

The Price of Cream

The dairymen of Loup City and vicinity are receiving the highest price for their butterfat than they have ever received at this time of year.

Our competitors are paying much lower prices in the surrounding towns that have no local creamery than they are paying in Loup City.

To prove this absolutely, just call up Ashton, Rockville, Arcadia, Litchfield, Hazard or any of the nearby towns and satisfy yourself with regard to this price business.

We are the cause of these splendid prices you are receiving for cream at Loup City, and if there was no Creamery in Loup, you would be receiving the same price as the dairyman are receiving at the surrounding towns.

Patronize the local creamery because it furnishes you with the highest cash market, pays the same price to everybody and gives you a square deal every day in the year.

Our price this week is 27 cents for butterfat delivered here. We solicit your business.

A Frank Talk on Typewriters

The L. C. Smith & Bros. ball-bearing typewriter

Somehow, the impression has gained ground that there isn't much difference between the various makes of typewriters on the market. You may think the same thing. It would take a good, sound, logical argument to convince you that all typewriters do not have the same efficiency and that a stenographer cannot secure the same results on every machine.

We are ready to make that argument and to show you by actual demonstration that

The L. C. Smith & Bros. Typewriter

will do more work, better work, with less fatigue to the stenographer, than any writing machine ever made.

How is this possible?

Here are a few reasons:

1. It is ball bearing throughout—others are not.
2. All operations are controlled from the keyboard.
3. It is the lightest touch machine made.
4. It does not "smut" the carbon.
5. The ribbon reverses automatically.
6. The type is so protected that it is not battered by collision.
7. One motion of the hand returns the carriage and operates the line space.
8. It has an inbuilt biller and tabulator.
9. No trouble to write on paper as small as a postage stamp.
10. It is built for service.

This Is No Place for Me!

These people have bought a Western Electric Fan

Wherever there's a Western Electric fan flies are conspicuous by their absence.

In the dining room, kitchen, restaurant or store a Western Electric fan effectively rids you of these little pests.

For the store—a ceiling fan outside the entrance is better than a screen door. It affords an unobstructed view of the interior and at the same time effectively keeps out the flies.

An 8-inch desk fan on the table will give you a meal in comfort.

This type costs only 1/4 of a cent an hour to run.

Every fan has a felt covered base. Can be used on the table, mantel, book case, without scratching.

Come in to-day and let us show you the new fans we've just received.

There are very few records of a horse passing through what it did and live. And had it not been for the faithful work of Mr. Galloway the horse would have surely died, as the cuts all turned black at once and had commenced to mat.

Rye will be ready to cut in ten days. Winter wheat has begun ripening. Both rye and wheat will yield well. All early oats headed out and late oats commenced to head. Lots of corn more than knee high now, with plenty of moisture in the ground. Early potatoes are just fine and yield will be the best in years. The bugs are not as bad as in former years. Hay on the route is the best in several years and the crop almost made. Some of the second crop of alfalfa is in bloom and the yield will be close to the bumper crop of the first cutting. Pastures continue to be great, with plenty of moisture.

Prairie Chickens

The protection of the prairie chicken is receiving considerable attention just now. Farmers are much interested because the birds are voracious destroyers of insect pests. The secretary of agriculture is considering the plan of placing the prairie chicken under the migratory clause of the McLean law. This would mean a five year closed season. The prairie chicken migrates between states, the Nebraska birds taking jaunts to Kansas and Colorado.
