

Young women may avoid much sickness and pain, says Miss Alma Pratt, if they will only have faith in the use of Lydia E. Pinkham's Vegetable Compound.

Judging from the letters she is receiving from so many young girls, Mrs. Pinkham believes that our girls are often pushed altogether too near the limit of their endurance nowadays in our public schools and seminaries.

Nothing is allowed to interfere with studies, the girl must be pushed to the front and graduated with honor; often physical collapse follows, and it takes years to recover the lost vitality, after it is never recovered. Miss Pratt says—

"DEAR MRS. PINKHAM:—I feel it my duty to tell all young women how much Lydia E. Pinkham's wonderful Vegetable Compound has done for me. I was completely run-down, unable to attend school, and did not care for any kind of society, but now I feel like a new person, and have gained seven pounds of flesh in three months.

"I recommend it to all young women who suffer from female weakness."—MISS ALMA PRATT, Holly, Mich.—\$5000 forfeit if original of above letter proving genuineness cannot be produced.

It is with tears that wives water the sometimes sickly plants of their lords' generosity.

Ask Your Dealer for Allen's Foot-Ease. A powder. It rests the feet. Cures Corns, Bunions, Swollen, Sore, Hot, Callous, Aching, Sweating Feet and Ingrowing Nails. Allen's Foot-Ease takes new or tight shoes easy. At all Drugstores and Shoe stores, 25 cents. Accept no substitute. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Toledo's Outdoor Life. Still vigorous at the age of 75 years, Count Leo Tolstoy nearly every day either takes a ride on his favorite horse, goes for a walk under the lindens trees with his daughter, Alexandra, or in company with his great wolfhound, traps over the broad acres of the famous estate of Yasaya Polyana. Tolstoy has long been an ardent out-of-doors man; in early life a hunter and a sportsman, in later years a delectable to women twelve miles a day was an average walk and to whom a day in the saddle was as nothing.

Description of Japanese. Miss Bird, in her book entitled "Unbeaten Tracks in Japan," published nearly twenty-five years ago, described the men she saw as "small, ugly, kindly looking, shriveled, banty-legged, round-shouldered, concave-chested, pin-looking beings," while the women "are, as a rule, small, and very small." Russians, however, who have had occasion to see the Japanese do not agree with Miss Bird.

That Acid Trouble. Colusa, Cal., April 18th.—Much has been said and written recently about Eric Acid in the system; what causes it and how to get rid of it. It is known to be the first cause of Rheumatism and many other diseases and has therefore received a great deal of attention from medical men.

Mr. L. F. Moulton of this place claims that he has solved the problem of how to get this acid out of the system. He says:

"I had this acid trouble myself for years. At times the Kidney secretions would be very profuse and at other times scant, but the acid was always my greatest trouble. Medicine failed to cure me till at last I heard of a remedy called Dodd's Kidney Pills and after taking a box I seemed to be entirely cured. However, it came back on me and this time I took several boxes, with the result that I was completely and permanently cured. This was three years ago and I have not had a single symptom of the acid trouble since. I am 75 years of age and I am well as ever I was."

No woman with a grain of sense ever lets a man gather from her remarks that his character offers any intricacies to her comprehension.

Many who formerly smoked 10c cigars now smoke Lewis' "Single Binder" straight 5c. Lewis' Factory, Peoria, Ill.

When a man places reliance on a woman's judgment he is apt to go to a man to have it confirmed.

Why It is the Best is because made by an entirely different process. Defiance Starch is unlike any other, better and one-third more for 10 cents.

Lots of men get religion when they get sick.

THE BEST POMMEL SLICKER IN THE WORLD TOWER'S FISH BRAND Like all our waterproof coats, suits and hats it is often imitated but never equalled. Made in black or yellow and fully guaranteed by A. J. Tower & Co., Boston, Mass.

Old Sofas, Backs of Chairs, etc., can be dyed with PUTNAM FADELESS DYES. It is a wise hen that gets in the smart set. A man seldom lets himself loose until he gets tight.

Labouchere's Numerous Libel Suits. Henry Labouchere, the stormy petrel of British journalism, has just fought his forty-fourth action for libel and he lost, being condemned to pay \$5,000 damages for saying that a certain physician was not duly qualified and that he was a quack. This is the heaviest verdict ever brought against the editor of Truth, but as he is a very rich man, it is possible he thinks the run worth the money. Of the forty-four suits he won nineteen, lost eight, in two the juries failed to agree, five were settled out of court, and ten were withdrawn by plaintiffs who did not care to face trial.

The April Atlantic. Following are among contents of the Atlantic Monthly for April: Christian Science, The Frenchwoman's Son, An American Primer, Life's Tavern, The Sicilian Highlands, The Common Lot, The Ethics of Business, Invokation, Lugging Boat on Sowadnehunk, Part of a Man's Life, Some Recent Aspects of Darwinism, Notes on the Scarlet Letter, The New American Type, The Age Limit, An Odd Sort of Popular Book, When I Practiced Medicine, Books New and Old: Byways of Literature.

More Flexible and Lasting. won't shake out or blow out; by using Defiance Starch you obtain better results than possible with any other brand and one-third more for same money.

The Only Parlor Left. Here is a story from the veldt. When Joseph Chamberlain traveled to De La Rey's country he found that the only hall available was very small for the audience he wished to address, and accepted De La Rey's offer of "his parlor." When he reached the ruins of De La Rey's house, however, he found a platform built out on to the open veldt. "But where is the parlor?" asked the statesman. "That is the only parlor you have left me," replied the soldier.

With a decent supply of good will any man can be honest on a desert island.

STATE OF OHIO, CITY OF TOLEDO, ss. I, FRANK J. CHENEY, make oath that I am senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every copy of CATALPINE that cannot be cured by the use of HALL'S CATALPINE CURE.

FRANK J. CHENEY, sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1890.

A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for circulars free.

F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, etc. Take Hall's Family Pills for constipation.

Oh, yes, there's any amount of honesty on earth. Honesty that hasn't been used.

It is the interest of every member of the STATE FARMER'S MUTUAL INSURANCE CO. to help it along. The company belongs to the members. The officers are their servants. Each member is only liable for his share of losses and expenses, according to the amount of insurance he carries.

Members are assessed at the end of two years, after the insurance was first written upon all their policies for the time insured, and assessment follows every two years.

We have paid our members over \$50,000 in losses. Cannot you help some of your neighbors to its benefits? B. R. STOFFER, Sec'y., South Omaha, Nebr.

Kemble, the artist, was sketching in the mountains of Georgia recently, when he fell in with a particularly angular "cracker." The man posed for him in various positions, spending over an hour, and when Kemble asked, "What do I owe you for your trouble?" the mountaineer answered, "I reckon a dime'll be about right, suh." The artist showed him the sketches and asked what he thought of them. "Wall," was the drawing reply, "seems to me its mighty puddin' business for a man to be in, but you must be makin' suthin' out of it or you couldn't afford to throw away money like this for jest gettin' a man to stand around doin' nuthin'."

Sir Horace Plunkett tells a story of his ranching days in the west. Riding into camp one evening he turned his horse loose and got some supper, which was a lively-cooked meal, even for a cow camp. Recognizing in the cook a cowboy he had formerly employed, Sir Horace said to him: "You were a way-up cow hand, but as cook you are no account. Why did you give up riding and take to cooking? What are your qualifications, anyway?" "Qualifications!" he replied, "why, don't you know I've got varicose veins?"

McClure's for April. McClure's for April is fairly stunning in its effect. The first of a series of articles on "The Enemies of the Republic," by Lincoln Steffens, which will consider the misgovernment of states, takes up Missouri and gives the reader a shock he will not soon forget. It is almost paralyzing in its relentless array of fact and logic concerning corruption as a custom, a system, a revolution in government. It is the bribe-giver, not the bribe-taker, who is really responsible for the bad government, Mr. Steffens points out.

Insist on Getting It. Some grocers say they don't keep Defiance Starch because they have a stock in hand of 12 c. brands, which they know cannot be sold to a customer who has once used the 10 c. pkg. Defiance Starch for same money.

Rugs piled upon carpets, three curtains to a window, and sixteen non-touchable pillows to a couch, are not among the sins of the bachelor girl. The uncluttered house is hers.

Old Sofas, Backs of Chairs, etc., can be dyed with PUTNAM FADELESS DYES. It is a wise hen that gets in the smart set. A man seldom lets himself loose until he gets tight.

HORTICULTURE

Planting in Blocks. It is not advisable to plant any one variety of apples, pears or plums in blocks, even of a hundred, unless there are other varieties on all sides of the block. Within comparatively recent years it has been discovered that many of our varieties of the above mentioned fruit are largely infertile to their own pollen, some more so than others. This kind of planting has caused many a good orchard to be infertile, without the owner even suspecting the true cause.

It was first found that plums required to be cross-pollinated to insure a harvest. Then some one discovered that the Keiffer pear was a very uncertain quantity without some other varieties near it. The investigation was continued, with the result that several other varieties of pears were found to be in need of cross-fertilization. At last the scientists determined to what extent the apple came under the same laws as to pollination. To the surprise of almost every one it was proved that very few of our varieties of apples do as well fertilized by their own pollen as by the pollen of another variety, and some of the varieties are found to be almost sterile when fertilized by the pollen of that variety. It is, therefore, best to set out apple, plum and pear trees that the pollen of one variety may be used on another variety. This will greatly increase the probability of a crop.

Retopping Apple Trees. This is the time of year when much of the grafting work is done. There are a good many trees in the orchard that may be made valuable by being entirely top-worked. The trees that proved not true to name and are bearing inferior apples in place of the good ones they were supposed to bear, can be made to bear the good kind in a very small number of years. It is surprising how many trees of an unsatisfactory nature are allowed to go on year after year producing fruit that is only fit for the hogs or for cider.

A whole new top can be started on a tree in three years, cutting off one-third of it each year, and inserting scions of the desired variety. If the whole top were cut off the first year, it would generally result in killing the tree. By cutting off only one-third each year, the circulation of sap is kept up, and the scions of the first year start a good growth. On the second year, when the second third of the top is cut off, the first year scions have developed into fairly good-sized branches, and by the third year the new growth of wood made by the scions previously cut is enough to keep up the circulation of sap in the body of the tree, which would be the part of the tree to first fall in its function, if all the limbs were cut off and the stumps grafted in one year.

Cherry Growing in Iowa. Iowa is making steady progress as a fruit growing state. The census of 1890 reported 5,140,588 apple trees growing within her borders. In 1900 the number had reached 6,869,588. In 1895 there were 707,506 plum trees in the state; in 1900, 1,302,217. In cherry trees the increase is even more striking, there being 200,000 trees in 1890, against 800,000 in 1900. While the climate of the northern part of the state is no doubt too severe for successful cherry growing with any except the hardiest varieties, this delicious fruit can easily be grown in the central and southern parts. The tree is handsome and ornamental and is appropriate for lawn and garden.

Washing Milk Cans. The washing of milk cans is not so easy as it sounds, if the cans are to be made clean. The usual methods of washing leave them apparently clean, but in reality with so many millions of bacteria hiding in the seams that they soon sour any milk that comes into them. Neither hot water nor cold water should be put into cans first. A lukewarm water should be used before any other and the cans thoroughly rinsed out with that. Then use some warm water and washing soda. After that use boiling water and let the water stand in the cans for a few minutes to kill any possible bacteria. After the cans have been emptied of this last water let them stand or lie where the sun will shine into them for some hours. This is the process that has to be followed by many of our dairymen that furnish milk to the condensing factories.

Dairying in Colorado. Some of the figures recently published on Colorado dairying follow: 8,000 cows supply milk to Denver, and 43,000 daily supply milk to the rest of the state. It takes 25,000 cows to supply the cream used. About 45,000 cows are supplying milk to creameries and 7,000 are supplying milk to cheese factories. It is estimated that 12,000 cows are supplying butter to the ranches. The annual milk consumption for the entire state is put at 89,425,000 quarts, and the number of quarts of cream used is reported at 5,475,000. The value of all cows in the state is given as \$5,119,500 and the wholesale value of the milk is placed at \$2,906,312.

Knowing the Business. To be a successful breeder of swine, a man must know the business thoroughly. He must be so well acquainted with every detail that mistakes will be few and always small. The man that knows all the ins-and-outs of his business can alone keep it straight. It is impossible to make rules and have them do the work. Rules are good but the big dealer must know all about his business even if he cannot carry out the details. Unless he does know about all the parts of his work he cannot know when the details are properly carried out. There are a good many men that make a success of swine raising, and there are a good many men that make a failure of it. It is evident that the men that make the successes are the ones who know most about what they are doing. It is doubtful if many of the successes come to the men that know about their business only in a general way.

Soil for Apple Growing. A good fertile soil, porous, loamy, with plenty of humus, potash and lime, so as to give fair to good crops of grain or grass, is the most to be desired, while the nearest approach to these requirements would be my next choice—a soil that dries out quickly, so that it can be plowed soon after a rain, one that works easily, so as to get the best results with the least labor; a soil that will give a good crop of corn while we are growing the trees; a soil that will not bake too easily, is one that is always desirable. Now comes a rocky or gravelly soil, which is nearly always good, the only drawback being that it takes more work to get results. These soils are found in abundance in all our mountain districts, and nearly always they are good fruit soils.—L. A. Goodman.

DAIRY

Slow Progress in Butter-Making. In the middle west we have four states that are particularly noted for dairying, Iowa, Minnesota, Wisconsin and Illinois, said Prof. G. L. McKay in an address. Iowa, Minnesota and Illinois are especially adapted for butter-making, Iowa being the banner state, as more butter is made here than in any other state in the union.

This has the effect of making us rather boastful, in fact, it is a common thing to hear some of our public men eulogize this state so much that we sometimes overlook what they are doing in other states. It is true that we have things to boast of, but when we approach the question of milk production, we find that we have not kept abreast of the times as compared with the advancements made along other lines of agricultural pursuits.

In the year 1830 it required 17 1/2% worth of labor to produce one bushel of wheat. In 1896 it required but 3 1/2%. In 1850 the average time required for producing a bushel of corn was four and one-half hours. Take up the progress that has been made in the horse business. Not many years ago a three-minute horse was considered quite a novelty; to-day a three-minute horse ranks nothing better than a good driver. When we speak of a fast horse now, we look for a two-minute horse. See the great progress that has been made in the beef business, good sires selling way up in the thousands. What do we find in the dairy business? The average of our state, 140 pounds of butter per cow, in this enlightened age. We certainly have nothing to boast of in such a record as this. It is true that we have some herds in the state that are averaging over 300 pounds per cow. There is no reason why every dairymen in the state should not strive for a herd of this kind. When we get such herds we will hear no complaints that dairying does not pay.

The rapid increase in the price of land during the last five or six years makes it necessary that farmers must farm more intelligently than they have ever done before. Economic problems must be studied more carefully if we expect to get adequate returns from the money invested. We have a country as well adapted for dairying as any in the world. Our soil is rich, our climatic conditions are good, and we have an abundance of grass and pure water. In connection with this we have a progressive, intelligent people. Nevertheless, we must admit that we are producing milk just about as expensively as we did twenty years ago.

Free to Twenty-Five Ladies. The Defiance Starch Co. will give 25 ladies a round trip ticket to the St. Louis Exposition, to five ladies in each of the following states: Illinois, Iowa, Nebraska, Kansas and Missouri who will send in the largest number of trade marks cut from a ten cent 16-ounce package of Defiance cold water laundry starch. This means from your own home, anywhere in the above named states. These trade marks must be mailed to and received by the Defiance Starch Co., Omaha, Neb., before September 1st, 1904. October and November will be the best months to visit the Exposition. Remember that Defiance is the only starch put up 16 oz. (a full pound) to the package. You get one-third more starch for the same money than any other kind, and Defiance never sticks to the iron. The tickets to the Exposition will be sent by registered mail September 5th. Starch for sale by all dealers.

In the April Century. There will be four color-pictures in the April Century: "The Easter Hymn," frontispiece, by Violet Oakley; "The Easter Bonnet," by Anna Whelan Betts; and drawings, by Maxwell Parrish, of the famous Villa d'Este at Tivoli and the pool of the Villa d'Este. These last two will illustrate, with other drawings in black and white by Mr. Parrish, Edith Wharton's paper on "Villas Near Rome." The woodcut in Timothy Cole's Old Spanish Masters series will be Morales' exquisite "Madonna of the Little Bird." Another notable feature of the issue will be a double-page drawing, by Jules Guerin, of "Easter in Greeley Square, New York City," showing the flower market in its Easter array.

A similarity of tastes in jokes is a great assistant to marital felicity.

The United Mutual Hail Ins. Ass'n is the oldest, is the strongest, is the best; has paid \$159,000.00 more for losses than the combined payments of all other companies. Paid \$52,596.10 in 1903. Has paid \$200,911.80 for losses since its organization. Wants good representatives in every precinct. Address Home Office, 116 South 10th Street, Lincoln, Neb.

It is sometimes better to stay where you are than to jump at conclusions.

Wiggle-Stick LAUNDRY BLUE Won't spill, bleach, freeze nor spot clothes. Costs 10 cents and equals 20 cents worth of any other bluing. If your grocer does not keep it send 10c for sample to The Wiggle-Stick Blue Co., 14 Michigan Street, Chicago.

Any work is easy enough after you once get down to it.

Those Who Have Tried It will use no other. Defiance Cold Water Starch has no equal in Quantity or Quality—10 c. for 10 cents. Other brands contain only 10 c.

Insects Ride Free. Secretary Shaw's decision that frogs are poultry, and subject to duty, recalls the story of the passenger and a guard on an English railway car, who were having a heated discussion over whether the travelers should pay fare on a dog that accompanied him, the guard insisting that the rules of the road demanded that the animal have a ticket. Another passenger produced a turtle from his pocket, and sarcastically asked the guard if he would not require a fare to be paid for that animal as well. The guard answered that he would enquire and report later. Soon after he came back to the carriage and delivered himself of the following: "Cats is dogs, and rabbits is dogs, but 'tortoyases' is frogs, and frogs is hincets, and they rides free."—San Francisco Argonaut.

It is interesting to know, in connection with Mr. Jerome's legal and legislative campaign against gambling, that Monte Carlo is not only doing a business, the annual profits from which are about \$5,000,000, but it is keeping abreast of the times, by adding bridge, baccarat and poker to the attractions which help to separate players at the resort from their money. However, Monte Carlo has no "lid" and no Jerome.

Miss Bird, in her book entitled "Unbeaten Tracks in Japan," published nearly twenty-five years ago, described the men she saw as "small, ugly, kindly looking, shriveled, banty-legged, round-shouldered, concave-chested, pin looking beings," while the women "are as a rule small and very small." Russians, however, who have had occasion to see the Japanese, do not agree with Miss Bird.

Deputy Sheriff David Dean of Taunton, Mass., has a pair of handcuffs with a history. They were presented to him by Major Jones in 1873, when the latter was at the head of the state police. Since that time, the sheriff says, they have been on the wrists of every man on trial for murder or manslaughter in Plymouth county.

The postmaster at Nails, Ind., has resigned because he found it next to impossible to live within his salary, which is \$19 a year. Which all goes to prove that the cost of living is increasing.

Kansas is loyal, if nothing else. A Sunday school teacher at Kansas City asked her class where Christ was born, and about half the children replied in chorus, "In Kansas."

Fortune never disappoints the man who knows he will fail.

The Man of Sorrows was not much of a man for signs.

"PE-RU-NA TONES UP THE SYSTEM IF TAKEN IN THE SPRING."
SAYS THIS BEAUTIFUL YOUNG GIRL.

MISS MARJORY HAMPTON, OF NEW YORK.

Miss Marjory Hampton, 2616 Third Avenue, New York City, writes: "Peruna is a fine medicine to take any season of the year. Taken in the spring it tones up the system and acts as a tonic, strengthening me more than a vacation. In the fall and winter I have found that it cures colds and catarrh and also find that it is invaluable to keep the bowels regular, acting as a gentle stimulant on the system. In fact, I consider it a whole medicine chest.—Miss Marjory Hampton.

PURE BLOOD.

Blood Impurities of Springtime—Cause, Prevention and Cure.

Dr. Hartman's medical lectures are eagerly scanned by many thousands of readers. One of the most timely and interesting lectures he ever delivered was his recent lecture on the blood impurities of spring.

The doctor said in substance that every spring the blood is loaded with the effete accumulations of winter, deranging the digestion, producing sluggishness of the liver, overtaxing the kidneys, interfering with the action of the bowels and the proper circulation of the blood.

This condition of things produces what is popularly known as spring fever, spring malaria, nervous exhaustion, that tired feeling, blood thickening and many other names.

Sometimes the victim is bilious, dyspeptic and constipated; sometimes he is weak, nervous and depressed; and again he may have eruptions, swellings and other blood humors. Which ever it is, the cause is the same—effete accumulations in the blood.

Nothing is more certain within the whole range of medical science than that a course of Peruna in early spring-time will perfectly and effectually prevent or cure this almost universal affection.

Everybody feels it in some degree. A great majority are disturbed considerably, while a large per cent of the human family are made very miserable by this condition every spring.

Peruna will prevent it if taken in time. Peruna will cure it if taken as directed.

Peruna is the ideal spring medicine of the medical profession. If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

CONSUMERS OF SHOES
ALWAYS ASK FOR THE BEST WESTERN MADE SHOES.

These brands will guarantee you a good shoe for men:

Star and Crescent Comet **E. Z. Walker Cock of Walk**

Our PRAIRIE QUEEN leads all others in Women's and Children's Shoes. See that our name is on the shoes you buy.
