

Famed Indian Scouts of Arizona Share Memory of Glorious Past

These famous Indian scouts stationed at Ft. Huachuca, Arizona, were originally mustered into army units shortly after the Civil war. The government no longer recruits these scouts as there are only seven left. When they retire and are discharged this once famous organization will be only a memory. Today the members of the detachment are performing valuable service as reservation range and fire guards. Many tales have been told of the bravery of Indian scouts attached to regular army units.

Corporal Jim Lane, U. S. army scout, second from right, shakes hands with John Rope (Black Lariat) retired U. S. army scout, who tells of the many battles in which he has fought.

Private Andrew Paxson is sealing a dangerous peak in this century. Sgt. Sinew L. Riley typifies the eyes and ears of Indian scouts in this century.

These grizzled Indian features make a very interesting picture. Left to right: Corporal Jim Lane, John Rope and Kassey Y-32.

These Indian scouts are filing up the mountainside looking for anything that looks like trouble—for brush fires, and so on.

Privates William Major and Andrew Paxson look for suspicious movements from lofty peak of Huachuca mountains.

PREPAREDNESS by the AMERICAN RED CROSS

Two million volunteer Red Cross workers—a militant army of mercy.

GIVING a pint of blood for the army and navy is a new form of patriotism in which thousands of loyal Americans are now participating.

This blood, processed into life-saving plasma for emergency transfusions, is collected from volunteer blood donors at 18 Red Cross Blood Donor centers.

The program was launched in February, 1941, following a request by the surgeons general of the army and navy that the Red Cross provide 15,000 pints of blood to be processed into dried plasma. This program has now been expanded at the request of the army and navy to the point where over one million donors will be required. Eighteen centers have been opened, and donations are pouring in at the rate of approximately 60,000 a month.

Giving blood is a simple process, requires but a few minutes time on the part of the donor, and has no after effects. The blood is shipped daily in refrigerated containers to the laboratories, where it is processed into dried plasma, a light, straw colored powder that can be kept indefinitely and transported easily.

Numerous cases have been reported where plasma saved the lives of American soldiers and sailors suffering from burns and traumatic shock, and Red Cross plasma has been distributed to our armed forces operating in the Atlantic and Pacific war theaters. However, thousands of additional donors are needed to supply the full requirements for the army and navy, and to provide plasma for any civilian emergencies which may result from enemy action in this country.

Red Cross Blood Donor centers are located in New York, Philadelphia, Baltimore, Buffalo, Rochester, N. Y., Indianapolis, Detroit, Pittsburgh, St. Louis, Boston, Milwaukee, Cleveland, San Francisco, Los Angeles, Chicago, Cincinnati, Brooklyn, and Washington, D. C. (Prepared exclusively for WNU.)

PATTERNS SEWING CIRCLE

pieces—forming smart shoulder yokes at the top, gathered at the waist for a flattering fit and dropping the skirt line—as well as the low vee neck. From the point of this neck to the hem is a long straight line which draws attention to your height rather than your width! Graceful sleeves which just cover the elbows are suggested for this frock when it is intended for more formal wear.

A glance at our picture tells you that here is a dress of distinction yet it can be made without any special effort and is just as effective in lovely soft cottons as it is in silk or rayon crepes.

Barbara Bell Pattern No. 1541-B is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires, with short sleeves, 4 1/2 yards 39-inch material.

Barbara Bell Pattern No. 1570-B is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires, with short sleeves, 4 1/2 yards 39-inch material.

Picture Play Set. DON'T you find it fun to make your daughter's play clothes in cunning styles and pretty cottons? In Pattern No. 1570-B you'll find a play set for girls from 1 to 6 years old which has many practical features.

First comes a frock—delightfully cool with scalloped cap sleeves, a pert pocket, braid and button trimming and a button-down-the-back opening which makes it easy to get on and off. Second, there is an adorable bonnet to match, the crown of which buttons in place. The whole thing opens flat for ironing. Third is a pair of overalls—so sensible for play and so healthy, too, because in warm weather no top is needed and the wearer is exposed to a grand sun tan.

Barbara Bell Pattern No. 1570-B is designed for 1, 2, 3, 4, 5 and 6 year sizes. Size 2 requires 3 1/2 yards 32 or 35-inch material for ensemble, 3 yards bias braid for frock and bonnet.

Partners in Nature

One of the strangest partnerships in nature is that of the yucca plant and the yucca moth, which cannot live without each other, says Collier's. The plant is fertilized only by pollen that is brought to it by this insect, and the insect's larvae are able to survive only on food furnished by this plant. Incidentally, the moth spends the daylight hours within the closed blossom, as both are nocturnal.

For Victory

Cheese will stay moist longer if the edge is thinly spread with butter before the cheese is placed in the refrigerator.

Unwrap soap before storing. The soap dries out, lasts longer when exposed to the air several days before use.

A stale loaf of bread, with crusts removed, will yield eight cups of crumbs. When stale bread begins to collect around the kitchen, grind it into crumbs, and store away in a glass jar until ready to use.
