

UNL Physical Plant beginning cooling-off procedures

With a flick of a switch, chilled water from the UNL Physical Plant will flow to cool off campus classrooms and offices and the Nebraska State Capitol, according to Thomas Nycum, assistant to the physical plant director.

Nycum said the chillers were started Friday for the campus and the capitol. The capitol's air conditioning was turned on Monday and workmen are in the process of getting campus air conditioning started.

"Not every building gets its air conditioning at the same time," Nycum said. "Workmen have to make sure the system in each building is working properly before we can start it running."

He said 25 per cent of the campus buildings are not air conditioned, especially the older buildings. The older

buildings will be air conditioned when they are remodelled, he said.

Nycum said the state pays for the chilled water that is sent to the capitol. Last year, the capitol used 524,079 ton hours of chilled water during the summer months.

A ton hour is the volume of a ton of air chilled in an hour.

"We don't like to start the chilling machines until we have to," he said. "When the temperature gets above 65 degrees and then keeps climbing, we start the machines."

Nycum said air conditioning constantly runs in buildings that house animals and critical experiments that need to be cooled.

Hartington Sen. Jules Burbach said the Legislature makes the decision when the university begins supplying the chilled water for the capitol's air conditioning.

"When I was speaker of the legislature two years ago," Burbach said, "I called up the physical plant and told them to turn the chilled water because we were having an unusually warm spring."

"They told me that it would be at least three weeks before we could have the chilled water because of some construction difficulties. That afternoon, we were discussing the NU budget and the air conditioning was started the next day," he said.

Burbach said the capitol has had air conditioning for ten years.

ASUN agenda

The ASUN Senate will meet at 6:30 tonight in Nebraska Union 202. The agenda is as follows:

- Roll Call
- Approval of Minutes
- I. Executive reports
 - A. Bill Mueller
 - B. Tony Williams
 - C. Joe Stavas
- II. Open forum
- III. Old business
- IV. New business
 - A. Senate awards
 - B. Distinguished Service awards

- V. Announcements
- VI. Adjournment of the 1976-77 Senate
- Swearing in of new Senate
- Roll Call
- I. Executive reports
 - A. President's Report - Greg Johnson
 - B. Charlie Fellingham
 - C. Ken Christoffersen
- II. Open forum
- III. New Business
- IV. Adjournment

Freshman disappears, clues scarce

A UNL freshman left her room on the third floor of Raymond Residence Hall April 12, and has not been seen since, according to Campus Police.

Nancy Westrope, 18, a journalism major from Holdrege was last seen walking in downtown Lincoln.

Campus Police Capt. Robert Edmunds said there is no indication of foul play.

Edmunds said although police do not know exactly where Westrope is, they think they know what city she is in, but declined to name it. He said he did not know any reason for her to run away.

Amy Shalla, who lives on the third floor of Raymond, said she was a friend of the missing girl for a long time. "Nancy didn't really have any friends on the floor," Shalla said. "She came to me with her problems."

"We had a big fight over a personal thing," she said. "She left me a note saying I would never see her again and

if I try to find her she doubted if I ever could."

Westrope did not take any money or anything with her as far as Shalla could see, she said.

Westrope worked on the *Daily Nebraskan* for about a month in the production dept. but quit shortly before she disappeared.

Her parents, Merrill and Margaret Westrope, live in Holdrege. Her father is a state patrolman.

Mrs. Westrope said they were notified Friday by the police that their daughter was missing. She said they have no idea where she is or why she left.

LINCOLN CENTER & GATEWAY

At any price you can afford to be choosy.

Because the value of every diamond is determined by four characteristics (cut, color, clarity and carat weight), you can always use these qualities to your best advantage.

Perhaps you're attracted by the grandeur of a large diamond. Well, sometimes a large stone can cost the same as a smaller one. Simply because it has a little more color. Or a delicate birthmark hidden inside.

On the other hand, you may feel size isn't the most important quality. Then you could choose a diamond that's small, but perfectly cut to sparkle with an icy-white elegance.

In any case, you'll be able to find one to suit your personality. Because each one is an individual, with its own combination of characteristics. And you can use these qualities any way you wish, to help you decide what's precisely right for you.

But the important thing to remember is to buy a diamond engagement ring you'll be happiest with. You'll be sharing it for a lifetime with someone you love.

And for that reason alone, you should be choosy.

A diamond is forever.

Prices shown represent retail quantities for these specific rings (enlarged for detail). Your jeweler has many diamonds to choose from and can give you the best guidance. De Beers Consolidated Mines, Ltd.
