This is an advertisement; read it if you are interested in a better set of teeth than the ordinary rubber plate. Are you pleased with the appearance of pink rubber gum? Do you feel satisfied with the gum section teeth where the joints show? Continuous gum work or an all porcelain plate overcomes this unnatural appearance of the gum. The porcelain plate is the best made for the following reasons: It can be made to look natural even if the gum shows; the

entire plate is one piece of porcelain; is clean and agreeable to the mouth, and is equal in strength to any plate made. Porcelain for artificial teeth is fused at a high temperature. Dr. Sherwin makes all porcelain work with an electric furnace which insures the best quality of work.
