AGAINST THE PUBLIC INTEREST.

Against Proprietary Medicines. "Schemes to diminish or destroy the sale of proprietary medicines are constantly being devised by interested parties. Every now nd then some zealous reformer comes to the front with the demand for a law to require every package of proprietary medicine to be labeled with a printed statement of the 'formula,' showing just how it is manufactured. The millions of people who use proprietary medicines seem to be satisfied; but the man with a mania for regulating the affairs of other people or who has some personal interest to serve is the one who agitates the proposition. To a person who has never taken time to consider it, such a proposition may seem reasonable enough; yet it is in fact nothing more nor less than a scheme to compel the manufacturers to put their trade throughout the entire country at the mercy of every commercial pirate who might choose to flood the market with imitations of their goods.

"Under such conditions the incentive for the original manufacturer to advertise his goods would be practically destroyed, for the money spent on advertising would inure mainly to the benefit of the pirates and imitators. Without advertising, the public would receive little information in regard to the medicine, and all future sales would be greatly impaired if not wholly destroyed. It is mainly by judicious advertising that the knowledge of proprietary medicines is brought to the public. Nothing is more certain than that millions of people have found relief at a comparatively small expense by the use of some remedy first called to their notice through newspaper advertising. Why, then, should the manufacturer of a meritorious proprietary remedy be compelled by law to practically destroy his business as a condition of being allowed to carry it on? Yet that is exactly what these formula bills mean.-Exchange.
