Revolutionary.

The Magnepan loudspeaker is of revolutionary design. It is neither a cone type speaker, nor is it an electrostatic. The actual speaker is only 1/8th inch thick, with all components in the same plane for excellent phase response. All sound is crisp and clean because of elimination of speaker cabinets and cavities. With complete control of the diaphragm, the distortion level is far below other loudspeakers. You've heard the word revolutionary before. But you've never heard anything like Magnepans before.
