

# Huskers face 'Jays in Omaha

By Jim Ballard  
Staff Reporter

Creighton baseball coach Jim Hendry is happy with how his team has been playing.

"The last few weeks we have been playing well," Hendry said. "Up until then, we were in a slump. But last week we played well, and hopefully we're getting better at the right time of the season."

Part of the good was seen last week

against the Huskers. Last Wednesday Nebraska won the first game of a two-game series, 5-4, then dropped the second game Thursday, 6-5.

Nebraska will travel to Creighton on Wednesday with a 28-17 record. The Bluejays, who won three of four from Bradley, come into the games at 31-21-1.

Hendry said he is happy with his team's performances against both the Cornhuskers and the Braves.

"We played pretty well, and we

needed to play well to get back on track because we needed to get going again," he said. "We had some guys throw well that had been struggling, and we got a lot of confidence back."

The Bluejays most likely will go with pitchers Shaun Daly in the first game and Dave Hartnet in the second of the twilight doubleheader.

Daly is 4-1 with a 5.70 ERA, while Hartnet has a losing record, 3-5.

The Bluejays' offense will be led by senior shortstop Elvis Dominguez. He is hitting .395, which leads the team, with eight homers and 36 RBIs.

Dominguez is joined by catcher Mike Barbato and centerfielder Bill Meier. Barbato, a sophomore, is hitting .360 with 13 homeruns and 56 RBIs. Meier leads the team in RBIs with 57 and shares the lead in homeruns with Barbato, hitting .333.

The games will be at Rosenblatt Stadium at 5 p.m. The first game will be a regular nine-inning game. The second will consist of seven.

Regularly \$2195.

EXEC PARTNER

SALE PRICE **\$1999<sup>95</sup>**  
Regularly \$2595.

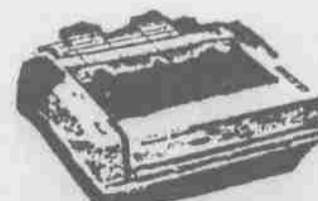

The Exec. Partner uses the 8086-2 processor for faster operation with most programs. But it can be switched down to "normal speed" to run all currently available IBM PC or XT compatible software off the shelf. Hardware is also completely compatible so you can add a modem board, a number crunching 8087, expanded memory and more. This and other innovative technology adds up to real computing power. The biggest surprise is that all this is still portable.
