## A Step In The Pure Food Science. .

The importance of "Pure Food Products" can scarcely be overestimated, and in order to create a demand for the pure, wholesome and nutritious in food stuffs, and to urge upon the public the wisdom of selecting only that which comes nearest the ideal of perfection, an extensive "Pure Food Exhibit will be undertaken in Lincoln May 14th to 19th.

It promises to be the most elaborate display of its kind ever given in Nebraska, and is planned with the sole object of demonstrating to Nebraska people the purest and most wholesome food which wide experience can bring together, of the best in every line which human effort and money can accomplish.

Every article displayed will represent the highest development in its line, in the science of food preparation. "The Keystone" has given a great deal of thought and study to the subject of "Good Things to Eat," and wish to urge the vital importance of "Pure Food."

We only ask that you visit this exhibit, test the best goods which science and skill produce, and note for yourself their delicacy and superior nutritious quality. We rest assured as to the result.
