Sugar Conservation

Restrictions on sugar purchases may be inconvenient at first but need not be a kitchen tragedy, it was said today by Miss Maude Mathews, Demonstration Agent for Holt County. She listed several steps that will help stretch the sugar allowance over a longer period of time.

1. Watch out for sugar wastes, such as undissolved sugar in the bottom of tea or coffee cups, oversweetened foods, or failures of any products containing sugar.
2. Cut down on sugar in least noticeable ways first. Experiment to see if the amount of sugar placed on a breakfast cereal is a matter of habit. Maybe the amount can be cut down.
3. Try eating fewer rich desserts. Fresh fruits are nutritious and desirable desserts, and they carry their own sugar. Canned fruits come in the class of not-too-rich desserts. Dried fruits are a very good source of natural sugar.
4. When you sweeten sauces, such as applesauce, put the sugar in at the end of the cooking time. It will take less sugar to get the sweetness if the sugar is not cooked so long.
5. Most of us can get along on a lot less sugar than we have been using. Any reduction in sugar can easily be taken care of by increasing the quantities of other energy-giving foods in the diet. Whole-grain cereals, starchy vegetables, and dried fruits supply, not only energy, but vitamins and minerals.

Miss Mathews stated that the women's project clubs in Holt County will have a demonstration on means of saving sugar, at their Agricultural Extension Service will make available many recipes
