

PLAN

Then Act

Many people plan their whole lives to have a bank account and then leave this world without so much as a start at one. Planning isn't worth anything unless followed by action.

Good intentions never land you anywhere.

Make your plans to start an account with us this week and back up your plans with action.

* Clears The Complexion *

Can you imagine anything more embarrassing than to have a complexion that is marred with blotches?

It is not only unpleasant—that isn't the worst feature—it means that the blood is impure and the longer you neglect it the more you suffer from annoyance.

Skin eruptions from any description indicate, in every instance, an impoverishment of the blood supply. It isn't pure and you cannot expect it to supply the proper amount of nourishment to the surrounding tissues. Get at the root of the trouble—cleanse the blood of impurities—stir up the circulation—tone up the digestive fluids and have your food absorbed in the proper manner.

Nyal's Hot Springs Blood Remedy

Strengthens the blood supply, enriches it, cleanses it of impure waste material and thus supplies a foundation for the building of a permanent health.

You will notice a decided improvement with the first few doses, the appetite will be increased, you will feel the blood coursing through your veins and the skin will take on the glow of health.

We recommend it—\$1.00 the bottle

We expect to be here in business a good many years. The only way we can do it is by treating everybody right. That's our policy.

Mrs. Watson is a regular reader of the Northwestern, which she says keeps her informed on all the news of this, her old home, and is especially welcome. She finds time two or three times a year to come up and visit her mother in her declining years, showing a true daughter's devotion. Many of us, who have lost that dearest of all earthly friends, would give all we had, were it possible to have them with us once more, when our devotion would be doubled and trebled over the past.

The district dental meeting attended by our Drs. Marey and Allen at Hastings is reported by them to have been very successful. The two questions, "Does iron as a medicine injure the teeth?" and "Does candy cause teeth to decay?" brought out much discussion at the banquet, with much proof showing that Yes answers both.

The largest attendance in the history of the organization brought some to ask President Allen how it was done and they were informed that printers' ink on something over one thousand pieces of mail put out by the Northwestern printing press at Loup City did the trick. We think Dr. Allen is half right in that, the other half being due to his aggressive policy as president of the association.

Loup City is on the map and on the map to stay. More men and women of this city have been honored with offices by different state societies than any other town in the state. The latest to be honored by any society was J. W. Conger, who last week was elected treasurer at Lincoln of the Patriarchs Militant. And the best of it was that he was eminently worthy of the distinguished honor.

Mr. and Mrs. N. T. Daddow and son Harold, who reside on a farm near Loup City, this state, stopped off here Saturday evening, remaining until Tuesday morning guests of the editor and family, Mrs. Daddow and Mrs. Brown being sisters. They were returning from a visit with another sister in Oklahoma, and although they were not very favorably impressed with the Oklahoma country they fell in love with the country they saw around Friend. They left for home Tuesday morning.—Sentinel.

The new switch board for the central telephone office is being installed and we will soon have one of the most complete and best equipped systems in the state. To watch Messrs. Steven and Angier getting the complex talker machine in place is a regular Chinese puzzle to the uninitiated and we would as soon expect to translate the discussion of a couple of Peegee Islanders as to try and explain comprehensively to our readers how it is done. A visit to central is necessary to give any one any idea of the beautiful piece of mechanism or the difficult job the boys have on hand. It is expected by Manager Steven that they will have the system ready for business by the middle of next week, when within ten minutes time they change from the old to the new switchboard.
