

#### Girdle Is Still Popular.

worthier one.

in evidence as ever, and, with the fective gown this summer. The prinprincess gown or its effect waxing in cesse silk slips that are part and parpopularity, the girdle is likely to re- cel of every modern outfit make this least.

It is still, too, in the latest gowns, purpose equally well, so far as reas pointed as ever. The fact is that the gards color, and, of course, the effect girdle is suited to the wearer and, any shape which is becoming is modish. For a slight figure there is a worthful suggestion in the cut where the waist is swathed with a deep, shaped Boudoir and girdle, pointing low at the front and extending half the width of the bodice at the top, where it ends in two points.

Of Light Blue Batiste.

batiste openwork embroidery, is a special favorite for hot-weather frocks, and the first cut illustrates a charm- but not a becoming background for ing design in light blue. The skirt, every face. finely tucked over the hips, is walking length and is finished at the foot with | buys the white net and has it dyed the three deep tucks.

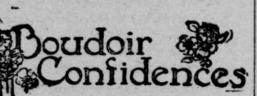

On the blouse, the embroidery is put on over the shoulders in epaulette fashion and bib front, edged all around | they are rather a relief. with narrow valennciennes dyed to match the material and embroidery. Elbow sleeves have carried all before them so far as sheer frocks are con-

very much in favor of the colored lin- | velvet. The brim is indented a little The prediction of the disappearance ens. They should be included in any at the right side of the front and the of the high girdle has become nearly complete wardrobe, as they are ex- brim lifts from there with a gentle as familiar as the one that has doomed quisite in coloring and texture; but it | curve almost to the back, but does the bolero to extinction only to find it is claimed that all the color that is ne- not roll back at all. is rather lighter.

A different chain of beads to match Batiste in light shades, trimmed in every frock is the rule of the particular ones.

The green parasol is cool looking,

Net gowns are in high favor. One desired color.

Stripes are coming into favor again and after the long reign of checks The all-flower hat is not much in evidence this season, delicate straws and

laces taking precedence. It is not so much the hat itself as the angle at which it is worn and the coiffure which it adorns that count. Broderie Anglaise seems to be about the only discovery of the season, and it is in reality only a revival of an old style.

#### The Pannier Effect.

Some noticeable frocks with pannier effect of a modest type have been in evidence and the earlier attempt to launch panniers, which met with failure, is apparently being revived in some influential quarters. However, the general tendency is toward the clinging hip lines, many of the newest skirts being sheathlike around the hips, while spreading to billowing fullness at the bottom. .

perman." woun around the crown, almost cover-The girdle, as a fact, is just as much necessary part of the finish of any ef- ing the sides with its scant folds, which disappear at the left side under masses of shaded yellow birds of paradise plumage that float out over the main prevalent for another season at change of color feasible, and if slik brim, joining the paler plumage springing out from under the curve.

> Jeweled Pin Sets. Pin sets studded with gems are in

high favor. The use of semi-precious stones makes them come within the purse of almost every one. The sets consist of two hat and two stick pins of the same material and ornamented to match. Turquoise and pearls encircled by rhinestones or diamonds are favorite mounts for these pins. In

simpler designs gold and enamel with and without pearls furnish the decora tion.

#### Of Canary Batiste.

Of pretty, sheer summer frocks there is apparently no end. and even as late in the season as this fresh models are constantly being shown. As an example, here is one in canary batiste, outlined by the tiniest frills

Did Service as Money.

would rob another of such a coin?

worked."

Coal was once used as money, but was a long time ago and in England. The coal money was in the shape of disks, approximating coins in size, and was from Roman work-

"These discarded disks have been invariably found, carefully hidden away under the surface of the ground, at a depth of about two feet, sometimes with or in Roman pottery and sometimes between two flat stones shops, where articles of ornament placed on edge, covered with a third were made on lathes. A writer says: stone at the top. That they were "On the Dorset coast, in the isle of carefully stored and hidden away is Purbeck, to the west of St. Alban's beyond question; hence they must Head, an outcrop occurs of bituminous have represented some value to the shale, which extends more or less for possessor. It would appear reasonsome miles. As a source of fuel this able to conclude that they were used shale, or coal, has been worked from by the ancient Britons as tallies, or very early times and is to the present money. The turning lathe of the enday used by the cottagers of Kimme lightened Roman was an instrument ridge. Some of this shale is of so unknown to the natives and these waste disks, bearing the tool marks of the turner, would have been as impossible to counterfeit by the savage "That they have been known from the properties of this deposit as a early times as coal money is well aufuel but also its capabilities of being thenticated. As many as 600 have turned in a lathe into rings, beads and been found together in one place, but armlets, which were no doubt readily always protected by covering stones purchased by the ladies in the im- or pottery. In size they vary from portant town of Durnovaria (Dor- one and three-quarters to two and onechester), a few miles distant. Some half inches in diameter and about oneestimate may be formed of the magni- half inch in thickness, with holes to tude of this industry by the number secure them to the mandrel of the of disks which have been discovered lathe. They are all strikingly sim-

cerned, and in this case, instead of a frill for finish, a double row of lace forms the turn-back cuff. A tab of embroidery edged with lace is set on top.

#### For Early Fall Topcoat.

For the tailor-made coat the moderately full coat sleeves, rather high and square at the shoulder, but not emphasizing these lines to an exaggerated the decollette waist, which has a front degree, and the modified gigot quite full at top and rather close below the ruffles of lace at set intervals. Small elbow, are the two models that have ruffles of lace form the shoulder caps the greatest vogue.

The gigot form may be secured by silk serves as a finish. Self-tone chifthe cutting of the plain sleeve, or may fon velvet is used for the girdle. A be attained by laying the lower part cluster of lace ruffles is set in at of the sleeves in flatly-stitched, small each seam at foot of circular skirt. vertical plaits.

There is no denying that the gigot idea predominates in sleeve modes, point below than in exaggerated fullness at the shoulder.

Crin Hats for Fall and Winter. Crin hats are to be worn all the fall and winter, and those of black crin. or trimmed with foliage in green shades, or rosettes of shaded ribbons also in greens, make one of the little hats, which is good not only for any season but for any occasion. There is a new tarpaulin hat in three-cornered shape brought in this fall which is intended for automobile wear, but which corsage to which it is united under a makes an excellent outing and rainy scarf of green satin furnished by the day hat. They can be had from \$1.50 girdle, also of green satin. up to \$5, those at the latter price, however, being as superior in both shape and softness and becomingness as it would be if they were two patent | which are motifs of guipure. leather shoes at the same price.

#### New and Likewise Pretty.

Quite new and pretty are the silk walking petticoats embroidered with eyelet work, upon flounce borders, and across headings. In grays and colors matching the costume they are most effective. More serviceable are the fine alpacas, black ones in particular, having shared flounces eighteen inches wide, covered with narrow stitched crossbands of black taffeta.

#### Serviceable Accessories.

Voile skirts with smart little coats of taffeta, usually of the bolero or short sack type, are numerous and much in vogue, giving a certain air of serviceable and loose, jaunty little festivity, are formed of one large and sacks or boleros of taffeta in the light | two small puffs edged with a deep frill colors are donned over airy lingerie of batiste. frocks in white or delicate color.

### Evening Dress in Pale Green.

Among a collection of gowns worn by a popular belle at Newport is one for evening functions, made of pale green eolienne. Tiny ruffles of white lace and green velvet ribbon run from shoulder to waist line, on each side of of silver embroidered green silk and of sleeves and a band of embroidered

## Superstition of Dog Days

Annual Appearance.

season at the Empire theater, New compliment to Miss Allen. Mr. Ca-Dog days begin, according to the traditions of boyhood, in certain parts of the United States, when the green scum, algae, begins to appear on the surface of the lakes and rivers. Then it is supposed to be unsafe to go in swimming. And it is then, that, according to the tradition of many adults as well as of boys, dogs most frequent-

ly go mad. All nations and races of civilization, apparently, have had a period during the summer known as ness of dogs, hydrophobia, was never associated with dog days by the ancients.

Dog days are a rather indefinite period, according to this green-scum rule, but there is a disagreement of authorities as to when dog days really do begin and end. According to the Century dictionary "dog days are part of the year about the time of the heliacal rising of the dog star, Sirius;" It seems to have been from the hel- 366 days.

Authorities Differ as to When | iacal rising of Sirius that the ancients This Most Unpleasant Part of most commonly reckoned the dog Summer Really Puts in Its days. Thus at the present time, dog days would begin July 3 and will end Aug. 11. Sirius is the brightest star in the heavens and it was easy to associate the mutual heat of the brightest star and of the sun with the hottest and most unkindly period of the year. Hippocrates (450 B. C.) declared

the dog days to be the most unhealthy

part of the summer. Dog days are continually dropping farther back into the calendar. Now they are twelve days behind the scheeule to which they held in the period dog days when many maladies were of the Pharaohs. In time Sirius may supposed to be common. But the mad- rise in the dead of winter. The Egyptians maintained that the first indication of the rise of the Nile took place on the morning of the longest day, when, as they said, the sun and Sothis (Sirius) rose together. They attributed the rise of the river entirely to the great heat generated by this star in conjunction with the sun.

Sirius is situated in the mouth of the constellation Canis Major (the "great dog"). The Latin name of dog that is, when the dog star rises in con- days was "dies cancularis," and from junction with the sun or as nearly in this comes the term "canicular year." conjunction as may be observed. Var- which was known among the Egypious dates from July 3 to Aug. 15 have tians and Ethiopians. It was computbeen assigned for the beginning of ed from one heliacal rising of Sirius dog days and they are given various to the next and consisted ordinarily durations of from thirty to fifty days. of 365 days, every fourth year having
