To My Many Friends-I am pleased to make a report to you of the pleasant visit my wife and I had in Western Canada.

We visited the territorties of Alberta, Assiniboia, and Saskatchewan, and found them far surpassing our imagination, but little did I expect to find such rich, loamy soil, so much of it, and so uniform in its level prairie lay. I do think the soil of Canada as a rule equals if not excels the finest prairie farm lands of Indiana. These lands are immense in their richness, and when once the sod is rotted and pulverized, it is as pliable and as easily cultivated as Indiana sandy

From this you can see placed. His home is at Mexico, Ind., there can be plenty of hay mown for and he will be pleased to substantiate winter feeding, and I have had reverbally or in any other way all that liable farmers to tell me that their stock will feed on hay alone, and be ready for market in the spring. Upon inquiring about the expense of raising a steer, a farmer replied that he did not consider it would cost any more than \$4 or \$6 to develop a three-year-

I truly think Canada offers a fine opening for a young man or a man who is renting land in Indiana. One hundred and sixty acres of good black land will cost you only \$10 at the time you enter it, and by plowing and cultivating five acres each year for three years, gives you one hundred and sixty acres of good land for \$10. This land can be bought from the railroad companies, private corporations or the government for \$3 to \$4 per acre.

From a financial standpoint, I believe that for a series of years (five) a young man can make \$10 in Canada, whereas he would only make \$1 here, and I feel sure that I spent more money to get my eighty acre farm in White county, Indiana, cultivated than it would cost me to cultivate eight hundred acres in Canada. This may seem a strong view to take of the matter, but when you take into consideration the clearing, ditching, fencing and the expensive breaking in of the stumps, and then compare the expense to that of land needing only the breaking, you will conclude that it is not such a wild or exaggerated statement as you might at first think.

I enjoyed the balmy, breezy atmosphere, which was bracing and refreshing, and the cool nights which made it so pleasant for sleep.

On making inquiries regarding the view, offers as fine opportunities for winters in this country, I learned that the people never suffer from the cold, as the weather is dry and invigorattogether with the rich soil, produce ing, and in a great many places farmvery fine wheat, oats, barley, fiax and ers and herders allow their stock to

#### For the Woman He Loves.

Just as rapidly as Rabbi Mayer Newman can accomplish the work, George Horney of New York is being transfrom a Gentile to a Hebrew. long time Horney has loved Sarah Kleinman and Sarah has loved George, who was a member of the Methodist church. For three years they debated as to which one of them should change religion, Horney also urging that they be married and let the matter of religion go. But Miss Kleinman would not consent, and, of course, the man was finally forced to give in. So the other day he applied to Rabbi Newman to make him a Hebrew. It will be necessary for him to change part of his name, and in future he will be known as Abraham Tyson Horney.

A SHAKESPEAREAN FORGERY.

Curiosity.

formed the library of E. J. Stanley, M. P., and recently sold by auction in London, was one precious product of the ingenuity of that arch-forger of Shakespeare, Samuel William Henry Ireland. It is the quarto volume which deceived the world when it was published in 1796, under the title of "Miscellaneous Papers and Legal Instruments under the Hand and Seal of William Shakespeare, including the tragedy of 'King Lear' and a small fragment of 'Hamlet,' from the original MSS, in the possession of Samuel Ireland, of Norfolk street." In the book world the reign of the rogue is but a span, but the inventive Ireland's was rather long draw out, and Boswell on his death bed, kissing the forged manuscripts and believing his lips to be sanctified by the process, was not the only great man who was taken in by the swindle. This book is not only interleaved with manuscript copies of the original forgeries. but is also preceded by an account in manuscript signed by Ireland of the suppression (on the discovery of the forgeries) of the original issue in folio. Ireland's success is but a record of human credulity. Young Ireland was first tempted by his father's unintelligent enthusiasm for Shakespeare to forge an autograph of the poet on a carefully copied old lease. His audacity grew with the growing credulity of his dupes, and ere long locks of hair, private letters, annotated books, and so on, were plentifully produced, and all enquiries were put off with lying explanations. Boswell, Wha-, Dr. Parr and hundreds more were deceived, but those like Malone, really qualified to judge, denounced the imposture from the first. Ireland's audacity now reached the folly of producing a deed of Shakespeare's, bequeathing his books and papers to a William Henrye Irelaunde, an assumed ancestor. A new historical play was announced, entitled "Vortigern," and carefully concealed its production by Sheridan at Drury Lane; but it was vapid and un-Shakespearean and was a failure. The old man now began to smell a rat and demanded an explanation from his enterprising son. It was forthcoming in the form of the confession in manuscript affixed to the volume referred to. "I order," one reads, "to further obliterate as much as possible every vestige of Shakespearean production I further committed to the flames the complete impression of the present reprint, reserving no more than the annexed copy," which as a literary curiosity consequently ranks unique. It was bought by Mr. Jackson for £122.

#### The Effects of Bad Books.

It is not alone that the ethics and aesthetics of so many books are bad, the moral tone dubious and the stimulus unwholesome: that is bad enough in itself. But the mischief is that the prominence given to a certain species of literature, if it must be so called-its cheapness; its innate impertinence-act not only as an inducement to partake of unwholesome mental pabulum, but they unfit the mind for the digestion of anything more wholesome or profitable. The appetite grows by what it feeds on; and it is not surprising that the final state of the mind which has pastured on such rank herbage is one of indifference toward anything that is difficult to find, difficult to masticate, and, perhaps, uncomfortable to an easy conscience. lying, as it were, a little uneasy on the intellectual and moral stomach. It is as if the diet of a child were advanced from milk to sweet sherbet, and from that to brandy, and men were to wonder at an infant maturing through a brief stage of sickly youth into a premature decreptitude.

The reason of the unhealthy mental development is not far to seek. The unwholesome book fails in the mission of every book. It does not extend man's knowledge of man, but merely repeats in various more-or-less-piquant dressings the story of certain vices, craftiness, heartlessness, and failings, which are, essentially, not the study of man, but a morbid interest in the remnants of beasts which an imperfect civilization and faulty education have failed to eradicate in man. It fails to deal with aliquid humani, in so far as it puts forward as interesting problems what are really sordid difficulties in the life of the animaldifficulties of whose existence every one is aware, and with which the right-minded man tries to cope in the inmost privacy of his heart and mind. -Contemporary Review.

Sandals May Become Popular. The fashion of sandal-wearing is said to be growing popular in Eng-The chief objection urged against the fashion is that it enlarges the feet-permits them to spreadbut this, it is claimed, is an error; the wearing of sandals merely allows the feet their proper development. It will in variably be found that the person with neat, well-shaped hands has feet to correspond. In allowing the feet to have the free play that nature intended them to have is apt to make them large and ungainly, then sailors, who spend most of their time and do most of their work on bare feet, and who hitherto have always been famous for their neat and well-shaped ones, will have to abandon their claim to this coveted possession. Every one will allow that sandals are the coolest foot covering for summer, but doubtless most people will be surprised to hear that it is claimed that they are the warmest wear in winter. If persons suffering from cold feet or chilblains would wear sandals over good thick woolen socks, it is said they would soon find themselves cured of these afflictions.
