berculosis-in the Land of the Midnight Sun. This expedition is in charge of Dr. Frederick Sohon of Washington, who was in the arctic regions twice with Commander Peary.

Thirty victims of tuberculosis went aboard the steamer Havana at Halifax on June 15, preparatory to a voyage quite without a parallel in medical records. When it is remembered that the modern plague of civilization has spread with such alarming rapidity within the past few years as to have dwarfed war as a life-taking force, and that its prevalence to-day is greater in the United States than insanity, not to mention other diseases, the importance of this expedi tion can hardly be overestimated.

Not many years ago consumption was regarded as non-infectious. Now it is known to be otherwise. The once accepted theory as to its heredity has been exploded. As a matter of fact, remarked Dr. Sohon in discussing the expedition and his hopes of it, tuberculosis comes like a thief in the night or as a lightning flash from a surny sky. It is no respecter of persons, age or caste. Rich and poor, strong and weak are alike victims of its stealthy approach.

Demonstrations recently made have established beyond a doubt that the fresh-air-and-sunshine cure is almost in allible. But under ordinary conditions it is a slow and tedious operation, reuiring more time than the average person has to spare in this there is a natural forcing of everystrenuous age. Dr. Sohon believes that three months spent in the germproof regions of the North will rout the disease sufficiently for the victim to throw it off completely

July, August and September above the arctic circle, will be three months of never-ceasing sunshine-every hour in the twenty-four. Think of the curative properties stored in a continuous sun bath of fourteen weeks! For it is into such a polar day that the Ha- aurora borealis. It proposes something easily obtainable and better than we have at along the shores of Greenland. Secpresent—the highest development of ond only to milk, raw eggs swallowed all that has proved beneficial in the rational treatment of tuberculosis.

"Our present- procedures, if thor oughly carried out, ought to cure a proportion of cases far beyond what are usually accepted as fair results. One person in four contracts tuberculosis, and one death in seven is from this cause alone-which would that required of a sanitarium inimply only 44 per cent of recoveries.

"A summer spent in Omenak fjord or Irglefield gulf, where we purpose anchoring and biding a while, would serve to establish a cure, or insure its accomplishment afterward, in nearedge have gone to these places and indorsements which promise well for had to use it was when my employer Stacks." in each case the cure was immediate the success of the novel journey into and effectual. Two of them were for three months in the Peary expedition. and the third, a well advanced case, was for nine months aboard a whaler. Some Eskimos brought to this country soon contracted virulent tuberculosis. four of them quickly succumbing, one being still uncured here, while the only one who returned to his native snows recovered. One hundred per cent of recoveries in four cases is of course not conclusive evidence, still it includes all known cases. So we are warranted in drawing the most promising conclusions.

"While it is difficult to believe that a cure may be worked in a few months, it is also hard to comprehend the unfamiliar conditions of so strange a climate and country as exist up there. In the Arctic circle thing that invites a natural cure. Two days of sunshine are rolled into one, with an increase of the rays that influence metabolism, as the polar atmosphere is shorn of ingredients which with us interfere with the transmission of vibrations beyond the violet. "Repair My Heart with Gladness and a Share of Thy Meek Nature."-Wordsworth

In fight to cover!

With little here to do or see
Of things that in the great world be,
Daisy! again I talk to thee,
For thou art worthy, Thou unassuming commonplace Of nature, with that homely face. And yet with something of a grace, Which love makes for thee!

Oft on the dappled turf at ease I sit, and play with similes, Loose types of things through all grees,
Thoughts of thy raising:
And many a fond and idle name
I give to thee for praise or blame,
As is the humor of the game,

A nun demure of lowly port,
Or sprightly maiden of love's court,
In thy simplicity the sport
Of all temptations:
A queen in crown of rubies drest,
A starveling in a scanty vest,
Are all, as seems to suit thee best.
Thy appellations.

A little cyclops, with one eye
Staring to threaten and defy,
That thought comes next—and instantly
The freak is over.
The shape will vanish—and behold
A silver shield with boss of gold.
That spreads itself, some fairy bold
In fight to cover!

I see thee gliftering from afar-And then thou art a pretty star; Not quite so fair as heaven above thee Yet like a star, with glittering crest, Self-poised in air thou seem'st to rest; May peace come never to his nest, Who shall reprove thee!

Bright flower! for by that name at last,
When all my reveries are past,
I call thee, and to that cleave fast,
Sweet silent creature!
That breath'st with me in sun and air.
Do thou, as thou art wont, repair
My heart with gladness, and a share Of thy meek nature!
-William Wordsworth.

A Soldier's Singing. Give me three breaths of pleasure After three deaths of pain,

The first breath shall be laughter, The second shall be wine; And there shall follow after A kiss that shall be mine.

The ways that were in vain.

Roses with dew-fall laden One garden grows for me; I call them kisses, maiden. And gather them from thee.

Give me three kisses only— Then let the storm break o'er The vessel beached and lonely Upon the lonely shore Give me three breaths of pleasure After three deaths of pain, And I will no more treasure

The hopes that are in vain.

-Gouverneur Morris, "Aladdin O'Brien." The Memorial to Mother Bickerdyke. The land is dotted with monuments, in memory of heroes of the Civil war, dyke" is the first for a woman of the

The design, like the woman it is intended to commemorate, is strong and simple. A wounded soldier on the battlefield has been tenderly lifted into a half-sitting posture by the army nurse, while she holds a cooling drink to his parched lips. The figure of the soldier is admirably done, and there is fine feeling in the figure of Mother Bickerdyke-the plain, tender woman whose mission it was to relieve suffering soldiers wherever she found them. Her hair is done up simply. Her dress is that of the army nurse, but the feeling of genuine tenderness in the face and figure of the woman positively ennobles her. It is truly that of a mother bending over her wounded boy and ministering to his immediate wants.

The life-size group rests on a granite pedestal without ornament, and the veterans of the organization who only the words "Mary A. Bickerdyke-Mother," inscribed on the sides. The simple lines of this pedestal and its shape lend much emphasis to the

The inadequacy of the hospital facilities and the hospital supplies shocked her and she made several trips north to arouse more interest in these matters. She inaugurated the celebrated "cow and hen" mission, through which she was enabled to regiment executed every order in glorsend 100 cows and 1,000 hens to the hospitals of the West.

In the winter of 1863-64 she went home, but returned and took part in the establishment of the Adams Block Hospital at Memphis, Tenn. This accommodated about 6,000 wounded men. From this she became matron of the Gayoso hospital, where more than 700 men had been brought in after Sherman's battle of Arkansas Post.

She next took charge in Memphis of the smallpox hospital, which she cleaned and renovated with her own hands while nine men lay dead of the disease in the building. She followed the Western armies through Vicksburg, Lookout Mountain, Missionary Ridge and Chattanooga, and tended friend and foe alike.

She next accompanied Sherman with his 100,000 men in their march to the sea. She helped care for the 13,000 men who were wounded at Resaca, Kingston, New Hope, Carsville, Altoona, Dallas and Kenesaw Mountain. When Sherman cut his base she went north, and raised great stores of sanitary supplies for the soldiers.

When Sherman entered Savannah she sailed south to take care of the liberated Union prisoners of Wilmington. She pursued her mission at Beaufort, Averysboro and Bentonville, and at the request of Gen. Logan and the Fifteenth Army Corps she marched into Alexander with the army.

Then when the last battle was fought and all the soldiers marched in the most noted figures in the great

a lot of spavined horses, but the band began to play, the bugle corps did its best, the colonel roared out the command to march, and forward we went.

"We had a mile to march before we entered the city, and when we struck the main street, along which our division was to pass in review, my men were alert, self poised and dignified. The soldier spirit was in control, and as they marched they warmed to the work and did better than usual because of the unsoldierly record of the night before. As luck would have it, the supreme test came just as we passed General Buell. Some one threw crockery at my company from the upper windows of a large house, and even the dignified general lost his composure. I knew my men must be in ugly mood, and I expected a demon-

"I did not know them then as well as I did later. Not a man batted an eye or lost step. Buell looked at them a moment, the soldier's pride in soldiers shining in his eye. Then he said quietly to one of his staff: 'Arrest every person in that house, and hold all subject to my orders.' I expected this to cause a commotion in the ranks, but only one man said, "Bully for Buell,' and he didn't turn his head. I was never prouder in my life than when we marched past the general commanding, and I knew that the soldierly spirit under the influence of martial music and scene had triumphed over the weakness imposed by debauchery. But it was a narrow escape."-Chicago Inter Ocean.

Glorious Thirteenth Illinois.

May 9, 1861, the Thirteenth Illinois regiment was mustered in. Its subsequent history was a glorious one and still live have wonderful memories over which they love to linger. At Missionary Ridge on November 28, 1863, the Thirteenth bore the brunt of the fighting of the famous Fifteenth Mother Bickerdyke's biography, corps. The terrible struggle at Lookstrange enough, is missing from the out Mountain, the conflict at Chattaencyclopedias, while those of many nooga, the fight for Lookout Rock, on women less famous are given. gold Lieutenant Joselyn, with his comreal battle, however, was at Fort Don- | ger of being cut to pieces. Once during the day it held a position singlehanded against seven southern regiments, and when the fighting was over Sherman and Hooker both personally commended the magnificent bravery of the Thirteenth, Sherman in his dispatches going so far as to say "This ious style, charging time after time in the face of grape and canister that it seemed foolhardiness to struggle against, and displaying in every part of its organization the most splendid intrepidity imaginable."

War and Peace.

During the civil war, as near as can be told, 44,238 Union soldiers were killed in battle, and 49,205 died of wounds. The Confederate losses are imperfectly recorded, but were certainly not greater than the Union. Doubling the foregoing figures and dividing by four gives a yearly loss from war of 46,722 lives.

Deaths in the Union army from disease and unknuown causes were 210 .-400. Doubling and dividing by four as above, this gives a yearly loss of 105,-200 lives. Yet this was only 3 in 1,000 of the population in 1860, whereas the death rate from all causes, while much lower than forty years ago, was still over 18 in 1,000 in 1900. Hence we cannot assume that the soldiers who died of disease would not have died had there been no war.

Of course all this does not prove that war is not a great evil. But it does prove that those who argue against war ignore the fact that it is little, if any more, destructive of human life than the daily work of peace.

Explosions on Old Battlefields. The forests in the mountains known
