**200 STUDENTS ENTER CONTESTS**  
(Continued from Page One.)  
Student Activities building on the Agricultural campus. Approximately seventy boys will stay in this building on Wednesday night, and about one hundred and fifty on Thursday and Friday nights.  
On Saturday there will be a separate contest between the state agricultural schools located at Curtis and Lincoln, using the same classes as in the high school contests. This contest will be in conjunction with those of the Smith-Hughes vocational agricultural high schools.  
The following schools are sending entries: Albion, Ashland, Barneston, Basset, Beatrice, Broken Bow, Burwell, Chappell, Columbus, Eagle, Fairbury, Falls City, Geneva, Holmesville, Hooper, Imperial, Kearney, Mead, Milford, Milligan, Minden, Nehawka, Randolph, Stromsburg, Tecumseh, Waverly, Wilcox, and York.

**"CINDERELLA" IS THEATRE FINALE**  
(Continued from Page One.)  
production. A number of the costumes will be secured from the same costume company from which the costumes for "The Merchant of Venice" were obtained.  
The usual Saturday night performance has been changed to a Friday afternoon matinee for the benefit of university students. There will be no reserved seats for either the Friday or Saturday afternoon performances.  
The cast:  
Dust o' Gold.....Thirza Fay  
Rumpelstiltsken.....Howard Cottle  
Rosemary.....Genevieve Carney

Talks of eating at the  
**Central CAFE**  
Strawberry Shortcake  
Rapid transportation and better marketing facilities have placed within the reach of all many of the fruits which formerly could be had fresh only in season. But for the dweller in Lincoln, the strawberry season—for example—would seem to be all the year round.  
A mimeographed menu of the Central Cafe, dated the second Sunday in January this year, has listed, under heading of "Desserts", the following:  
"Fresh Strawberry Club House Shortcake, 35c; Fresh Strawberries with Cream, 35c; Fresh Strawberry Sundae, 25c.  
These berries, of course, came from the south; but next summer the Central's Strawberry Shortcake will probably be made from fruit grown in Minnesota, or some other northern state."

**ENGINEERS' WEEK PLANS ARE MADE**  
(Continued from Page One.)  
frequency display of the corona. Mr. Norris will conduct a special light display demonstration.  
**Telephone Exhibition**  
In connection with the E. E. department, the Lincoln Telephone company will have an automatic telephone demonstration in the Communication laboratory of the E. E. building. They will demonstrate the automatic switchboard as used in Lincoln, and a comparative demonstration of the older type of switchboard which was the fore-runner of the automatic type. They will also give a demonstration of the simultaneous operation of telephone and telegraph over the same wire.  
The civil engineers will have their display in the C. E. building. They have not yet made a definite announcement of their exhibits and experiments.  
The chemical and agricultural engineers have not yet submitted their plans for open house but are expected to do so in a few days.  
The geology department which is to cooperate with the engineers during Engineers' Week, will have their exhibit in Morrill Hall. On the first floor they will have their general exhibits. Their laboratory display which will include a display of minerals, rocks, fossils, and precious stone exhibits, will be on the second floor, and the art exhibit will be on the third floor.  
The physics department, which will also cooperate with the engineers in the Engineers' Week demonstration, will conduct their experiments and exhibit their display in Brace Laboratory.  
Another big feature of the week is Engineers' Field Day, Wednesday afternoon, May 4. All engineers will leave in trucks from the Temple Theater immediately after the convocation, and go to Antelope Park where the field day activities will take place. At the park, they will be served lunch by the ladies of Grace M. E. church.  
**Athletic Meet Outlined**  
The program as outlined for the afternoon includes a number of athletic events for the men. Prizes furnished by Lincoln business houses will be given to the winners of the contests. Among the sports will be races, a horseshoe tourney, an interclass baseball tourney, tug of war, and a golf tourney.  
The Engineers' convocation will be held in the Temple Theater Wednesday morning, May 4, at 11 o'clock. All engineers will be excused from classes for this convocation and will be expected to attend.  
The "Sledge" a humorous publication put out by the engineers will be distributed the fore part of Engineers' Week. It will contain jokes, wise-cracks, and slams on instructors and students in the engineering college. "Sledge" boxes have been placed in all the engineering buildings, and students are being urged to get their contributions in as soon as possible.  
**Special Blue Print**  
The special Engineers' Week issue of the Blue Print, Nebraska engineer's publication, will be entirely given over to Engineers' Week, and will be distributed a week or ten days before Engineers' Week. This will be a forty-page issue, the first forty-page issue to be distributed, and will be written entirely by students or active instructors in the Engineering College.  
The committee on campus structure plans to have a dirigible fifteen feet long and three and one-half feet in diameter placed somewhere on the campus. The exact location has not yet been determined.  
Another high-point in the Engineers' Week program is the Engineers' Banquet which will be held Friday night, May 6. Dean Potter, Dean of Engineering at Purdue University, will address the engineers on "Taking Stock and Looking Ahead." Dean Potter is a personal friend of Dean Ferguson, and it is largely through his efforts that the committee was able to get such a prominent man to speak at the banquet.  
Committees have been elected from each department to plan the departmental features of the program, and special committees have been appointed to take charge of special features of the week. All men are working hard and it is expected that Engineers' Week this year will be a big success. Every man in the Engineering college is expected to take some active part in the program of the week.

**Inquiring Reporter**  
(Continued from Page One.)  
to get settled and find their place in the University."  
Paul Miller, '27, Lincoln, Arts and Science.  
"Yes, I'm for it strong."  
Aubrey Hurren, '29, Lincoln, Arts and Science.  
"I'd be in favor of the bill if they would build dormitories that would be compulsory for all freshmen to live in, and providing rushing is limited in some way."  
Donald Helmsdoerfer, '28, Lincoln, Arts and Science.  
"I think second-year pledging detracts from the good that a fraternity does for a man."  
Mignon Dort, '29, Lincoln, Fine Arts.  
"I think it is none of the legislature's business. I think it should be settled by the fraternities and sororities themselves."  
Munro Kezer, '29, Fort Collins, Colorado, Arts and Science.  
"When I came to the University I favored, at least second semester pledging. A year and a half contact with the school and fraternity and non-fraternity men has led me to the belief which has constantly been strengthened that the present system holds fewer disadvantages and more advantages by far than either second semester or second year pledging.  
"It seems to me that if fraternities are beneficial, freshmen should go in, if they are not, they should be abolished. I believe that the average freshman is better off to get the whole thing of his mind either way in the first week and get settled down to a normal life than to have it hang over him all year. And in nine cases out of ten, a man can judge a group as well during the rush period as after a year."  
Dr. E. M. Cramb, U. of N., '99, Osteopath, Burlington Bldg. 13th & O St.—Adv.
