Hall of Fame inducts UNL professor

A UNL animal science professor has been named to the Ohio State University's Animal Science Hall of Fame.

Terry Klopfenstein, who received his doctoral degree from Ohio State in 1965, was recognized by the Saddle and Sirloin Club and the department of animal science at Ohio State.

Klopfenstein was described as "a former graduate of our department who has distinguished himself by having" demonstrated superior skills and achieving success for himself in his chosen field," George Wilson, professor of animal science at Ohio State, said in a press release.

Klopfenstein's main area of research has been with growing beef calves with an emphasis on protein use and crop residues. The bypass protein concept, which he developed at UNL, now is used by the feed industry.

His crop residue research with corn stover and other low quality forage is presently in worldwide usage.

Klopfenstein has been on the UNL faculty since 1965. He has a joint teaching and research appointment. He teaches Feeds and Feeding, as well as Feeding and Applied Nutrition to undergraduates. He also teaches Forage Evaluation and Feedlot, and Feedlot Nutrition and Management to UNL graduate students.

A portrait of Klopfenstein will be placed in the Animal Science Hall of Fame at Ohio State, a tradition that began in 1959, Wilson said.

Marathon net \$7,000 to save museum's bones

UNL fraternities and sororities raised more than \$7,000 for Morrill Hall in last week's Mastodon Marathon, Jeff Bert, chairman of the marathon, said.

"We are very happy with the money and there is still more coming in," Bert said. "We really did raise people's awareness of the problem, too."

Because Morrill Hall has a heating system, but no air conditioning or humidity controls, the climate variations are causing deterioration of the fossils and exhibits on display there. Bert said the museum, which has one of the largest fossil collections in the country, is definitely worth saving.

Although the \$10,000 goal was not met, Bert said he was pleased with \$7,000. The goal was set high and they did not know if they could even raise \$5,000, he said.

Friday, the Nebraska Legislature passed a resolution submitted by Sen. Don Wesley of Lincoln supporting the Mastodon Marathon and recognizing the need for more legislation to help Morrill Hall, Bert said. The resolution was written by J.L Spray, publicity chairman for Greek Week, he said.

Despite last week's cold weather, Bert said more than 1,000 fraternity and sorority members ran in the relay, which continued throughout the entire week.

Bert said he hoped the marathon set a precedent for doing campus philanthropy projects with a unified Greek effort, rather than individual houses helping different charities.

"We will continue to support Morrill Hall as long as it needs it," Bert said. "If not through the marathon, then through some other project."
