

# THE UNIVERSITY OF NEBRASKA

IRVING J. MANATT PH. D., LL. D., CHANCELLOR.

[Terms begin Sept. 15, 1886, January 3, and March 31, 1887.]

The University is the head of the public educational system of the State. It aims to continue and complete the work begun in the public schools, and secure to all an opportunity of liberal culture in literature and science, and in such technical and professional courses as shall from time to time be added. These advantages are offered to all *free of charge for tuition*, without regard to sex or race, or place of residence, on the sole condition of possessing the intellectual and moral qualifications requisite for admission to such an institution.

## THE LATIN SCHOOL.

In this school preparation is afforded for the Undergraduate Courses in the COLLEGE OF LITERATURE, SCIENCE AND THE ARTS, and also for those in the INDUSTRIAL COLLEGE.

The preparatory studies run through two years. Applicants for admission to the First Year will be examined on the following subjects: *English Grammar, Arithmetic, Geography and History of the United States*. Graduates of high schools accredited for the Minor Course (now including Fairmont, Friend, Gibbon, Harvard, Hebron, McCook, Sutton, Red Cloud and Wilber) are admitted to the Second Year class on presentation of diplomas.

## THE COLLEGE OF LITERATURE, SCIENCE, AND THE ARTS.

In this College are offered *three COURSES of Study*, designated as the CLASSICAL, the SCIENTIFIC, and the LITERARY, leading to the degrees of B. A., B. Sc., and B. L. respectively.

Graduates of the Latin School, or of the high schools accredited for the Major Course (including now Beatrice, Grand Island, Kearney, Lincoln, Nebraska City, Plattsmouth and Tekamah) are admitted to the Freshman class on presentation of diplomas.

## THE INDUSTRIAL COLLEGE.

The Course in Agriculture offers a liberal education in the

sciences which bear upon the Arts of Horticulture, Agriculture, Stock Growing and other rural occupations.

The Course in Civil Engineering offers such training as will fit a young man for the practice of civil engineering.

The courses have recently been carefully revised, and are now made equal to the other courses of the University. Students in this college attend classes with other university students, and have every advantage afforded by contact with those studying in other departments, and the instruction of trained and experienced University Professors.

For those who suspend but a year or two in study an *Elementary Course in Agriculture* has been arranged. During the first year the studies pursued are Arithmetic, Algebra, Elementary Botany, Zoology, Chemistry and Physics (Natural Philosophy), Civil Government, and lectures upon Agriculture. This year of study affords, also, an excellent short course for teachers in the public schools.

At the College Farm, just outside of the city limits, students may obtain board AT COST. Opportunity is also given for labor in the fields, gardens and stables. In this way some students defray a considerable portion of their expenses.

## SCHOOL OF THE FINE ARTS.

Instruction given in drawing and painting from the flat, casts still life, nature, and models in the progressive order. Pupils are required to provide easels and material; an ample selection of casts and studies are furnished in the studio. The charge for daily lessons during 12 weeks is \$25.00, payable in advance. Free instruction is given to classes in Art History, Plastic Anatomy and Perspective.

The Course in Music includes instruction on the Piano Forte, Organ and Violin, Voice-training and Musical Theory. Fees for individual or class instruction are moderate.
