The physiological wall charts designed by Dr. Wolcott of the department of zoology and exhibited at the Trans-Mississippi Exposition in Omaha, attracted great attention from the teachers of this and surrounding states, and numerous inquiries have been received as to the possibility of furnishing copies of the charts. A movement is on foot looking towards printing and placing them on sale. They include in graphic and tubular form, an outline of digestion, circulation, respiration and the general chemistry of the body.

Prof. G. W. A. Luckey has been attending the Missouri State Teachers' Association the past week where he has delivered two lectures, one on the "Development of Character as the End in Education," and the other on "Child Study, Past, Present and Future."
