Spots on Carpets

To remove oil or grease spots from carpets, lay a piece of blotting paper over the spot and set a flatiron on top, the iron being just hot enough not to scorch. Change the paper as often as it becomes greasy. After most of the oil has been extracted apply whitening; leave it on for a day or two, then brush off, and the spot will have disappeared.

What's What

A generation ago every young man contemplating matrimony was supposed to learn how to carve, so that, as mine host, in later life, with skill and grace, he could cut and administer portions of fish and meat. If he was an accomplished carver he managed very well, but about four times in ten, he was more or less clumsy and slow, and the embarrassing wait during the cutting-up process had to be screened by a barrage of small talk.

Americanization Feature of Club Programs

Miss Katherine Worley, member of the State Board of Control and director for the Nebraska Federation of Women's Clubs, addressed the York Departmental club on "Americanization and Civics" Monday, January 3.

The subject of Americanization is receiving careful study in the women's clubs of the state this year, following up the splendid start made last season," says Miss Worley. "Americanization and the Function of the Club Woman" was the subject of discussion before the Minutary Women's club recently. Mrs. M. D. McDuffie of Madison conducted a club session on "Americanization in the Public Schools," and the Elmwood Woman's club listened to Mrs. W. N. BLACKHEADS GO QUICK BY THIS SIMPLE METHOD

Blackheads—big ones or little ones—soft ones or hard ones—on any part of the body, go quick by a simple method that just dissolves them. To do this get about two ounces of calomite powder from your druggist—sprinkle a little on a wet sponge—rub over the blackheads briskly for a few seconds—and wash off. You'll wonder where the blackheads have gone. The calomite powder and the hot water have just dissolved them. Pinching and squeezing blackheads only open the pores of the skin and leave them open and unsightly—and unless the blackheads are big and soft they will not come out, while the simple application of calomite powder and water dissolves them right out, leaving the skin soft and the pores in their natural condition. You can get calomite powder at any drug store and if you are troubled with these unsightly blemishes you should certainly try this simple method.

Problems That Perplex Answered by BEATRICE FAIRFAX

I Love Versus Snobbery. Dear Miss Fairfax: I am 27 and in love with a man of 30. He is very fine but somewhat crude in manner and education. In other words, although I love him, I would hesitate having him meet all of my friends, not to say of my family. Now, Miss Fairfax, do you think I would be happy if I married him?

The Black Sheep. Dear Miss Fairfax: I would just like to ask of you some advice. I have been the black sheep of our family for many years. But recently my father died, and I would like to reform. But I am cast aside by every one excepting my mother. I have begged my uncles and cousins to give me a chance. But received no reply.

White Veils.

To clean white veils put the veil in a solution of pure white soapy water and allow it to simmer for 10 minutes. Drain carefully and put it in some warm water, squeeze it two or three times to rinse it free from soap, and then pass it through clean water to which has been added a little liquid blue. Pour a pint of boiling water upon a teaspoon of starch dampened with cold water and pass the veil through it. Clap it well between the hands, pull out the shape carefully, and pin every point down, keeping the edges all quite straight.

Pitch, Tar or Auto Grease.

To remove pitch, grease and tar stain soak in turpentine. Scrape off carefully with a knife all the loose surface dirt, sponge clean with turpentine.

There is nothing better to remove tar from white clothing than lard. Rub it well into the spot and then wash it out with soap and warm water.

Do not despair if machine oil gets on your dainty fabrics when stitching, but rub the spot gently with a cloth dipped in turpentine and it will soon vanish.
