

NATIONAL BANKER SAYS BAD RESULTS NOT APPARENT.

The Conditions, So Far, Not Favorable to Determining Complete Protection for Depositors.

Yards National bank of South Omaha, of Washington in regard to the guarlaw has been enforced have not been favorable to determining whether or the desired protection in times of Nebraska, thouble. A similar law is proposed in the state of Washington, and bankers continued Mr. Humphrey, "there has of that state have been seeking infor- already been shipped out nearly 600 mation in Nebraska. Mr. French ex- cars, and the shipping season is not presses his view as follows:

While it is true that the law has been in operation here for the past year or two, it has been under conditions which have not afforded an opportunity for judging of its practical working or testing its merits in time of stress Nebraska is an agricultural and live stock raising state, and has enjoyed for a period of years almost untinterrupted prosperity. In addition, we feel that the banking interests of the state at large are in the hands of men of character and experispore, as well as of more than average ability in their chosen profession. As a result of this combination of favorable conditions and careful management no state bank has failed in Nebraska in over five years, and only one failure has taken place in nearly eight years. A good state banking law and a banking board of exceptional excellence havy materially aided in making possible this excellent show-

"Viewed from the standpoint of the average depositor, there is no doubt the privations of an Alaskan climate that any measure that promises to to develop it." him additional security meets with his approval and commands his support, but the writer has always felt that the underlying principle involved in the guaranty law is unjust, unsound and inequitable, and would fail to accomplish the desired results railway mail service, Rudolph H. Milshould any general or widespread trouble overtake the banking business of our state.

"I think that many of us were apprehensive that the adoption of the faw would result in a large number of new banks being started by irresponsible and speculatively inclined for twenty-three years and his repuparties, but so far I am free to say we have been agreeably disappointed state banking board, Mr E. Royse, in his last report urged an amendment over to the grand jury. nking law, permitting

GREAT APPLE STATE. /

pl state in the country, and as an evidence of that fact had with him a sample of the Ben Davis apple raised in Richardson county. The apple measured nearly a foot in circumference and was a beautiful deep red

"I have just been talking with some apple buyers from Chicago and St. J. C. French, cashier of the Stock Louis," said Mr. Humphrey, "and they told me that the apples grown in Nein reply to an inquiry from the state brasks, and especially southeastern Nebraska, command better prices and anty law of Nebraska has written there is a greater demand for them that the law has not brought about than any apple grown. The apples some of the bad conditions predicted raised in the celebrated Hood River and that conditions under which the valley in Oregon, which for years enjoyed the distinction of being th best apple grown, do not compare in flavor not the law will afford to depositors with the apples grown in southeastern

> "In Richardson county alone," over yet. One of our heaviest apple growers, A. J. Weaver, who has about 200 acres in apple trees, will realize over \$35,000 from his orchards, E. L. Bowen, another man who has an eighty-acre orchard, will receive for his crop over \$10,000.

> "Somehow our Jonathan apples, said Mr. Humphrey, "have a flavor which no other apple-growing section seems to have. Our soil and climate and our manner of looking after the orchards has a tendency to give those apples just the right kind of flavor that makes them so much desired. Another apple that we raise down there is the Grimes Golden. I could show you samples of these apples which are so-clear that you can hold them up to the light and they seem to be nearly transparent. They have a pleasing flavor which, somehow, no other section gives them and they almost seem to dissolve in the mouth. "Men who own these orchards have a richer gold mine right at their door than the Klonidke ever produced, and it does not need the hard work and

TO RESTORE FAMOUS CHURCH Boston's Revolutionary Landmark Is Taking an Odd Ap-

pearance. Boston .- From the chaos of loose bricks and unplastered panels, Christ church (better known as the Old North church of the school histories) is re-emerging in something closely resembling its original guise. Restoration it at best a difficult and often thankless task, but fortunately this process at Christ church was in part simplified by certain authentic records of the building's earlier history. The first conspicuous change is in the building's exterior. During the last summer the walls have been sandblasted, ridding them of the drab paint which has darkened them for years, and revealing the brick in a warm, rich tone, which will weather to a kiss me still more mellow red. The front

Nebraska Forest Reserves.

Two national forest reserves may be opened in western Nebraska early next year, according to information at the Lincoln land office. The land was reserved for purposes of forestation, but the experiment of planting jack pine trees thereon was unsuccessful. One of the reserves is in Cherry county and contains about 144 square milies of land. Part of this will likely be parceled out under the new law allowing only 160 acres to each settler, while the balance will likely be subject to homestead entry under the Kinkald act.

GOLF BALL KILLED A BIRD

And It Kept on Its Way Toward Hole Without Even a Swerve at Country Club Links.

Boston .- A strange freak of golf was witnessed on the Brae Burn Country club links a few days ago, when a ball driven from a tee killed a sparrow and then continued true In its flight. The incident was witnessed by a number of golfers. The marksman was Joseph Gould.

He was driving from the seventh tee. Mr. Gould got off a good drive and the ball soared high. The bird was flying in the same direction and swerved just a trifle, apparently when it heard the buzz of the golf ball coming behind.

It is common knowledge that a golf ball is no mean projectile, and in this case the bird was instantly killed and fell, a crumpled heap of feathers, as though it had received a charge of shot. The ball was hardly checked in its flight and landed on the green not far from the hole.
