## KNOW YOUR KAMPUS

Do you know that? On each side of the east entrance to U hall is a bulletin board mounted in an artistic iron frame which has torch-like effects as part of its design and the University of Nebraska crest cast in the peak. These two old frames were made by the Mechanical Arts department years ago and were gates at the 11th and R entrance to the campus which used to be surrounded by a high wire fence. These gates were locked at 10 o'clock every night. Following the war and with the extension of the campus beyond 12th street and also because it cost a good deal to paint the fence each year, it was torn down. Because of their artistic value the gates were used as holders of the bulletin boards. Notice them the next time you go to class in U hall!

Members of the Black Cat organization grouped about the courtroom graped for every word the judge said until the voice of the justice finally stated that "in view of the fact that the officer is renowned for his ability as an officer the sentence will be ten swats to be given by a chosen electrocutionist."

Black Cats, an organization of motorcycle officers of the Lincoln police force, hold court at the police station for any misdemeanor to the law of the organization and on this particular occasion, Major Gross, who spends many afternoons haunting the co-ed row in search of offenders of the traffic ordinances of Lincoln, was reported to have taken one of the co-eds of the school for a ride on the rear of his motorcycle. He declared that many people who follow this philosophy claim to be Christians, but are in reality Greeks. The fallacy of thinking that knowledge of any phenomena removes the danger therefrom was shown. Some organize for immediate pleasure, while others plan for ultimate satisfaction. While there are some exceptions, those who plan for ultimate satisfaction profit best. (Continued on Page 3.)
