

Mrs. Dora B. Frazier, No. 140 Althea St., Providence, R. I., has been cured of Nervous Prostration by the use of

Dr. Williams' Pink Pills For Pale People.

She says: "I suffered for three years and was several times at the point of death. My weight went down to seventy-five pounds. I was afflicted with nervousness, dizziness, suffocating spells, swelling of limbs, sleeplessness and irregularities. I had a good doctor but he could not help me. The first box of Dr. Williams' Pink Pills did me good and I continued their use until I was cured. I am now perfectly well."

These pills are a specific for all disorders of the nerves from neuralgia to partial paralysis.

Sold by all Druggists.

Deep Sea Temperatures.

about 31 degrees Fahrenheit, and in mill. the Norwegian sea from 30.2 to 29.5 degrees Fahrenheit.

During the last Swedish Antarctic as 29 degrees Fahrenheit.

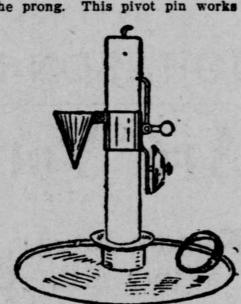

deep-water mass, both characterized by low temperature, and between them a body of relatively warm water. But this section shows two remarkable features, the intermediate warm current is here faintly developed, and in consequence a very large part of the section is occupied by the bottom water, the temperature of which is only 29.66 to 29 degrees Fahrenheit. The latter figure is but three-tenths of a degree Fahrenheit above the point of equilibrium between sea water and ice.-Montreal

Electrical Clock Regulator. A new method of driving and regu-

tating clocks electrically by the use of selenium cells has been devised by Herr K. Siegl. The selenium cell, by Ruhmer, in an exhausted pear-shaped oulb, was placed in the focus of a parabolic cylindric mirror, so that the light from an incandescent lamp could impinge upon the cell whenever a secands pendulum passed its lowest fastened on the pendulum coincided with a slit on a fixed screen. The effect on the selenium is made to actuty, owing to the lagging of the cellso that an impulse is imparted to the pendulum at the right moment. An-London Engineer.

Candle Extinguisher.

There is always great danger in carrying a lighted lamp, especially in going up or down stairs, and so many people realize this danger that they prefer to use candles. The device shown here is simply an extinguisher for candles, being adjusted to extinguish the candle after a. predetermined amount of the light has been consumed. An alarm bell is attached to the extinguisher, so that it may be tinguisher can operate to enable the user to adjust it. The cap on the left of the candle is in the form of a hollow cone, pivotally hinged to the cylindrical bracket which is secured to the candle. A small prong projects upward from this bracket, resting against the candle, while another pivot pin on the opposite side presses into the candle a short distance above the prong. This pivot pin works in

Extinguishes the Candle.

connection with a striking head for taking the things that don't belong to the bell, so that when the candle burns to the pivot pin the latter is released, permitting the head to strike the bell. When the candle burns farther down to the prong, a coiled spring releases the cup, which rises and descends over the flame of the candle, extinguishing it. George Stevenson of Dunedin, New Zealand, is the patentee.

Can See Bed of Stream. Capt. Louis Larsen, a Michigan sailor, has devised a pleasure boat with a glass bottom, which has under the bottom an electric light that can be used to illuminate the bed of a stream, her feet frozen off than wear comfort. not too deep, of course, and enable the occupants of the craft to take photographs of whatever may be interesting under water. There is also a hooded reflector which makes it possible to sit quietly in the bow or stern of the boat and see fishes or any form of aquatic life which may happen to come near the transparent bottom of

> Horse Chestnut and Buckeye. L. M.—Are the horse chestnut and keeping up the price. It constitutes the buckeye the same? How can I a roseate prospect for this country, grow them from the seed?

The horse chestnut and buckeye, al- sion of the Dominion into the actual though somewhat similar, are quite position of the "granary of the emdifferent trees and belong to different pire." genera. The horse chestnut belongs sounded a few minutes before the ex- to the genus Aesculus, and the buckeye to the genus Pavia, both, however, making other people believe what you closely related. In order to grow them | don't believe yourself. successfully from the seed, the nuts should be planted before they become dry. Soon after they are ripe in the autumn is the best time. The nuts should be planted about two inches brand and one-third more for same

> A Durable Ice House. H. I. S .- I wish to build a durable ice house and would ask you to describe how best to construct it.

An ice house built of cement-concrete would last for generations and be quite satisfactory. The concrete walls of an ice house should receive a coat of cement plaster both inside ants. and out, to exclude all air. The bottom or floor of the building should be of concrete and slope down to a ter Starch has no equal in Quantity drain, in order to draw off all water that may run from the ice. The drain should have a trap so that no air car enter the house through it. The con crete walls need not be over six or eight inches thick (according to their height) and when filling the ice house the ice should be kept six inches away from the walls and the space filled with dry sawdust.

Hazel Brush.

Subscriber-How can I rid my land of hazel brush without plowing it up?

Loosen the clumps by digging round them and after cutting the roots close to the stems with an axe. pull them out with a horse and chain. This will probably be easier than cutting the bushes and burning the brush and then plowing, and the land will be in much better shape for using at once. I don't quite understand your objection to plowing your land, but if it is to save pasture among the bushes I think you would have better results by cleaning your land of the hazels either by slashing and burning or hauling out, and then plow and reseed the land .- J. F.

Tree Planting in the Fall. E. R. C .- Could maple and cedar trees be planted in the fall with any degree of success? What kinds of trees may be planted in the fall?

Maple trees and cedars may be that if they will buy Defiance Cold planted in the fall with success. The Water Starch for laundry use they sooner it is done now the better. will save not only time, because it Spring planting, however, is prefer never sticks to the iron, but because able, providing the planting is done each package contains 16 oz.—one full as soon as the ground is dry enough. pound-while all other Cold Water eral oils. Some people know too much to believe anything.

Mrs. L. C. Glover, Vice-President Milwaukee, Wis., Business Woman's Association, is another one of the million women who have been restored to health by using Lydia E. Pinkham's Vegeing himself behind a bush he taught table Compound.

> "DEAR MRS. PINKHAM: - I was married for several years and no children blessed my home. The doctor said I had a complication of female troubles and I could not have any children unless I could be cured. He tried to cure me, but after experimenting for several months, my husband became disgusted, and one night when we noticed the testimonial of a woman who had been cured of similar trouble through the use of Lydia E. Pinkham's Vegetable Compound, he went out and bought a bottle for me. I used your medicine for three and one-half months, improving steadily in health, and in twenty-two months a child came. I cannot fully express the joy and thankfulness that is in my heart. Our home is a different place now, as we have something to live for, and all the credit is due to Lydia E. Pinkham's Vegetable Compound. Yours very sincerely, Mrs. L. C. GLOVER, 614 Grove St., Milwaukee, Vice President, Milwaukee Business Woman's Association. - \$5000 forfeit if original of above letter proving genuins-ness cannot be produced.
