TEAM UP WITH FLUOR AND DOUBLE YOUR CAREER POTENTIAL!

In many ways, college prepares you to think independently. That's a great quality for an engineer to have. But just as important is the ability to work effectively on a team. We've found that the results of team work are much, much greater than the sum of the parts. That's why Fluor, one of the country's largest and leading engineering and construction firms, is organized totally around the team concept.

As a new engineer you'll be assigned to a project that matches your abilities and interests. You'll stay with the project from start to finish, all the while developing new skills and polishing your ability to contribute as a task force member. We think the approach makes you more capable of independent creativity, not less. At the same time you're in the perfect position to learn from more experienced professionals who come from many disciplines. For the new graduate in particular, that is a productive place to be.

So if you're thinking about your potential in the job market, why not think about doubling it? Let us tell you more about the Fluor team and about the great salary, full benefits and advancement potential that make us a top Fortune 500 company. We will be interviewing on campus Monday, February 9, 1981 for the following disciplines:

**Mechanical Engineering
Electrical Engineering
Civil Engineering
Chemical Engineering**

For more details, contact your placement office.
