SENATOR PLACEK IS PLANNING FOR THEIR EMPLOYMENT.

## SET THEM TO MAKING BRICKS

He Would Also Have Dipsomanics' Systems "Sweated Out" by Steady and Honest Labor.

A solution of the vexatious convictlabor problem which has worried many past legislatures is to be proposed at the coming session by Senator Placek of Saunders county. He has made a thorough study of the fundamentals of the prison labor problem and declares he believes in the making of brick by a certain per cent of the convicts. The results sought for, both in a financial way and in a moral way, will be better achieved than by the pursuance of any other plan thus far suggested by legislators.

Senator Placek proposes to have the state establish its own brickyard at which the product may be made for the state direct for use in erecting additional buildings at various institutions. In the event that there is no need for this, Senator Placek believes that the men could be kept at work Attorney General Wickersham says manufacturing paving brick for use in constructing better highways over the

Nor does Senator Placek provide alone for convcts. He declared that dipsomaniacs sent to the state hospital for treatment should be worked in the plant, and that the "sweating out" would do more to relieve their systems of the effects of liquor than many of the cures now utilized for that purpose. In detailing the plan which he now has in mind and which he will incorporate into a bill at the coming session, Senator Placek said:

"A modern brick yard, employing from fifty to seventy-five convicts, can produce 60,000 paving brick or 80,000 building brick per day. Sixty thousand paving brick per day for 300 days would produce 18,000,000, and at \$15 per thousand make a total money value of \$290,000 per annum. Eighty thousand building brick per day for 300 days would produce 24,000,000 at the state house, in which he calls brick at \$10 per 1,000, or a money value of \$240,000 per annum. The save \$35,000 annually on that item alone

"Only seventy-five convicts would mous amount of money, and the bal- tricts, with a senator from each disance of 450 convicts can be used for trict, which would make a body of 144 laying brick in building paved roads senators, making a better and more over the state. At present only about stable form of government. With 200 convicts are steadily employed by such a condition "we can trust in God, contractors at 55 cents per day, earning the state about \$30,000, which just laws for all." sum does not cover the maintenance, and the state is compelled to pay a deficiency of \$15,000 to \$25,000 every two years, and in addition thereto pay for machinery, improvements and ad-

ditions. "For the past ten years bills have been introduced asking for an appropriation of \$50,000 to \$75,000 in cash and providing for issuing of bonds to the extent of \$200,000, payable in from ten to twenty years, and drawing interest at 5 per cent, while a modern brick plant, including land, and buildings for housing the convicts can be established for from \$75,000 to \$100,000. There is just as good shale in a certain part of Nebraska as anywhere, and we can make just as good paving brick as at Galesburg or Purrington. I have in mind a tract of land having the very best shale, which can be purchased for \$200 per acre, and it would take seventy-five to one hundred years to exhaust it. We have also about sixty dipsomaniacs confined at the hospital for the insane who spend their time in idleness, and, if necessary, put them to work also; and I believe that the sweating process is the best remedy for driving liquor out of the

RATES OF WOODMEN.

Consul Talbot Says Members Will Be Protected.

Head Consul Talbot of the Modern HOUSE COMMITTEE WILL CON-Woodmen issued a statement in Lincoln relative to the return to the inturn to the insurance rate effective in that order before the head camp sought to readjust the rates. The statement is to be given in full in the current issue of the order's official paper. In part Mr. Talbot says:

"To relieve the members from any undue anxiety or concern with reference to their particular certificate or status, I want to assure every member that it is the determination of the executive council that no member of this society shall suffer injury or injustice because of any transfer that may have been made, or of his present condition in the society brought about by his compliance with the new rate by-law complained of. The head clerk will, as rapidly as possible, take these different conditions up as business will permit, and properly, fairly and equitably adjust them so that no neighbor will have just cause to complain. To this end it is proposed by the executive council that pending said appeal and until further directioons, to discontinue writing any new business upon the new table of rates or to receive or to permit transfers of old members to any of the new rates adopted at the Chicago head camp.

"The method of this transfer back to the former condition will be by the neighbor returning to the head clerk, C. C. Hawes, Rock Island, Ill., his new certificate with the request that he be restored to his former status. Those members who have filed with the head clerk their application for transfer to one or more of the new plans and have not yet received a new certificate will have returned to them their old certificate and they will be carried at their former rate. Any member who has been written upon the new plans and joined the society since May 1, has the privilege to return his present certificate to the head clerk and receive in lieu thereof a certificate based upon the old by-

TINUE INVESTIGATION.

## THOSE SUMMONED TO APPEAR

Impeachment Trial in the Senate and Other Matters in the Two Houses of Congress.

Washington.-The resumption of the money trust" investigation Monday and a hearing Tuesday on the O'Shaunessy resolution for a congressional investigation of the Grand Trunk & New York, New Haven & Hartford railroad operations in New England promise to divide congressional attention this week, with the Archbald impeachment trial and the consideration of general legislation in the two houses. Before the end of the week it is expected two inquiries will be under

way the campaign expenditures investigation by the Clapp committee and the "shipping trust" inquiry by the house committee on merchant marine. Bankers and financial men from New York, Baltimore and Pittsburg

are under subpoena to appear before Chairman Pujo's "money trust" investigation committee during the week. The trial by impeachment of Judge Robert W. Archbald of the commerce

court, which began in the senate last Tuesday, wearied a majority of the members of that body by the end of the week. Efforts will be made this week through the medium of longer the public. sessions to hasten the presentation of testimony. With scores of witnesses still to be heard members of the senate are skeptical as to the possibility of concluding the trial before the Christmas recess.

Appropriation legislation will hold the right of way in the house. It is expected that the legislative, executive and judicial bill will be completed and passed during the week and that consideration of the Indian appropriation bill will begin. The senate committee on appropriations has kept abreast of developments in the house on the legislative bill and it is believed the measure can be ready for the senate within a few days after the senate committee receives it. That committee probably will make changes that will add several millions of dollars to the measure.

General legislation, aside from appropriation bills, will receive little at day and quit the third reader class in tention in either house or senate this the public school here. Her husband

Katherine Godfroy of Fort Wayne Undergoes Operation Which Promises Success.

Fort Wayne, Ind .- Katherine Godfroy, three years old, is growing a new nose, and the materials are the left floating rib from her body and flesh taken from the right forearm.

A year ago the child lost her nose through an accident. Three weeks ago physicians decided upon a novel operation. The floating rib was removed from the chest and buried in the forearm, where it was allowed to remain until flesh grew about it.

The forearm was then bandaged tightly to the child's face, where it will remain until the flesh and bone unite with the forehead. The final step will be cutting the forearm loose from the built-up nose and the placing of skin to prevent scars. Thus far every step in the operation has been

successful. PAINTS PORTS OF 1700 Elmer E. Gurnsey's Notable Decora-
