

If there is any time left after finishing these, she will rest.

Professor Barber will spend three weeks at the Fair, right after Commencement. Will spend the rest of the summer getting ready for next year.

Professor Bates will spend July and August on the northern shore of Lake Superior, resting. Will return to Lincoln after a couple of weeks at the Fair.

Miss Bessie Tuttle will be in Lincoln giving lessons in the city and at Western Normal till the latter part of August, when she will visit the Fair a couple of weeks.

It is rumored that Professors Wightman and Fling will hereafter work in double harness. In view of their excellent records as bachelors, they should make ideal Benedicts. Professor and Mrs. Fling will spend the greater part of the summer travelling in Europe. They will return home about the middle of September. The professor will then resume his work in the University.

Miss Mable Tuttle expects to attend the Y. P. S. C. E. convention that meets in Montreal, July 5, stopping for ten days at the Fair on her way back. The rest of the summer she will spend in Lincoln.

Professor Fossler will deliver a course of lectures on "Faust" at the Crete Chatauqua. The balance of the summer will be devoted to preparing lectures for next year, novel-reading and rest, with as much stress on the last as possible.

Professor Caldwell will be in Lincoln getting ready for next year, until about August 1, when he will go to the Fair for a couple of weeks. He delivers, about August 8, an address on "The Present Condition and History of Suffrage in Nebraska", before the section on "Suffrage in the States", which is a sub-division of the Section on Political Science in the World's Fair Congress.

Athletic Notes.

There has been a lack of interest in tennis this year. Quite a number have been practicing, but no matches were arranged and some of our best players have hardly practiced. We had some good players this year and it would have been a good time to pay back Doane for past defeats.

The temporary boating crew has been chosen and the boys will begin training as soon as the Commencement exercises are over. The "shells" will soon arrive and the boys will enter into hard training as soon as they have mastered the laws of equilibrium. They will train throughout the summer under the guidance of Capt. Lunn, and by the next fall we may expect them to make a very creditable showing.

The college base ball season has closed. Our manager has been unfortunate this year in the arranging of games, and consequently we met but few teams. In these games it was clearly shown that we had the best team the N. U. has ever put into the field. Our one weak spot, as usual, was behind the bat. By some strange freak of fortune, the U. of N. has been very weak at that point for some years past. The other positions were well covered and our batting was much better than ever before.

The annual field day contests were held at the state fair grounds, May 20. It was a splendid afternoon for the contests, and everything went off smoothly. Two records were broken. The running was especially good. Following is a list of events, winners and records:

EVENT.	WINNER.	RECORD
Hammer throw	J. G. Yont	67 ft. 7 in.
100-yds. dash	Bross	10 4-5 sec.
Standing broad jump	Randolph	10 ft. 4 in.
Hurdle race	J. G. Yont	21 sec.
2 mi. bicycle race	Hadley	6 min. 7 sec.
1-2 mi. run	Bross	2 min. 10 1-2 sec.
Run'g broad jump	A. E. Yont	16 ft. 4 in.
Stand'g high jump	Corey	4 ft. 3 in.
