A Blighting Orchard. A subscriber writes us: "I have an orchard four years old that is blighting very badly. I have sprayed it with a mixture of blue vitriol, Paris green and lime. What further can I

do for it?" The spraying is all right, but is of doubtful efficacy in the case of blight. We would, however, approve of the spray, for a man should spray his orchard whether he knows there is anything the matter with it or not. Spraying may help keep down the blight and probably does, but it is not generally considered an effective remedy. The lime doubtless does prevent the spread of the blight to some extent by deterring bees and other insects from visiting the tender ends

of the twigs. Blight is produced by a fungus that lives over winter in the live wood of a blighted tree. In the spring there is an exudation from the tree and this liquid is partaken of by the bees and other insects, which then fly to the blossoms of apple and other trees and carry some of the spores of the fungus with them. Sometimes the tender shoots are visited and the spores left on them. The tender open tissues permit the blight spore to send in a filament at the time of its germination and thus the disease begins. The by the wind, and must be carried by insects or some other moving things. As the fungi are inside of the wood it

FOLLOWS MALARIA CONTRACTED IN SPANISH-AMERICAN WAR.

Victim Had Become Helpless When He Tried Dr. Williams' Pink Pills, but Was Cured in Four Months.

Because he did not know that there is a remedy for ataxia, Mr. Ariel endured four years of weakness, pain and the misery of thinking his case incurable. "At the outbreak of the Spanish-American war," he says, "I went with Company B, Eighth Regiment, M.V.M., into camp at Chickamauga, and while there my system became thoroughly

poisoned with malaria. When I was mustered out, I carried that disease home with me. After a while locomotor ataxia appeared." "How did the ataxia begin?"

"I first noticed a pain in my ankles

and knee joints. This was followed by a numb feeling in my legs. At times I had to drag myself around; my legs would shake or become perfectly dead. I had constant trouble in getting about in the dark. I kept a light burning in

my room at night as I could not balance myself in the darkness. Even with the aid of a light I wobbled, and would reach out and catch hold of chairs to prevent myself from falling?"

"How long were you a sufferer ?" "Four years in all. During the last three years I was confined to bed, sometimes for a week, again for three or four weeks at a time. When I was lying down the pain in my back was frequently so severe that I had to be helped. up and put in a chair to get a little relief. I had considerable pain in my bowels and no control over my kidneys. spores are sticky and cannot be blown | The worst of all was that the doctor could give me no hope of recovery."

"How were you cured?" "I read that Dr. Williams' Pink is easily seen that spraying cannot Pills had cured locomotor ataxia and reach the blight after it has become one or two friends spoke to me about settled in a tree. The only thing that them. In the fall of 1903 I began to take can be done is to cut off the blighted them for myself and I had not used portions, hoping to get below the seat more than one box before I found that of the disease. geant, "Capt. Lucius H. Drury of the Old Badger, or Third Wisconsin battery? Just previous to the battle of

Chickamauga he was Gen. Van Cleve's chief of artillery, and when Crittenden, commanding the Twenty-first corps, ordered Gen. Van Cleve to make a reconnoissance from Gordon's Mills toward Lafayette, to feel the enemy, but not to bring on an engagement, Drury managed the artillery part of the program. This was Sept.

13. 1863, and we soon 'felt the enemy.' As our regiment emerged from the woods in about the center of our line a rebel battery opened on us, and we were soon flat on the ground to escape the shot and shell. "I was not satisfied with the situa-

tion and was looking for a hole or a depression in the ground, when Maj. Drury, chief of artillery, and Capt. John J. McCook, now of New York, rode past our line and proceeded quite a distance to the front. Drury was seeking a position for his artillery and Capt. McCook was to report the situation in front to corps headquarters. As they rode forward they were fired on by the rebel sharpshooters and one of the first shots struck Drury just above the belt plate and passed straight through his body to the spine. He said to McCook: 'The blanked rebels have pinked me, but

don't let them have the satisfaction of "Capt. McCook knew with such wound the major could not retain con-

sciousness long. As they were in close range of the enemy McCook grasped Drury's sword belt with one hand to keep the major from falling off his horse, and taking the bridle rein with the other hand guided both horses into the woods for cover. Mc-Cook kept himself all the time between the major and the enemy, and own.

> Avoid the Cheap and "Big Can" Baking Powders.

The cheap baking powders have but one recommendation: they certainly give the purchaser plenty of powder for his money. These powders are so carelessly made from inferior materials that they will not make light, wholesome food. Further, these cheap baking powders have a very small percentage of leavening gas; therefore it takes from two to three times as much of such powder to raise the cake or biscuit as it does of Calumet Baking Powder. Therefore, in the long run, the actual cost to the consumer of such powders is more than Calumet would be. Cheap baking powders leave the bread sometimes bleached and acid, sometimes yellow and alkaline, and always unpalatable. They are never of uniform strength and quality.

Why not buy a perfectly wholesome baking powder like Calumet, that is at the same time moderate in price and oue which can be relied upon? Calucannot be doubted that in most situations and in most circumstances it is | met is always the same, keeps indefinitely and gives the cook the least the intensive culture that pays best trouble.

#### Sermon Moved the Stones.

This curious tale of the Venerable Fruit should not be picked on a Bede is told in the medieval "Golden warm day and put immediately into Legend": One day, when he was old cold storage or into cars for shipment.
