RUSSIA MUST MAKE PEACE

Outbreak at Home Forces Government to Accept Whatever Terms Japan May Offer

Writing from Washington on the recent momentous events in Russia, John Callan O'Laughlin, the veteran newspaper correspondent, says:

No longer can the Russian government hold out against the inevitable. The revolutionary outbreak on the ships of the Black sea fleet makes immediate peace with Japan, what-

ever her terms, a moral certainty. This is the opinion of diplomats who know, Russia's situation. They said today the czar must accept the Japanese conditions without delay in order to be free to deal with the terrible internecine war which has begun, and they look for greater expedition by the St. Petersburg authorities in naming peace plenipotentiaries and in giving them instructions which will

lead to a cessation of hostilities. Japan, on her part, is anxious that a treaty shall be signed, so as to end the state of war; and this will not be possible should the autocracy be overthrown and a state of anarchy reign in the immense empire of the Slavs. Minister Takahira, representative of Japan, deemed the developments at Odessa, of such importance as to warrant inquiries, and he discussed the situation to-day with Secretary Taft.

Washington has been surcharged with sensational rumors in regard to the developments in Russia's internal situation. It has been said that the American consul at Odessa had cabled for warships; that all the powers Roosevelt to send men of war to the Black sea to protect foreign interests;

register of the Russian navy giving the names of the officers on duty with the Black sea fleet. All that is known is that the best officers were detached last fall and ordered to duty in connection with the Baltic squadron, then fitting out for duty under

Vice Admiral Rojestvensky. When Vice Admiral Chouknin assumed command of the Black sea fleet he made an inspection. The report which he transmitted to the admiralty described a deplorable state of affairs. The ships were dirty, the men badly trained, and there was a grave lack of discipline.

His report created a sensation in St. Petersburg, as Vice Admiral Skrydloff, who was detached from duty in connection with the Black sea fleet for service at Vladivostok, had had the record of being a good officer. But Vice Admiral Skrydloff certainly in his later years had devoted more of his time to pleasure than to duty, and the fleet suffered as a result.

Vice Admiral Chouknin at once received orders to reorganize the fleet and put it in an effective condition. He attempted to impose the strictest discipline, and he created dissatisfaction among the men and among the

The navy department has no late, state of disaffection, and no surprise would be expressed should the regiments of this arm of the military service join the revolution.

The situation is so bad that no one here cares to predict what will happen. It is suggested that the czar may try to stem the tide of discontent by making radical reforms without further delay. The trouble is that the people have so often been told that they will be given greater participation in the government and so often deceived that they will now hesitate, it is said, to stop their revolutionary work until they have realized the hopes which have been inciting them to the use of force.

The czar is handicapped by the absence of a strong man from his gov ernment. One official said there is a dead level of mediocrity in the bureaucratic machine. In his opinion, and in that of diplomats here, if there is a man who can save autocratic Russia, that man is Sergius De Witte, exfinance minister of the empire. The more thoughtful men in St. Petersburg have urgently recommended that he be made chancellor of the empire. The czar has refused to adopt this advice because of his detestation of this man of the people.

Nor has De Witte attempted to advance his own interests, even by remaining silent. He has sharply criticised the emperor and the bureaucracy, and has predicted that if the methods of government were not changed a revolution would occur. It can be appreciated that the emperor **ODESSA A GREAT CITY**

CIVEN TO THE PUBLIC

The following figures on the shipments of wheat, corn, oats, barley, rye and hay made in Nebraska during 1904 was given out by Chief Clerk Don C. Despain of the Bureau of Labor and Statistics. The totals show that the farmers of the state had a surplus of 73,294,753 bushels of small grain and 129,071 tons of hay, which represents an approximate value of \$45,000,000. The total shipments of corn, 45,031,409 bushels, is equivalent to 19 per cent of the total crop of Rev. J. T. Baird of the Plattsmouth 1904, and is an increase of 5,000,000 Presbyterian church closed thirty bushels over the shipments of 1902, showing that the farmers of Nebraska A. H. Phillips, of Neligh, had a large are becoming greater exporters of the firecracker explode in his hands. A king cereal each year. The quality of this been let to Chicago firms and they will and the rye shipments equal just onea half the total production of last year, while the shipments of hay equal 13

The table shows Cass county to rank first in the shipment of corn, having shipped 3,513,125 bushels, while Saunders county is a close second with 3,224,908 bushels. In wheat shipments Phelps county leads with 1,611,333 bushels, Furnas county is second with 1,385,333 bushels to its credit. Cedar county leads in oats with 1,219,052 bushels, while Knox county is second with 1,085,063 bushels. Cedar county also leads in barley shipments, its shipments totaling 157,210 bushels, while Frontier county ranks first in rye shipments with 117,520 bushels. Holt county shipped 43,542 tons of hay, thereby ranking first.

LIVE STOCK SHIPMENTS

Comparative Statistics of the Years 1894 and 1893.

LINCOLN-The shipments of live stock during the year 1904 show a considerable increase over the shipments of the year 1903, according to the statistics of the bureau of labor and statistics, which were given out by Chief Clerk Don C. Despain. The prosperous condition of the farmer and stockman is shown by the fact that there were 829,985 more head of live stock shipped in 1904 than in 1903.

The total shipments of all live stock was 4,682,333 head. In 1904 there were 955,791 head of cattle shipped, as compared with 955,263 head in 1903. The similarity of these figures is indicative of the steadiness of cattle shipments. The comparison of hog shipup to last Sunday when he was sud- ments for the two years shows an increase of 581,398 head, there being 2,742,909 head shipped in 1904 and 2,161,511 in 1903. by Consul Heenan at Odessa. Private information received at the that bad food was at the bottom of the trouble aboard the Kniaz Potemkin. A sailor approached an officer of the deck, and was impertinent and threatening in his complaint about the food. The Russian naval regulations make an officer practically the master of a man's life. The officer apparently found it impossible to induce the sailors to arrest the mutineer. He drew

his revolver and shot the man. The latter's comrades, standing near by, dashed at the murderer and killed him. They knew if they did not get command of the ship they would be hanged at the yardarm, and they attacked every other officer who failed to join them. Eight officers only of the entire complement cast their lot

with the crew. It is evident to diplomats who have studied the dispatches which have reached Washington that the trouble was not spontaneous and that bad food was not at the bottom of it. It looks to them as if the crew had imbibed revolutionary doctrines, and that they used the food question as a
