

THE SOWER

N E B R A S K A I N D E P T H

This month's issue of *The Sower* closely examines two issues: nitrates in Nebraska's groundwater and the demise of Centennial College at the University of Nebraska-Lincoln.

On pages 2-5, Martha Stoddard explains the potential danger nitrate-contaminated water poses to infants and adults.

On pages 6-8, Kema Soderberg looks at UNL's only experiment with alternative education.

Both stories were written in conjunction with the Depth Reporting class in the UNL College of Journalism, taught by Alfred Pagel.
