CURBS WHOLE ALL LIVER FAILS  
Best Cough Syrup. Tastes Good. Use in time. Sold by druggists.

### Wonderful Cave Discovered.

A cave which may prove to be one of the world's wonders was discovered near Chama, Guatemala, last month, by Leon J. Dutton, a Pennsylvania man, who has just returned from that little-known country. Mr. Dutton traveled two days in the cavern, without discovering anything of its terminus, and at one point passed a cascade falling from a height of fully 200 feet and losing itself in a bad of apparently solid rock, leaving behind billows of mist, which completely hid the sides of the great cave. From the natives Mr. Dutton learned that the end of the cave is four days' journey from the entrance, and that hundreds of coffins made of pottery are stored in its most remote chambers.

### Woman's Progress in Medicine.

It is a trifle more than half a century since the first woman was admitted in the medical profession of this country. Forty years later there were 3,000 in regular practice besides an army of trained nurses, who in ordinary cases were a fairly good substitute for the regular practitioner. It is estimated that the number has doubled since 1889. Women have not got along so well in England as in the United States. There are only eighty-six lady physicians in London and vicinity, but there are 396 in active service in the United Kingdom and in India and China. In 1894 the sultan of Turkey surprised Europe by opening the doors of medical colleges to women. Four years later he repented of this innovation, but permitted foreign women to practice in the dominions. One Turkish lady slipped through college while his doors were open and is permitted to practice.

### "Straws Show Which Way the Wind Blows"

and the constantly increasing demand for and steady growth in popularity of St. Jacob's Oil among all classes of people in every part of the civilized world, show conclusively what remedy the people use for their Rheumatism and bodily aches and pains. Facts speak louder than words, and the fact remains undisputed that the sale of St. Jacob's Oil is greater than all other remedies for outward application combined. It acts like magic, cures where everything else fails, conquers pain.

A woman seldom forgives until after she forgets.

### Are You Using Allen's Foot-Ease?

It is the only cure for Swollen, Smarting, Burning, Sweating Feet, Corns and Bunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoes. At all Druggists and Shoe Stores, 25c. Sample sent FREE. Address Allen S. Olmsted, LeRoy, N. Y.

The beauty of some photographs lies in the background.

### RED CROSS BALL BLUE

Should be in every home. Ask your grocer for it. Large 2 oz. package only 5 cents.

By stopping to think a woman gives her tongue an occasional rest.

Hamilin's Blood and Liver Pills cure constipation and all the ills due to it; 25c at your druggists.

The man who invented work ought to have finished it.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists, etc. Hall's Family Pills are the best.

Regard yourself as superior to the evils which surround you. Learn to dominate your environments, to rise above depressing influences. Look for the bright things, not the dark and gloomy side.—November "Success."

### WHEN YOUR GROCER SAYS

he does not have Defiance Starch, you may be sure he is afraid to keep it until his stock of 12 oz. packages are sold. Defiance Starch is not only better than any other Cold Water Starch, but contains 16 oz. to the package and relishes for same money as 12 oz. brands.

Don't try to defy fate with an empty stomach.

## IN THE ODD CORNER.

### QUEER AND CURIOUS THINGS AND EVENTS.

#### The Strenuous Staging Done by Hornets and Wasps—Farmer Acts Like a Madman When He Ploughs Up a Hornets' Nest.

A little joy;  
A little strife;  
Hope, fear, hate, love—  
And this is life.

A little pain;  
A shortened breath;  
Ease, rest, peace, sleep  
And this is death.

The song, the sigh,  
The evening call—  
Thus live, thus die,  
Thus pass we all.

—Arthur J. Burdick.

#### STRENUOUS STINGERS.

"I read in one of the magazines recently something about the sting of the bees," said a citizen to the New Orleans Democrat, "and I was reminded of an experience I had with a friend some time ago while in the country. He was ploughing over behind a small dump of hills, and they were well wooded almost down to the fence line. It is a section which is noted for making wildcat whisky, and this fact threw me off the track, as will appear hereafter. I was approaching my friend from the hillside. I was riding. Suddenly I thought he glanced at me, and at the time he rushed around hurriedly to the singletree, unhooked the trace chains, threw them across the horse's back, and the animal struck out on a dead run down the turning row which split the ravine. My friend followed, and it was a race for who laid the rail, as they say in the country. I could see through it all in a minute. My friend had been making moonshine whisky, and he thought I was a United States marshal. I split my sides laughing over the thought of the thing, and then I struck out down the ravine after him. I traveled some distance before catching sight of my friend and his horse. Finally I found them close to a branch, and my friend was stooping down occasionally, picking up something and smearing it on his hands, face and neck. 'Hello, Bill,' I said, smilingly, 'I guess you thought I was a United States marshal.' 'United States h—!' he said, almost uncivilly; 'I ploughed up a hornets' nest.' And sure enough he had, and both the man and the horse were as knotty as a hickory limb as the result of it all. The bee may be a good stinger, but the hornet is the fleetest thing on wings when it comes to using the stinger with swiftness and effect. That reminds me of the curious methods of bees and things of that sort in stinging," the narrator continued. "Take the honey bee, for instance. Now, the honey bee is what you might call a lazy, clumsy, doleful sort of stinger. Really, the bee is awkward when compared with other insects. The bumble bee is a trifle more vigorous, and there is a deal more of what one may call action in its movements. It is a striking sort of sting, and I have seen children almost knocked down by these heavier members of the bee family. It is a mean sting to handle, too, and does not yield so quickly to treatment. The hornet and the yellow jacket sting on the wing, as it were. They do their work quickly, but thoroughly, and they generally leave a record behind them that they would have no cause to feel ashamed of if they had this element in their makeup. But there is my old friend, the wasp. I want to speak of him. He is the prince of stingers. You may not forget him so quickly when he stings you. He leaves a sort of waspy taste in your mouth, and it is anything but pleasant, and it is a taste you will remember even after the years have gone by. The wasp is a lingering sort of fellow. He lovingly and caressingly stings, perches for a while on one's neck, I may say, and then hums about his business. But really, while the wasp lingers longer than other insects while stinging, he also shows more anger, and is probably the most spiteful member in the list of stinging insects."

#### COLD ICE AND WARM ICE.

The college professor asked the rest of us whether ice was colder in winter than it was in summer. Now, to the rest of us, ice was ice, and therefore we could not see how it could remain ice and be either colder or warmer. Then the professor explained the thing in this fashion: "If a thermometer is buried in ice in summer it will indicate 32 degrees. If you throw a piece of ice into boiling water, and leave it there until it is almost gone, what is left will be still at 32 degrees. Ice can never be gotten above that temperature. But while ice can never be warmed above 32 degrees, it will go as much below that as the weather does. An iceman delivering ice one zero day in January was asked whether his ice was any colder than in July. He thought not. But, as a matter of fact, a piece of summer ice, if he had had it, would have been something of a foot warmer for him, as it would have been 50 degrees warmer than the air of the bottom of his wagon. Mixing salt with ice makes it much cooler. The ice in a wine cooler goes down to about zero. This is why the point zero on our common thermometers was fixed where it is. It was supposed to be the lowest point which could be reached by artificial means. Since then we have reached about 383 degrees below zero by chemical processes. Ice will cool down with everything else on a cold night to zero or below. What should prevent it? On a day when it is just freezing a block of iron, a block of ice, outdoors, will stay at 32 degrees. If the weather grows warmer the iron will warm up with the weather, but the ice will stay at 32 degrees and melt away. But if the weather grows colder the iron and ice will cool off, and one just as much as the other. As the ice grows colder it gets harder and more brittle. There can be no hickory bend on a skating pond on a zero day, for ice is then too brittle. Silvers of ice dipped in liquid air become so hard that they will cut glass. Water thrown on ice in the Arctic regions will shiver it like pouring boiling water upon cold glass. This is because the ice is so much colder than the water."—Beverages.

#### A SCOT NAMED THE TOWN.

Mr. J. H. Stoddart, the veteran actor, who is starring in "The Bonnie Brier Bush" at the Theater Republic, is a Scotchman by birth, as is also Reuben Fax, who plays the bibulous postman in Ian Maclaren's book-play. Mr. Fax was aboard during the summer and visited relatives in Glasgow. While there he heard a tale of two Scots, which he related with much unction to the appreciative Stoddart: "It was after the British had landed a force at Wei-Hai, in China," said Mr. Fax, "that two excellent Scots were discussing the war news in the Broome-law quarter of Glasgow. 'I see, Sandy, mon, that we ha' taken Wei-Hai-Wei,' said Jock, peering over the edge of his evening paper. 'We hae, hae we?' 'We hae, aye, we hae.' 'Hoot, mon!' exclaimed Jock, peering at him suspiciously. 'I'm thinkin' it was a Scot named the town.'"—New York Sun.

#### WAYS TO CATCH TURTLES.

Frank T. Bullen in his new book, "A Sack of Shakings," introduces his readers to the remora, or "sucker," a species of shark that never exceeded a dozen pounds in weight. He says: "On the top of its head is a flat, oval contrivance which is an adhesive attachment of such strength that, when by this means the fish is holding on to a plane surface, it is impossible to drag the body away, except by almost tearing the fish in half. Yet by the flexing of some simple muscles the fish can release its body instantly or as instantly reattach itself. The remora does not by any means limit its company to ships. It is exceedingly fond of attaching itself to the body of a whale, and also to some of the larger sharks. Indeed, it goes a step farther than mere outward attachment in the latter case, because well-authenticated instances are recorded where several suckers have been found clinging to a huge shark's palate. This is another stage on the way to perfect parasitism, because under such circumstances these daring lodgers needed not to detach themselves any more. They had only to intercept sufficient food for their wants on its way from the front door to the interior apartments. I have also seen them clinging to the jaw of a sperm whale, but that jaw was not in working order. It was bent outward at right angles to the body and afforded harborage to a most comprehensive collection of parasites, barnacles especially giving the front elevation of that whale an appearance utterly unlike anything with life." But the Chinaman has outwitted the superlatively lazy remora. By a way one must regard as a triumph of ingenuity he has succeeded in converting the very means whereby this born-tired fish usually escapes all necessity for energy into an instrument for obtaining gain for other people. The mode is as follows: "First catch your remora. No difficulty here. A hook and line of the simplest, a bait of almost anything that looks eatable lowered by the side of a ship, and if there be a sucker hidden there he will be after the lure instantly. The only skill necessary is to haul him up swiftly when he bites, because if he be allowed to get hold of the ship again you may pull the hook out of his jaws, but you will not succeed in detaching him. Having caught a remora, the fisherman fastens a brass ring closely around its body, just at its smallest part before the spread of the tail. To this he attaches a long, fine and strong line. He then departs for the turtle grounds with his prisoner. Arriving there he confines himself to keeping the remora away from the bottom of his boat by means of a bamboo. Of course the captive gets very tired, and no turtle can pass within range of him without his hanging on to that turtle for a rest. The moment he does so the turtle's fate is sealed. Struggle how he may, he cannot shake loose the tenacious grip of the sucker, and the stolid yellow man in the sampan has only to haul in upon the line to bring that unwilling turtle within range of his hands and lift him into the boat."—Chicago News.

#### Digging Deep for Gold.

A scientific problem of much interest will confront the engineers of the Transvaal gold mines when the war between the English and the Boers is over, and that is the depth to which shafts will be sunk in search of gold-bearing veins. Some of the shafts already opened will descend 4,000 to 5,000 feet, but it is thought by some of the engineers that a depth of 12,000 feet will be reached in other cases. The temperature at that depth will be about 100 degrees, the warmest, perhaps, at which men can work, but the suggestion has been made that a still greater depth may be found practicable if means be devised for cooling the air.—Utica Globe.

There are more than 5,000 building and loan associations in the United States, with 1,250,000 shareholders and total net assets of more than \$450,000,000.

Miss Lillie Degenkolbe, Treasurer South End Society of Christian Endeavor, 3141 Michigan Ave., Chicago, Ill., Cured by Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—When life looked brightest to me I sustained a hard fall and internal complications were the result. I was considerably inflamed, did not feel that I could walk, and lost my good spirits. I spent money doctoring without any help, when a relative visited our home. She was so enthusiastic over Lydia E. Pinkham's Vegetable Compound, having used it herself, that nothing would satisfy her until I sent for a bottle. I have thanked her a hundred times for it since, for it brought blessed health to me and cured me within seven weeks.

I now wish to thank you, your medicine is a friend to suffering women."—LILLIE DEGENKOLBE.

#### \$5000 FORFEIT IF THE ABOVE LETTER IS NOT GENUINE.

When women are troubled with irregular, suppressed or painful menstruation, weakness, leucorrhoea, displacement or ulceration of the womb, that bearing-down feeling, inflammation of the ovaries, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, "all-gone," and "want-to-be-left-alone" feelings, blues, and hopelessness, they should remember there is one tried and true remedy. Lydia E. Pinkham's Vegetable Compound at once removes such troubles. Refuse to buy any other medicine, for you need the best.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

WHEN YOU BUY STARCH buy Defiance and get the best, 16 oz. for 10 cents. Once used, always used.
