New Material and New Ideas for the Decoration of Homes. The styles of home decorations have completely changed in the last few years, and it is pleasant to say that they have changed for the better. Time was when we hung monstrous patterns printed on paper against our walls, and considered them more or less pleasantly. It would hardly be fair to say that we considered them beautiful or artistic. But they were the vogue and were put on. The time has come when, with our better methods for interior decoration, better ef-

fects can be secured. In wall coverings, whether they be of paint, or of kalsomine, or of Alabastine-whatever the material used to cover the wall-the thing desired is that which has the greatest covering power, as well as permanency and beauty of color. With Alabastine there need be no discomfort and there can be no muss, for all that is needed is to lay a sheet or canvas on the floor, have your man come in with a pail, make the solution and simply brush it on the wall. That is all there is to it, and the room is perfectly clean and thoroughly renovated.

Idea for Edwin Markham.

Gov. William L. Douglas of Massachusetts, some time ago had as his guest at his beautiful Brockton home Edwin Markham, the poet. The famous merchant-statesman in his modest collection of pictures had a copy of Francois Millet's famous painting, "The Angelus," from which Mr. Markham is supposed to have got his inspiration for his poem, 'The Man With the Hoe." The two discussed the merits of the picture at length and in detail not missing any of its many virtues.

"There," said Mr. Markham, pointing to the great wooden sabots worn on the feet of the peasant, "shows a great evolution to your product of the present day."

Mr. Douglas's advertising instinct humorously asserted itself, and he

KNEES STIFF, HANDS HELPLESS RHEUMATISM NEAR HEART.

Mrs. Van Scoy Experiences Dangerous After-Effects from Grip and Learns Value of a Blood Remedy.

The grip leaves behind it weakened vital powers, thin blood, impaired digestion and over-sensitive nerves-a condition that makes the system an easy prey to pneumonia, bronchitis, rheumatism, nervous prostration, and even consumption.

The story told by scores of victims of the grip is substantially the same. One was tortured by terrible pains at the base of the skull; another was left tired. faint and in every way wretched from anæmia or scantmess of blood; another couldn't sleep; another was left with weak lungs, difficulty in breathing and acute neuralgia. In every case relief was sought in vain until the great bloodbuilder and nerve-tonic, Dr. Williams' Pink Pills, was used. For quickness and thoroughness of action nothing is known that will approach it.

Mrs. Van Scoy makes a statement that supports this claim. She says:

"I had a severe attack of grip and, before I had fully recovered, rheumatism set in and tormented me for three months. I was in a badly run-down state. Soon after it began I was so lame for a week that I could hardly walk. It kept growing steadily worse and at last I had to give up completely and for three weeks I was obliged to keep my bed. My knees were so stiff I couldn't bend them, and my hands were perfectly helpless. Then the pains began to threaten my heart and thoroughly charming complexion will result from did it was only temporary, and on the

The Young Physician.

WHAT HIS EXPERIENCE PROVED.

In the early sixties it was usually the duty of a practicing physician to ride many miles every day on his regular round of visits upon his patients. In those days a young man who had received | best medical colleges of that day was accustomed to ride ten, twenty or thirty miles or more visiting the sick and afflicted. His success was soon phenomenal. Doctors and families called him for consultation to towns at considerable distances by rail. One of his specialties was the cure of those distressing diseases of women. He had early discovered that by combining the vegetable extract of hol-his prescription invariably cured such cases. Later, in order to place this remedy before the public in a shape easily to be procured, he established a labora-tory at Buffalo, N.
