, conversant with the laws, can say that they and the judiciary do not favor the rich as against the poor.

We come now to the family, the institution fundamental to all the others. As is the family, so is the state; as is the family so is the church, the school, the business world. We find that few criminals come out of well ordered homes and that there has been 450 per cent increase of homicidal crimes since '89 in the United States. We are forced then to conclude that the American home is breaking down, that in it we may find causes of crime. We note also that a majority of criminals come from homes broken by death or by divorce; also that there is on an average one divorce for every nine marriages in the United States; one in every 657 in Nebraska; one in every four in Lancaster county; that at the end of the present century, if not before, at the present rate, we shall have as many homes broken by divorce as by death. Hence we must expect in the future a still greater and a much greater crop of criminals. The antediluvian Babel is a fit symbol of world conditions today.

Does somebody cry pessimism? We fling back a flat contradiction. God reigns and out of all the chaos we create He will bring order; out of all our wrath will He gather praise. A greater and more glorious paradise than the pristine one is to be ours. It will not be gained, however, by our slitting over hard facts with our egotism; but rather by our facing the bald reality and setting ourselves heroically to right conditions that invite and even necessitate individual and national damnation.

We must use the common sense and the same degree of it that is exercised by the wise farmer in the raising of his cattle. And why not?

Are not children as valuable in themselves, to the nation and the race, as cows? Man must see to it rigidly that they are fit to be fathers or else not perpetuate their species. We know that confirmed criminals beget criminals, confirmed paupers beget paupers, idiots beget idiots, and that the diseased beget the diseased. How much better it would be for the idiotic, the syphilitic, the criminally inclined, if they had never been born! How much better for society! Men, if they are no good to themselves, must not be allowed to afflict society with their progeny. If they have no conscience in the matter, then the conscience of the state must assert itself.

Men must recognize the responsibility of parenthood also in the selection of their mates. Mere whims must be set aside for accepted principles, the dangers in such specious pleas as the Sinclairs and their ilk give the public in defense of their suicidal policy must be pointed out and avoided.

Men must recognize that at bottom marriage is a physical fact, that it establishes a new unity. "This is bone of my bone and flesh of my flesh" is as much a scientific fact as that the world revolves around the sun, that this new unity—the family—is the basis of the state, that this unity is the work of God, not of the state. "What God has joined together let not man put asunder" was declared of all marriages, not simply the temporary affixes common in our times. Men consequently must recognize that infidelity in the marriage relation is a serious matter, that it is the transgression of natural laws; and that the most terrible of diseases are the natural penalties of broken law, that they are God's voice declaring his high estimate of his own laws.

Men must recognize that at the top marriage is comradeship. If a man cannot make of his wife a comrade, he should not offer his hand in marriage. No woman should accept the hand of a man in marriage if she cannot be his companion, his comrade.

Not to pursue this subject further, I close by saying if we will do away with crime breeding conditions we will have little crime. If we will not, we are committing the most stupendous blunder of the ages and are making a hell of earth.

**WIFEY HAD A LONG HEAD.**  
People With Patriotic Instincts Paid for the Patching Up of Her Old House.

"If I thought I could get a wife as smart as the wife of that man who bought property up in Westchester, I'd get married tomorrow," said the pessimist. "It was a bum house he got hold of. Rotting shingles, sagging weather boarding, and defective plumbing sent cold chills chasing all over the man every time he looked at them. Luckily for him his wife was not subject to chills. She joined a literary society and one day when nosing around among historical documents she discovered that their dilapidated little cottage had been somebody's headquarters for about fifteen minutes in some war or other."

"Patriotic societies can't afford to let this house go to rack and ruin," she said with spirit. "It won't cost over \$300 to make repairs. We couldn't raise \$300 in three years, but the societies can get it easily enough, and it is their duty to do it."

"She wrote fervent appeals to public spirited citizens who have a hankering for investing money in historic landmarks. Pretty soon contributions began to come in. They were not large, but they were numerous and the first thing that man knew he had enough cash on hand to buy new shingles and patch up the weather-boarding. What better investment can a fellow make, I should like to know, than a shanty with a historic past and a wife with a Wall Street head?"

**LITTLE JOKE ON FARMERS.**  
Sleepers Effectually Roused by Threatened Danger in Which They All Felt a Share.

"I am no foe to walkers. Indeed, in cold weather, I regard walkers as a blessing. They protect the throat."

The speaker was De Wolf Hopper, the comedian. From his corner table in Delmonico's he resumed: "And reverencing walkers as I do, I shall never cease to regret a joke I once perpetrated in Nola Chucky. "We were playing in Nola Chucky during a campaign, and one evening on my return to the hotel I was amazed to find the whole place packed and jammed with sleeping and bewhiskered farmers."

"They had come in, you see, from miles around to vote, and now, utterly worn out, they lay snoring everywhere. Yes, the entire floor space of the hotel was covered with sleeping farmers. All were whiskered, and their whiskers, sticking up in the air, caused the hotel halls to resemble fields of grain. Those upstanding whiskers in the draughty corridors waved in the breeze, for all the world like fields of nodding grain on a windy day."

"Then I played by joke, I shouted at the top of my lungs: "Hit the one with the whiskers." "And instantly every blessed farmer leaped to his feet with doubled fists."

**Mixing Paint.**  
Is there anything more interesting in life than mixing paint, putting in black to darken it, yellow to lighten it, vermilion to make it bright, and green to see what happens?—Atlantic.

**Visible Oven.**  
A department store manager looked over a sea of heads about a basement exhibit the other day. "They are watching the new stove bake," he explained. "The oven door is of clear, heavy glass, and all the mysteries of a day's baking are revealed. Cakes and pastries rise, brown and bake to a turn in full view of the public gaze. It proves to be a fascinating sight, for we haven't had such a crowd in days, and the men seem as interested as the women."—New York Sun.

**Nature's Washrooms.**  
On a tiny, rocky Isle in Clear Lake, California, there is a perpetual soda fountain, from which gushes better soda water than the chemists can produce. Furthermore, here are natural wash tubs and washing machines and, in some places, even ready-made soap. In the Yellowstone National Park the family wash may be put into a stout bag that may be hung in one of the boiling springs and left there while the owner goes about his business. When taken out the clothes are so white they need no rinsing.

## POSSIBILITIES OF CALF ARE DETERMINED BY FEED AND CARE

Youngster Should Always be Allowed to Have First or Colostrum Milk of Its Mother and Permitted to Nurse Until Eighth or Ninth Milk-ling—Eight Essentials.

(By D. H. OTIS, Wisconsin.)  
Young calves need whole milk for the first few days. The calf should always have the first or colostrum milk of the cow and be allowed to nurse the cow until the eighth or ninth milking, when the milk is suitable for human food. Feed often with small amounts to avoid over feeding. Teach the calf to drink and feed whole milk for at least three weeks, changing to a skim milk diet gradually.

The amount of milk fed should be carefully regulated. A good plan with the normal calf is to give four pounds (two quarts) of whole milk three times per day, fed sweet and at blood temperature. In the state of nature the calf gets milk containing about three per cent fat. Our domesticated cows have been bred in some instances to give nearly twice this amount. Milk that is too rich may

Feed the Calf in a Comfortable Stanchion.

cause serious trouble from scours, and in feeding such milk care should be exercised to give limited amounts at the proper temperature. The feeding of whole milk should be continued for about three or four weeks, when the number of meals may be reduced to two per day. From one-half to a pint of skim-milk may now be substituted for an equal quantity of whole milk. The amount of skim-milk may be gradually increased and the amount of whole milk correspondingly decreased until, at the end of a week or ten days, the calf is getting all skim-milk.

Skim-milk is a cheap feed for calves but should be fed carefully in limited quantities and only while it is warm and sweet. Skim-milk may form the

principal diet of the calf for eight months or a year. Factory skim-milk should always be pasteurized to avoid the spread of tuberculosis. The best skim-milk is that which is fresh from the separator and still warm. Experiments show that it is only one-fourth as expensive to raise a calf on skim-milk as whole milk. Two pounds of grain with the proper amount of skim-milk equals one pound of butter fat. Butter milk or whey may profitably be fed to calves.

Grain for calves should be fed first while the calf is quite small with a little bran to aid the calf in learning to eat. High priced concentrates are unnecessary and give not better results than corn meal, oats and bran, ground barley, etc., when fed in proper combinations. At four to six weeks a calf has good teeth and can grind his own feed. A variety of feeds is advantageous and best results will usually be secured from mixtures.

The following list may serve as a guide to the calf feeder in making selections or combinations to suit his conditions:

1. Corn meal gradually changed in four to six weeks to shelled corn with or without bran.
  2. Whole oats and bran.
  3. Whole oats and corn chop, the latter gradually replaced by shelled corn in four to six weeks.
  4. Ground barley with bran or shelled corn.
  5. Shelled corn and ground Kafir corn or sorghum.
  6. Whole oats, ground barley and bran.
  7. A mixture of 20 pounds of corn meal, 20 pounds of oat meal, 20 pounds of oil meal, 10 pounds of blood meal and 5 pounds of bone meal, changed to corn, oats and bran when calves are three months old.
  8. A mixture of 5 pounds whole oats, 3 pounds bran, 1 pound corn meal and 1 pound of linseed meal.
- The calf may be taught to eat grain by rubbing a little on its mouth when it is through drinking milk. From this it will soon learn to eat from the feed box.
- The roughage for calves should first be fed at two or three weeks of age when the calf begins to eat grain. Good clean hay, either timothy, blue grass, clover or alfalfa, may be used. Corn silage is an excellent calf feed when fed in moderate amounts. Good pasture is an essential after four to six months of age, and if the calf is turned out for only a few hours each day at first scours will be avoided.

### PURE-BRED IS MOST PROFITABLE

Farmer Will Find His Stock Not Only Better in Looks, But His Profits Will Show Big Increase.

Nearly every farmer has several dogs and in nearly all cases they are not worth their feed. A pair of good Scotch collies, English collies, sheep-herds, beagles, fox terriers or any other breed to which you may take a fancy can not only be made to pay

Well Bred Collie.

for their keep, but will add a nice little sum to the farm purse, as young dogs of a pure breed can always find a ready sale.

To have all the stock on a farm of a pure breed seems to some people to be impossible, but the farmer will find that his stock are not only better in looks, but with careful management an increase of from 25 per cent. to 50 per cent. in his profits can easily be made.

**Disposing Holiday Turkeys.**  
If you have a considerable number of turkeys to dispose of for the holidays, you will probably find it more profitable to ship to a reliable commission house than to sell to a local dealer. Shippers should reach the market three or four days before the holiday for which they are designed.

**Good Pork.**  
The only way to make good pork and make it cheaply is to crowd the pigs from the time they are able to get grain.

The farmers in many parts of California where field peas grow rank, fatten their hogs by allowing them to run in the uncut pea fields.

**Eggs and Exercise.**  
The hens to lay well in cold weather must have plenty of exercise. If they are to be confined, give them a deep litter of straw to scratch in, and place the grain feed in this straw so they will scratch. Inactive hens will not lay. It is a good plan on the farm to allow the chickens the run of all the barns and stables during the day. They will do no damage at this time and will secure a lot of feed that would otherwise go to waste. In securing it they will be compelled to exercise, which will promote laying. Also, the barn is a dry, warm place for fowls in winter, and dryness and warmth are great factors in their health and productiveness. They can easily be shut out of the barn at night.

**Dry Shelter for Sheep.**  
If you are getting in for a few sheep this season, don't overlook the matter of shelter. Sheep must be kept dry as to fleece and feet, otherwise your venture will result disastrously. Provide dry quarters for wet weather and you'll have no difficulty in carrying them over.

**New Rake Patented.**  
For weeding gardens and flower beds a rake has been patented which carries a small triangular hoe on the crossbar.

### PURCHASE JEWISH OUTLOOK.

Denver.—A number of prominent businessmen identified with Denver's Jewish community and professional interests have purchased the Jewish Outlook and will make it the representative of Jewish sentiment in the trans-Mississippi states, while heretofore it has been only a local paper. The Outlook is the pioneer Jewish publication between St. Louis and San Francisco.

**Left Him Thinking.**  
"I promised my wife a half-crown to put in a home-safely every time I kissed her. Later, when she opened the safe, there were a lot of sovereigns and half-sovereigns in it. I asked her where she got them."

"Everybody is not so stingy as you," she replied.—London Tit-Bits.

**A Born Quibbler.**  
"Didn't I tell you not to shoot any quail on this place?"

"Yassah," replied Uncle Rasberry. "You done told me an' I done heard you. Dis ain't no quail. Dis is a partidge."

Some men who marry in haste have plenty of time to pay alimony.

Lewis' Single Binder cigar is never topped—only tobacco in its natural state.

Only a good man can believe that a woman is better than he is.

## The Farmer's Son's Great Opportunity

Why wait for the old farm to become your laboratory? Buy now to prepare for your future prosperity and independence. A great opportunity for the farmer's son. Buy now to secure a practical education in the art of farming. Buy now to secure a practical education in the art of farming. Buy now to secure a practical education in the art of farming.

**Now's the Time**  
to buy a farm from now when land will be high. The profits secured from the abundant crops of wheat, oats and barley, as well as cattle raising, are causing a steady advance in price. Government returns show that the number of settlers in Western Canada from the U. S. was 60 per cent larger in 1910 than the previous year.

Many farmers have paid for their land out of the proceeds of one crop. 160 acres at \$5.00 an acre. Fine climate, good schools, excellent railway facilities, low freight rates, wood, water and lumber easily obtained.

For pamphlet "Last Best West," particularly suitable for the farmer's son, apply to the Dept. of Agriculture, Ottawa, Canada, or to Canadian Tourist Agent, S. W. BENNETT, Room 806 Bldg., Omaha, Neb. Please write to the agent nearest you.

## DEFIANCE STARCH

16 OUNCES TO THE PACKAGE—OTHER STARCHES ONLY 12 OUNCES SAME PRICE AND "DEFIANCE" IS SUPERIOR QUALITY

W. N. U., OMAHA, NO. 50-1911.

## The Human Heart

The heart is a wonderful double pump, through the action of which the blood stream is kept sweeping round and round through the body at the rate of seven miles an hour. Remember this, that our bodies will not stand the strain of over-work without good, pure blood any more than the engine can run smoothly without oil. After many years of study in the active practice of medicine, Dr. R. V. Pierce found that when the stomach was out of order, the blood impure, and there were symptoms of general breakdown, a tonic made of the glyceric extract of certain roots was the best corrective. This he called

## Dr. Pierce's Golden Medical Discovery

Being made without alcohol, this "Medical Discovery" helps the stomach to assimilate the food, thereby curing dyspepsia. It is especially adapted to diseases attended with excessive tissue waste, notably in convalescence from various fevers, for thin-blooded people and those who are always "catching cold."

Dr. Pierce's Common Sense Medical Adviser is sent on receipt of 31 one-cent stamps for the French cloth-bound book of 1008 pages. Address Dr. R. V. Pierce, No. 663 Main Street, Buffalo, N. Y.

## PERFECTION SMOKELESS OIL HEATER

Smokeless Odorless Clean Convenient

The Perfection Smokeless Oil Heater warms up a room in next to no time. Always ready for use. Can be carried easily to any room where extra warmth is needed.

A special automatic device makes it impossible to turn the wick too high or too low. Safe in the hands of a child.

The Perfection burns nine hours on one filling—giving heat from the minute it is lighted. Handsomely finished: drums of blue enamel or plain steel, with nickel trimmings.

Ask your dealer or write for descriptive circular to any agency of Standard Oil Company (Incorporated).

## W. L. DOUGLAS

\$2.50, \$3.00, \$3.50 & \$4.00 SHOES  
All Styles, All Leathers, All Sizes and Widths, for Men and Women  
THE STANDARD OF QUALITY  
FOR OVER 30 YEARS  
The workmanship which has made W. L. Douglas shoes famous the world over is maintained in every pair.

If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then realize why I warrant them to hold their shape, fit and look better and wear longer than other makes for the price.

**CAUTION** The genuine have W. L. Douglas name and price stamped on bottom. Shoes Sent Everywhere—All Charges Prepaid.

How to Order by Mail.—If W. L. Douglas shoes are not sold in your town, send direct to factory. Take measurements of foot as shown in model; state style desired; size and width (usually width: plain or cap toe; heavy, medium or light sole). I do the largest shoe mail order business in the world.

Illustrated Catalog Free. W. L. DOUGLAS, 145 Spaulding St., Brockton, Mass.

## The Famous Rayo Lamps and Lanterns

Rayo lamps and lanterns give most light for the oil used.

The light is strong and steady. A Rayo never flickers. Materials and workmanship are the best. Rayo lamps and lanterns last.

Ask your dealer to show you his line of Rayo lamps and lanterns, or write for illustrated booklets direct to any agency of Standard Oil Company (Incorporated).
