The wife and kiddies belonging to the Northwestern arrived home from Iowa last Saturday noon and now we are happy as a clam at high tide and don't care who knows it. Talking about high living here, it is not more than half to two-thirds what it is in Central Iowa, where the better half says eggs are selling at 30c to 35c per dozen, better to about the same price and all other produce in like proportion. Stand up for Nebraska, where living is the cheapest in the west, even if we do feel like squealing some times over prices.

We see by our exchanges that varons towns are incorporating rest rooms for people coming to town to do trading. That is something Loup City should do for our friends from the country. Take Saturdays, for instance, with the large crowds in town, farmers' wives in numbers may be seen walking our streets, with babes in their arms and young children by their sides, with no place to rest, unless they enter the crowded stores. How nice it would be if Loup City could have a rest room for these weary women, with comfortable chairs and rockers, and electric fans to make it cool and inviting. The expense would be nominal, and the thanks of the people would more than repay us for the expense. Loup City has a large number of generous and noble men and women who might take this matter up, and we feel assured our business men without exception would contribute liberally to such a room. Will some of our active, enterprising and philanthropic men and women take this matter up and carry it through to a successful conclusion?
