California Tourist Cars.

The idea that an inferior class of people patronize the tourist sleepers is an error. On many trips only the best class of travelers are found. They are merely men and women of good sense who would rather travel to California in this manner and save a snug sum of money. It is beginning to be understood that it is by no means necessary for the traveler to spend a large sum of money in order to enjoy a trip to the Pacific Coast. If you cross the continent in one o

the tourist sleepers of the Union Pacific you will enjoy your trip and save considerable money. Inquire of E. G. Brown, Agent.

Grace Church.

Thursday next being Ascension day services will be held as follows: Holy communion 7:30 a. m. and 10 a. m. Evening 8 p. m. The usual services will be held on Sunday next at 7:30 a. m., 11 a. m, and 8 p.m. Dr. Westcott will preach morning and evening.

Rev. D. W. Reinhart, pastor. Sunday school 10 a. m.; preaching by the pastor 11 a. m. and 8 p. m.; Bible class Tuesday 8 p. m.; prayer meeting Thursday 8

Seeing the Wind Blow. Wind is air in motion! Sometimes you hear people declare on a sultry day that there is "no air." Of course, that is impossible; there is always plenty of air, but there is not always a wind. Strange to say it is possible to see the wind, if the right means are

Take a polished metal surface of two feet or more, with a straight edge; a large hand-saw will answer the purpose. Take a windy day for the experiment, whether hot or cold. clear, or cloudy, only let it not be in

rainy, murky weather. Hold your metallic surface at right angles to the direction of the wind-1 e. if the wind is north, hold your surface east and west, but instead of holding it vertical incline it about 42 degrees to the horizon, so that the wind, striking, glances and flows over the edge, as the water flows over a dam. Now sight carefully along the edge some minutes at a sharply-defined object, and you will see the wind nouring over the edge in graceful curves. Make your observations carefully and you will hardly ever fail in the experiment; the results are even better if the sun is obscured.

· Kindred Spirits.

Nothing is more certain than that our manners, our civilization, and all the good things which are connected with civilisation, have in this European world of ours, depended for ages upon two principles, and were indeed the result of both combined; I mean the spirit of a gentleman and the spirit of religion. The nobility and the clergy, the one by profession, the other by patronage, kept learning in existence even in the midst of arms and confusion, and while governments were rather in their causes than formed. Learning paid back what it received to nobility and priesthood, and paid it with usury, by enlarging their ideas and by furnishing their minds.—Edmund Burke.

Quiet Nights Assured.

SPAN OF CONCRETE

WILL BE THE LONGEST IN THE WORLD.

Proposed Henry Hudson Memor Bridge to Have One Unique Featture-Still Another Triumph for American Engineers.

There is not in the world a bridge span in either stone or concrete which approaches the dimensions of the proposed Henry Hudson memorial bridge to cross Spuyten Duyvil creek, says the New York Sun. The central span of that structure is

to be 703 feet in the clear. In steel there already exists a longer arch, that of the upper Niagara span, which measures 840 feet. The design of the Hell Gate bridge calls for a thousandfoot arch of steel.

But in concrete there is nothing like the big span which is to link Manhat tan to the mainland. The Engineering News declares that the largest completed concrete arch is that of the Grunwald bridge over the Isar, at Munich. It is only 230 feet wide.

The Walnut Lane concrete arch bridge, now being built, has a slightly longer span, 233 feet between faces of abutments. These spans become insignificant, even trivial, when compared with that now proposed for the Hudson memorial bridge.

A better idea of the boldness of the proposal is had from a comparison with the general field of masoury arch construction, since the problems of design and erection for arches of stone and concrete are in a measure the same. The Cabin John arch of the Washington aqueduct, 220 feet in span. built about half a century ago, was for a long time looked upon as an exceptional achievement, being the largest stone arch in the world.

Only in the last eight years has i been exceeded, and there are now three larger spans in stone, beside the 230-foot concrete arch at Grunwald-Adda, 230 feet; Luxemburg, 278 feet, and Plauen, 295 feet. In 50 years designers have ventured only one-third beyond the limits set by the Cabin John arch, and only in three cases have they found it necessary. Now in one leap the present limit is to be multiplied by two and a half.

The Henry Hudson arch carries double deck. The upper or main deck is a highway floor, 80 feet wide between railings; it has a 50-foot roadway and two 15-foot sidewalks. The lower deck is to carry four tracks of a rapid transit railway, but as no such line is yet in prospect, the lower floor system is not to be put in place at first, but only the necessary connections provided for it.

The total length of the bridge, including the approaches, is 2,840 feet. Its cost, excluding special ornamental features, is estimated at \$3,800,000. About one-half of this is chargeable to the large arch and its superstructure.

"Toeing the Mark." The phrase "toeing the mark" is o

fairly old and somewhat obscure origin. Several different opinions are held as to how it originated, but the derivation most generally accepted is that it comes from an old fashion among military men in drilling, to draw a line upon the ground and make the company "dress" by toeing this mark. The phrase thus acquired the meaning of "standing up" to something, and so became used in quarrels. when one of the parties would challeage the other to stand up to him. Even nowadays in some of the country districts of Great Britain it is customary for lads when quarreling to provoke their opponents finally to the encounter by drawing a line upon the ground and telling them to "toe the mark." The meaning of the phrase as now generally used is to come right forward and "stand up' to anything.

Sees Age of Aeroplanes.

Henry Farman, who has attracted notice because of his successful aeroplane experiments, believes that within 12 months aeroplanes will be flying from 50 to 100 miles quite easily. "I can fly now as long as the motor works," he says, "and distance is nothing to me." Farman is 30 years of age and is one of the three sons of a well-known English journalist. Before taking to aeronautics Mr. Farman had made a considerable name in the French sporting world. When cycle racing was the rage he and his brother won many championships. They formed a tandem team which proved invincible. Then he took to motoring, and won the Paris and Nice races in 1902. In the great Paris-to-Vienna race he gained first honors for heavy machines. His motor-racing career, however, came to a sudden termination after an accident which landed him high up in the branches of a tree.

What the Dogs Were For. Observing several \$5,000 buildogs on the multi-millionaire's estate, the witty

visitor remarked: "Are those dogs here to est up sub poenas?"

And the multi-millionaire chuckled craftily. "Ah, no, my friend," he whispered.

"they are here to eat up subpoens

ARE MAKING TOWN TO ORDER Prince Report Will Se the Greates Model City Vet Built.

A Boston firm of landscape architects has been awarded the contract for making the general plans for the model city which the Grand Trunk Pacific railroad is to build in British Columbia as the Pacific terminus of the great new railroad system which is now being built across Canada.

The contract is one of the largest ever given for a similar undertaking. says the Village. As yet there is only a small settlement where it is intended a large and important commercial and manufacturing city will be built. The settlement is on Kalen Island and the new city will be known as Prince Rupert.

The area which is available for the site comprises between seven and eight square miles, although only a small part of this will be developed within the near future. The island is of considerable size, but only about one-third will be available because of the mountain, Mount Hays, which rises to an elevation of 2,300 feet near the center of the island.

mainland to Porpoise Island and then to Kaien Island by means of bridges, the first of which will be about a quarter of a mile in length and the second ome 200 feet long. Already a dock a thousand feet long has been con- love. On the street, in Cincinnati, I then to compare the different telestructed along a part of the waterfront had the felicity to assist a young lady and it is planned to extend this for a who had fallen. Say, she was a daisy. What it was that Gen. Gordon very bold and this will aid greatly in heels. I was a good deal of a cynic what could be done toward carrying teep down the cost of building docks. the shipping and wholesale business on the first level, which rises to 75 or 100 feet; the retail business and the public buildings on the second level, which is some 200 feet high. and forms a sort of ridge, and the that chance and attended a fashion eration and rarely held to one opinion residences still further back on a

third level of about 100 feet elevation. Ample provision for parks will be made. There is an excellent chance for one on a central elevation, another at Point Hays, named, like the mountain, in honor of the president of the railroad, Charles M. Hays of Montreal, and a third at the southwestern end

of the city. It is probable that Digby Island, just to the westward of Kalen Island, will be developed for residences, a purpose for which it is admirably adapted. The expenditures which are contemplated by the railroad company at this place alone will total many millions if pres-

plans are carried Prince Rupert is situated within 50 Alaska and 551 miles north of Vancouver, at the very entrance to the salmon fishing grounds, It is in the immediate vicinity of a large number of canneries which send their products to all parts of the world. Near at hand are the famous halibut fishing

Already there is considerabe activity on behalf of the railroad, and recently a contract was let for clearing 2,000 acres of land at \$220,000.

Only the Runner-Up.

The best man thought he'd take look around and see that everything was running as a fastidious bride would wish it, and up in the room where the presents were displayed, alone and unhappy-looking, he came upon a youth, seemingly ready, like the wedding guest of the English poet. to "beat his breast." He was wandering about, looking at silver and cut glass without seeing them, and the best man hardly knew how to approach him.

"Er-have you kissed the bride?" he asked, at last. And the answer told far more than

A Cure for His Trouble. "Doctor." said the woman whose husband owed everybody in town, "John's in a very bad way. I've been trying to get him to come to see you, but he's so obstinate, you know, and so I've made up my mind to see you

you can do anything for him." "What are his symptoms?" "Oh, he's awfully nervous. He never

seems to settle down to anything." "H'm! That's bad. That puts him in an awful predicament. When a tle down nor settle up, the only thing I can recommend is travel. Better take what things you can move conveniently and start on a long journey won't let on."

Highly Practical. "Your business college for young !

dies seems to be all right." "It is all right." "Do you give the girls a good, practical business training?"

"Do you expect to get on our foreign son-in-law?" "Surely," answered Mr. er's name well enough to get on quar-reling terms of intimety." TELLS OF GORDON'S WEAKNESS. Lord Cromer Throws Light on History of Hero of Sudan.

In his book, "Modern Egypt," Lord Cromer, for 20 years the representative of British authority in the land of the khedive, gives the other side of the heroic story of Gen Gordon's rule in Khartum, where he was slain by the fanatical natives. Lord Cromer twice rejected the proposal to send Gordon to the Sudan. "Would." he says, "that I had done so a third time!" He soon woke to Gordon's variability. He says: "Impulsive flightiness was, in fact, the main defect of Gen. Gordon's character, and it was one which, in my opinion, rendered him unfit to carry out a work which pre-eminently required a cool and steady head. I used to receive 20 or 30 telegrams from Gen. Gordon in the course of the day when he was in Khartum, those in the evening often giving opinions which it was impossible to reconcile with others dispatched the same morning."

This stream of telegrams from Khartum was so continuous that Lord Cromer had to adopt a special method of dealing with them. "I gening for me when I began my work "Got turned down in your callow in the morning," he says. "My practice was to put them on one side and "No, I was never turned down. If wait till the afternoon, by which time

Lord Cromer says, also: "One of long. His journal, in which his thoughts from day to day are recorded, is, even in the expurgated form in which it was published, a mass of inconsistencies."

Gen. Gordon's courage is warmly praised by Lord Cromer, who says further: "Many a man before Gen. Gordon has laid down his life at the call of duty. Many a man, too, has striven "And you hadn't even a nickel, of to regard death as a glad relief from pain, sorrow and suffering. But no "Hadn't I? You are wrong. I had soldier about to lead a forlorn hope. \$1 bill and a \$500 bill, as it hap no Christian martyr tied to the stake pened. They were rolled together or thrown to the wild beasts of ancient Rome, ever faced death with more un-

Once he was ill for a long time—a very long time and he used to say that when he be came convalescent he discovered that the mathematical was the lowest order of mind. He wanted to read: he tried poetry, and that would not do; nor would fiction or philosophy or history-but when he at last tried mathematics he found that his enfeebled mind could master that."

Tied Up the Gallaghers. Lightning has played some queer pranks, but about the funniest joke streak of it ever got off was when t bumped into old William Gallagher of Cleveland. Mr. Gallagher was peacefully in bed when the bolt hit his domicile and the fluid completely wrecked the iron bedstead in which the old man and his wife were sleeping. Worse than that it twisted the clothes and the iron about the couple in such curious fashion that they were actually tied in bed, and, to save themselves, couldn't get out, while the rain beat in on them from the wrecked roof. Finally their shouts brought the neighbors and Gallagher and Mrs. Gallagher were released from old Jupiter's iron clutch, wet and scared and exhausted. The bedstead with the clothes twisted about its sides is a curious object of interest in Cleveland to this day.

Church and State.

A young curate, who was showing an American girl through an old English cathedral, enjoyed her appreciation of a handsome lectern. The Bible rested on the outspread wings of a powerful wrought bronze eagle. At the base of the lecturn, another symbol of the Gospel was presented in the form of a great lion. The clergyman yielded to the

temptation to banter the fair visitor "We have a lion to watch the eagle." he remarked.

"Yes," flashed the answer, "but the eagle stays on top."-Harper's Mag-

Celery Croquettes. Trim and cut in short lengths two water over them and let stand ten minutes. Put one pint of milk in a sauce pan with two bay leaves, a little pepper and powdered mace, then add the celery and cook until tender. Melt a teaspoonful of butter and stir in as ounce of flour, when well mixed, add a half cupful of milk, stir until it boils and add the chopped celery. Cook for about 15 minutes, adding a little pepper, the white of an egg, a little cream. Cool the mixture, make into croquettes, roll in crumbs and fry in

hot oil. Drain well on paper and serve hot.

Colored Lace Curtains To clean colored lace curtains take them down, hang on a line, brush out all the dust, and shake well. Spread on a table, lay your curtains on the sheet one at a time. Take cornmeal and wet it with gasoline, then let your meal dry. Take a cloth and brush and brush the meal well into the curtains. Fold your curtains and set away for about four hours. Then hang them out in the air and brush out all the cornmeal. Take them down and press and you have bright, clean curtains

For Thin Seams. If the material to be stitched on the machine is very delicate lay a long strip of newspaper next the feed. This will prevent puckering or snarling. Paper will also keep a bias seem from

stretching. Accounted For.

Naturally she turned to her husband

"Why are so many of the police mentioned as plain clothes men?" she asked. "I suppose," he answered, "that they're like the rest of us. It takes

being plain clothes women."-Phila-Chop with a Can.

For a vegetable chopper I use a corn can. The top was removed by turning
