VOU'LL, hear more and more about the government's "Food for Freedom" program as the war progresses. It is a plan for assuring ample supplies of food to meet the needs of America and its allies in the war, and a large part of the world after the war. It is an undertaking of tremendous proportions, a challenge to American agriculture, and an opportunity of service for America's banks. Later in this series we will discuss this program and deal specifically with the ways that banks are helping make it a success.
