WEEK-END SUPPER IDEAS

Guests for the week-end? or just the family? Whichever it is you'll want to take a brief vacation from the kitchen or it won't really be Labor day for you.

Here's how you do it: Bake the nutbread in advance, it's better if it stands a day or so. Mix the meat

and set in the refrigerator until ready to bake. As a vegetable you'll like tender corn with lots of butter, takes only a few minutes to cook, you know.

Your salad is simple and is tossed in a few seconds. Dessert, too, you can make the day before and just wait until you see what a lovely surprise it is, too. Cool and delicious, the orange freeze is tops. A change in the meat course is

the order of the day. A touch of fruit borrowed from a favorite cake and three of your favorite kinds of meat go to make up this:

*Apricot Upside-Down Meat Loaf. (Serves 8 to 10) 1 pound smoked ham (ground twice)

1/2 pound beef (ground) 1/2 pound fresh pork (ground

2 eggs % cup cold water

1 cup milk cup cornflakes (crushed)

1 tablespoon Worcestershire sauce 1/2 teaspoon pepper 16 teaspoon dry mustard

1 tablespoon onion (very finely 4 tablespoons butter

tablespoons brown sugar

18 dried apricot halves (cooked) Combine smoked ham, beef and pork with slightly beaten eggs, milk, water and cornflakes. Mix thoroughly and add Worcestershire sauce, pepper, mustard, and finely minced onion. Melt butter in bottom of a 9 by 5 by 3 loaf pan. Add brown sugar and heat until well blended. Arrange apricots, cut side up, on the bottom of the pan. Pack the

grees) for 11/4 hours. You'll really approve of this new dessert idea, and since it's light it will be especially appropriate with a substantial main course:

meat mixture over the apricots.

Bake in a moderate oven (350 de-

*Orange Freeze. (Makes 1½ quarts)

34 cup sugar 1 cup water

1 package orange-flavored gelatin 1 cup orange juice

2 tablespoons lemon juice 2 cups milk

Combine sugar and water and boil 2 minutes. Remove from fire and dissolve gelatin in hot syrup. Add fruit juices. Turn into freezing tray of automatic refrigerator, setting to coldest freezing temperature. When partially frozen, turn into cold bowl ind beat with rotary beater until thick and fluffy. Add milk and beat until blended. Return to tray, stir every 30 minutes, and freeze until

firm (5 to 6 hours). Peach Shortcake.

Since peaches are so very good this year, you'll want to make the most of them. This will win your

LYNN SAYS:

Vegetables with interesting background and good vitamin stories intrigue me. Take watercress, for instance. You may once have gathered this tender little green among brooks and runs, but its history harks back much longer than either you or I.

Watercress is an excellent source of vitamin A which promotes growth, increases resistance to infective diseases and prevents eye diseases. Excellent too is watercress in vitamin C which is so essential to good bone and teeth formation.

Vitamin B, too, is found in its leaves, and that, you know, stimulates appetite and protects nerve and brain tissue and brain function. Its vitamin G content will help you have normal nutrition. The iron it contains in its copper and magnesium deposits helps make blood and nourish teeth.

CONTROL WEEDS DURING THE FALL

Check Pest Growth Now; Save Spring Trouble.

> By JAMES W. DAYTON (Agricultural Agent at Large, Massachusetts State College.)

In the spring people talk about weeds as well as about the weather, only they do something about the weeds. But in the fall, weeds are overlooked. They are often accepted as part of the scenery and nothing much is done about them. In fact, they are not always even talked about. But the late summer and the fall is really the time to save a lot of future trouble. For that time of year annual weeds are forming thousands of seeds and laying the foundations for next year's abundance. Perennial weeds are busy storing up food in their roots for good, strong growth next spring.

The simplest thing to do about these fall weeds is to see that they never ripen seeds. Mow them, or pull them before the seeds are ripe. It is usually best to rake them up and destroy them after they are cut, for weed seeds will ripen after the plant is killed. They put their last resources into preparing for the coming generation.

The mowing machine, the scythe, or just a plain knife may be usedall depending upon the size of the job; but don't forget fence corners and the patches of waste land. These may be more expensive areas than you might suspect if they spread weeds over the rest of the farm, and this is the time of year to cut down their costs.

Encourage the weed seeds to sprout in the land to be seeded this fall. Then harrow them up at intervals before seeding time comes around. Soon all the weed seeds in the surface soil will have sprouted, and if, when grass and clover are seeded, care is taken not to bring to the surface new soil with additional weed seeds, the crop next year should be exceptionally clean.

Fall plowing is often a help in killing perennial weeds such as witch grass and other "tough customers." If weed roots can be exposed to the cold and drying of winter winds, the plants will have a State of Crops revealed hard time starting in the spring. qualities en- Harrowing with a spring-tooth hardearing him row to bring these roots to the sur-

Taking care of weeds in the fall will make that spring weeding job much less arduous. In the long run, time spent fighting weeds at this time of year will do more good than it will in the spring. And almost equally important, fall weed control makes the whole place neat and Farmer" label that no passerby can miss.

Can Control Gullies

By Eliminating Cause Keeping water out of gullies is a sure way of controlling them, and this can be done by terracing, explains R. C. Hay, extension agricultural engineer of the University of Illinois college of agriculture. The approaching slack season after harvest is a good time of the year to do terracing work.

Gullies on cultivated slopes can be starved and eventually eliminated by terracing. The terraces not only slow up and divert runoff water from gullies but also materially reduce sheet erosion losses. Farmers' experiences and experiments conducted under the supervision of farm advisers and the college of agriculture show that terraced fields lose only about one-seventh as much soil by erosion as comparable unterraced fields. R. C. Hay explains that water

diverted from fields must be handled with care or the formation of gullies at the outlets may result.

Proper Planning Helps Avoid Pasture Shortage

Livestock men who are finding themselves short on pasture in late summer and fall might well lay plans now for better protection against shortages next year. W. H. Peters, chief of the animal

husbandry division, University farm, St. Paul, urges rotation grazing of permanent pasture.

For alternate grazing Peters advises fencing off a pasture into two fields and running the stock into one for two weeks and into the other for a like period. This will result in giving less strain on pasture plants.

Small Turkeys

In experiments to develop smalltype white turkeys, the U. S. department of agriculture is not trying to displace the larger varieties; it is trying to develop small birds to fit the needs of small families. Investigators conclude that there is room for the small-type and medium-sized turkey, and that some growers will find it very much to their advantage to specialize in small families.

Prolific Insects Every season the white ant or termite proudly produces a million baby termites to swell the world's ant population. Toads and frogs both have large families, the former in the neighborhood of 6,000 at a time, and the latter half that number. Snakes are three to four times

as prolific as rabbits, for whereas the latter rarely produce more than a dozen baby rabbits at a birth, a snake often produces 40. The king of the jungle, Lord Lion, is usually the proud father of quads, and his hereditary

enemy, the tiger, can boast of the life come in the wake of duties same number. Finally, the elephant, last descendant of the prehistoric monsters, rarely has more than one baby elephant at a time.

If you have any doubt about what to give a man in any of the nation's military or naval services, send a carton of cigarettes or a pound tin of smoking tobacco. Tobacco rates first as a gift with them. And when you check up, actual sales records show that in Army, Navy, Marine Corps and Coast Guard service stores (where the men buy their own) Camels outsell all other cigarettes. It is well-known that Prince Albert Smoking Tobacco is the "National Joy Smoke." Local tobacco dealers are now featuring Camel cartons and pound tins of Prince Albert Smoking Tobacco as number one gifts for men in Uncle Sam's services.—Adv.
