

Square Deal on Cream Separators

"Let me tell you one sure thing," says Farmer Onswon, "The Beatrice is the only standard separator on the market that you can buy at a fair-play price." A square deal--that's what you get when you buy a

BEATRICE Cream Separator

"Most dealers ask \$110 to \$125 for a high grade separator of big capacity. I paid \$85 for my 1000 pound capacity Beatrice. I know I never had so much cream separator satisfaction before.

"With the patented device furnished free with the separator I can clean the bowl and discs in less than two minutes. They come out as clean and spotless as a new penny and as sweet as a nut.

"I figure I save the price of my Beatrice every year by its close, clean skimming. It don't leave a trace of

cream in skim-milk whether the milk is skimmed warm or cold.

"It's the easiest running machine I ever had. My repair bills have amounted to practically nothing. It's a sure-enough built-to-last cream separator."
