Small Boy, 4, Seriously Injured When Struck by Car as He Ran With Kite

X—X—, 4 son of Mr. and Mrs. X—, who reside at X—X— street, was painfully injured today when he was struck by a car driven by X—. While flying his kite, X— ran out in the street directly in the path of the car. The boy's injuries consist of painful bruises and cuts on the face and possible internal injuries.

Be Careful When Flying Kites!...

WE MOST CERTAINLY DO NOT WANT ANY OF OUR LITTLE FRIENDS INJURED...

Do Not Fly Kites Near Electric Wires

The safe kite flyer never flies his kite near electric wires of any kind. Kites with metal parts are dangerous if they fall across electric wires.

Do Not Use Wire For Kite String

Be sure that your kite contains no wire or twine that has wire in it. Wet string is also dangerous because it conducts electricity.

Do Not Climb Poles or Trees...

... to knock down kites caught in wires. Not only is it possible for you to fall... but there is danger of contact with electric wires.

PARENTS:

You can greatly assist us, by warning your children about the dangers of flying kites... We want them to enjoy themselves... but we also want to be sure of their safety!
